The authors wish to make the following corrections to this paper [1]. There are typos in the numbers associated with the compound LDN/OSU 0212320. The numbers were incorrectly typed as LDN/OSU 0232120 in some areas of the manuscript and Supplementary Materials. The correct information is:

In the fifth paragraph of Introduction:

In 2014, Kong and colleagues characterized a compound, LDN/OSU 0212320 (LDN), that upregulated GLT-1 protein levels at the post-transcriptional level as fast as two hours after injection.

In the sub-title of Results:

3.1. *Effect of LDN/OSU 0212320 Given 24 h before Focal Ischemia on Stroke Outcomes in Male and Female Mice*

3.2. *Effect of LDN/OSU 0212320 Given 2 h after Focal Ischemia on Stroke Outcomes in Male and Female Mice*

3.3. *Effect of LDN/OSU 0212320 on GLT-1 Protein Levels in Brains of Male and Female Mice*

In Figure 4 caption:

Expression of GLT-1 in brains after a single injection of vehicle or LDN/OSU 0212320 (LDN).

In Figure 5 caption:

Expression of GLT-1 in female brain cortex after different doses of LDN/OSU 0212320 (LDN).

In the Supplementary Materials:

The following are available online at <https://www.mdpi.com/2076-3425/11/1/76/s1>, Figure S1: Expression of GLT-1 in male brains after a single injection of vehicle or LDN/OSU 0212320 (LDN); Figure S2: Expression of GLT-1 in female brains after a single injection of vehicle or LDN/OSU 0212320 (LDN); Figure S3: Expression of GLT-1 in female brain cortex after different doses of LDN/OSU 0212320 (LDN).

In the supplementary file, the figure caption should be:

Supplemental Figure S1: Expression of GLT-1 in male brains after a single injection of vehicle or LDN/OSU 0212320 (LDN).

Supplemental Figure S2: Expression of GLT-1 in female brains after a single injection of vehicle or LDN/OSU 0212320 (LDN).

Supplemental Figure S3: Expression of GLT-1 in female brain cortex after different doses of LDN/OSU 0212320 (LDN).

The authors would like to apologize for any inconvenience caused to the readers by these changes.
