

THE LANCET Psychiatry

Supplementary appendix

This appendix formed part of the original submission and has been peer reviewed.
We post it as supplied by the authors.

Supplement to: Skapinakis P, Caldwell DM, Hollingworth W, et al. Pharmacological and psychotherapeutic interventions for management of obsessive-compulsive disorder in adults: a systematic review and network meta-analysis. *Lancet Psychiatry* 2016; published online June 15. [http://dx.doi.org/10.1016/S2215-0366\(16\)30069-4](http://dx.doi.org/10.1016/S2215-0366(16)30069-4).

Supplementary Appendix

This appendix has been supplied by the authors to give reviewers / readers additional information about the work under consideration.

Supplement to: Skapinakis et al. Pharmacological and psychotherapeutic interventions for the management of obsessive-compulsive disorder in adults: Systematic review and Network meta-analysis

Contents

Part A: Detailed Methods

A1. OpenBugs Code used in the network-meta-analysis

Part B: Detailed Results

B1: Detailed Results of the Main Analysis with all possible comparisons between classes or individual interventions

B1.1 Detailed results of the network meta-analysis

B1.2 Detailed results of the pairwise meta-analysis (inconsistency model)

B2. Detailed results of the sensitivity analyses (versus drug placebo)

B2.1 Sensitivity analysis 1 (Low overall attrition)

B2.2 Sensitivity analysis 2 (Incomplete outcome data)

B2.3 Sensitivity analysis 3 (Blinding)

B3. Detailed results of the secondary analysis, excluding the waiting list controlled trials

Part C: Additional Figures

Figure A1. Risk of bias assessment

Figure A2. “Rankogram” showing the probability of rank for efficacy (MD) and acceptability (dropout rates) by intervention. Higher probability for lower rank (i.e. 1) is favourable for both outcomes

Part D: Additional Tables

Table A1. Detailed characteristics of included studies

Table A2. Data used in the network meta-analysis

Table A3 List of Excluded Trials

Table A4 Results of the meta-regression analysis

Part A: Detailed Methods

1. OpenBugs Code used in the network meta-analysis

#Y-BOCS random effects analysis

Code adapted from Program 5(a)

Part B: Detailed Results

B1 Detailed Results of the Main Analysis with all possible comparisons between classes or individual interventions

B1.1 Detailed Results of the main analysis: Network Meta-analysis

KEY:

Intervention (Class)
1 Placebo (1)
2 Waitlist (2)
3 Fluoxetine (3)
4 Fluvoxamine (3)
5 Paroxetine (3)
6 Sertraline (3)
7 Citalopram (3)
8 Venlafaxine (4)
9 Clomipramine (5)
10 Behavioural Therapy (6)
11 CBT (7)
12 Cognitive Therapy (8)
13 Hypericum (9)
14 Fluvoxamine+CBT (10)
15 BehaviouralTherapy + Clomipramine (11)
16 Escitalopram (3)
17 Psychological Placebo (12)

t[i]: type of treatment per arm [i] (1=placebo, 2=waitlist, 3=fluoxetine, 4=fluvoxamine, 5=paroxetine, 6=sertraline, 7=citalopram, 8=venlafaxine, 9=clomipramine, 10=behavioural therapy, 11=CBT, 12=cognitive therapy, 13=Hypericum, 14=fluvoxamine and CBT, 15= clomipramine and behavioural therapy, 16=escitalopram, 17=psychological placebo; y[i]: total mean YBOCS scores at end of study (positive) or mean change from baseline (negative); n[i]: total number of patients in arm [i]; sd[i]: standard deviation of mean total score or change from baseline [i]. NA: not applicable.

