STEM CELLS TRANSLATIONAL MEDICINE 2015;4:1199–1213; first published on August 18, 2015; <http://dx.doi:10.5966/sctm.2015-0021>

In the Materials and Methods section, the Ethical Considerations paragraph incorrectly noted the regulatory permit approval numbers for this study. The first sentence of the paragraph should have stated the following:

The production of clinical-grade MSCs was accredited by the Swedish National Board of Health and Welfare (approval numbers 6.3.3-8874-2011 and 6.1.3-9791/2013).

The authors regret the error, which has been corrected in the online version of the article.
