

CORRECTION

Correction: Trans,trans-farnesol, an antimicrobial natural compound, improves glass ionomer cement properties

Aline Rogéria Freire de Castilho, Pedro Luiz Rosalen, Isaac Jordão de Souza Araújo, Igor Lebedenco Kitagawa, Cecilia Atem Gonçalves de Araújo Costa, Malvin N. Janal, Marcelo Corrêa Alves, Simone Duarte, Paulo Noronha Lisboa Filho, Rafael Nobrega Stipp, Regina Maria Puppim-Rontani

There is an error in [Table 2](#). The authors named the groups “CIV (control)” and “CIV + *tt*-farnesol” in error instead of “GIC (control)” and “GIC + *tt*-farnesol.” Please see the correct [Table 2](#).

Table 2. Roughness, hardness, compressive and diametral tensile strength of GIC containing or not *tt*-farnesol (mean \pm standard deviation).

Groups	Mechanical properties*			
	Roughness (μM)	Hardness (KHN)	Compressive Strength (MPa)	Diametral Tensile Strength (MPa)
GIC (control)	0.7 ± 0.2^a	44.2 ± 8.0^a	24.0 ± 8.9^a	18.0 ± 5.5^a
GIC + <i>tt</i> -farnesol	0.8 ± 0.1^a	72.4 ± 6.5^b	28.5 ± 8.3^a	14.0 ± 3.1^a

*For each assay, different lower-case letters indicate mean differences ($p < 0.05$).
