The authors wish to include the following in the above mentioned paper as the last sentence in section 2.2.2, “The methodology involved using two human pools of routinely leftover urine; as these two pools were fully de-identified and not specifically collected for this study, no informed consent was required.”

The authors also wish to include the following in the above

mentioned paper, following the first sentence of section 2.6., “The study protocol was approved by the Hospital Faculty Ethics Committee of the University of Liege (B707201420561).”

The authors would like to apologise for any confusion or inconvenience caused.
