<https://doi.org/10.1007/s00198-020-05607-6>

The Editors-in Chief have retracted this Letter to the Editor. The Letter presents the same hypothesis relating to B-vitamins in the treatment of COVID-19 as a previous Letter to the Editor by the same author group in another journal [1]. The Editors-in-Chief therefore consider this Letter to be redundant. The authors disagree with this retraction.
