Correction

de Witt et al. (2020) [1] was published with a typesetting error in the Results section. The original text states:

“Participant-Identified barriers (across sites) included limited knowledge of some staff on qualitative study, was use cultural and clinical aspects of health care delivery for Indigenous people.”

This sentence should instead read:

“Participant-Identified barriers (across sites) included limited knowledge of some staff on cultural and clinical aspects of health care delivery for Indigenous people.”

This error was introduced by the publisher during typesetting.
