The authors have retracted abstract #029 “Radiographic characteristics that delineate abusive from accidental skull fractures, including the significance of fracture extension to sutures,” page S95, because the study lacked appropriate ethical oversight from a relevant ethics committee. All authors agree to this retraction.

The online version of the original article can be found at <https://doi.org/10.1007/s00247-018-4130-z>