Table A3 List of excluded Studies

Reference	Title	Reason for Exclusion
1.	Aigner M, Demal U, Zitterl W et al. Behavioural group therapy for obsessive-compulsive disorder. Verhaltenstherapie 2004; 14:7-14.	controlled but not randomised
2.	Akouchekian S, Jamshidian Z Maracy MR et al. Religious cognitive behavioral therapy in religious oriented obsessive compulsive disorder. European Psychiatry [abstracts from the 19th European Congress of Psychiatry, EPA 2011 Mar 12-15; Vienna, Austria]	duplicate - early congress abstract of the full paper
3.	Akuchekian S, Jamshidian Z, Maracy M et al. Effectiveness of religious-cognitive-behavioral therapy on religious oriented obsessive compulsive disorder and its co-morbidity. Journal of Isfahan Medical School 2011; 28:1	special subgroup of OCD patients with religious-oriented symptoms (in Arab)
4.	Askin R, Turan M, Çilli AS et al. Clomipramine versus Sertraline in the Treatment of Obsessive Compulsive Disorder. Bull Clin Psychopharmacol 1999; 9:133-138	Usable data only for dichotomous outcome. No variability measure for continuous outcome
5.	Balkom AV, Haan ED, Oppen PV et al. Cognitive-Behavioral Therapy Versus the Combination with Fluvoxamine in the Treatment of OCD. 150th Annual Meeting of the American Psychiatric Association. San Diego, California, USA. 17-22 May, 1997.	duplicate reporting- Early congress abstract of the vanBalkom1998 paper
6.	Belloch A, Cabedo E, Carrio C et al. Group versus individual cognitive treatment for Obsessive-Compulsive Disorder: Changes in non-OCD symptoms and cognitions at post-treatment and one-year follow-up. Psychiatry Res 2011; 187:174-9	secondary analysis of Cabedo2010 paper which has also been excluded
7.	Black D.W, Monahan P., Gable J et al. Hoarding and treatment response in 38 nondepressed subjects with obsessive-compulsive disorder. J Clin Psychiatry 1998; 59:420-5	duplicate data, PAR vs PLA already included in Hollander2003. CBT arm not randomised
8.	Cabedo E, Belloch A, Carrio C et al. Group versus individual cognitive treatment for obsessive-compulsive disorder:	control intervention not covered (comparison between different

	Changes in severity at post-treatment and one-year follow-up. Behav Cogn Psychother 2010; 38:227-32	forms of the same therapy)
9.	Denys D, van Megen HJ, van der Wee N et al. A double-blind switch study of paroxetine and venlafaxine in obsessive-compulsive disorder. J Clin Psychiatry 2004; 65:37-43	extension of the Denny2003 study in non responders (treatment refractory population)
10.	Dougherty DD, Jameson M, Deckersbach T et al. Open-label study of high (30 mg) and moderate (20 mg) dose escitalopram for the treatment of obsessive-compulsive disorder. Int Clin Psychopharmacol 2009; 24:306-11	dose ranging study of the same drug - no comparator
11.	Eli, L. Fluoxetine Treatment for Obsessive Compulsive Disorder in Children and Adolescents [Trial 3032]	duplicate with Geller
12.	Fineberg NA, Hughes A, Gale TM et al. Group cognitive behaviour therapy in obsessive-compulsive disorder (OCD): A controlled study. Int J Psychiatry Clin Pract 2005; 9:257-63	this paper used systematic and not random sampling
13.	Franklin ME, Abramowitz JS et al. Cognitive-behavioral therapy with and without medication in the treatment of obsessive-compulsive disorder. Professional Psychology: Research and Practice 2002; 33:162-168	observational study stratified by medication - not an experimental study
14.	Giasuddin NA, Nahar JS, Morshed NM et al. Efficacy of combination of fluoxetine and cognitive behavioral therapy and fluoxetine alone for the treatment of obsessive compulsive disorder. Pak J Pharm Sci 2013; 26:95-8	uncertain if truly randomised (abstract does not mention randomised, baseline scores of the scale used almost marginally significantly different between the two groups with $p=0.07$)), unable to find if the symptom scale used (DUOCS) has been validated or not - reference given unable to locate, this scale has not been used again in research
15.	GlaxoSmithKline 1993a	early report of the Hollander2003 data set
16.	GlaxoSmithKline 1993b	duplicate with Zohar1996
17.	Goodman WK, Lydiard RB, Rubin A, et al. Safety of sertraline in long-term OCD treatment: preliminary results of a multicenter study. 152nd Annual Meeting of the American Psychiatric Association. 1999 May 15-20, Washington DC	relapse prevention study
18.	Goodman WK, Price LH, Delgado PL, et al. Specificity of serotonin reuptake inhibitors in the treatment of obsessive-	see control intervention

	compulsive disorder Comparison of fluvoxamine and desipramine. Arch Gen Psychiatry 1990; 47:577-85	
19.	Greist, JH. Fluvoxamine in obsessive compulsive disorder: A multicenter parallel design double-blind placebo-controlled trial. Clin Neuropharm 1992; 15 (Suppl. 1, Pt. B): 310B	abstract report with no data given. This is one of the two pivotal studies of fluvoxamine from Solvay but only the second - Goodman1996 - has been published. Greist1995 in a meta-analysis has combined the two trials but no data can be used either
20.	Greist J H, Jefferson J W, Rosenfeld R et al. A 1 year double-blind placebo-controlled fixed dose study of sertraline in the treatment of obsessive-compulsive disorder. Int Clin Psychopharmacol 1995; 10:57-65	duplicate with CCSG1991
21.	Hewlett, WA, Vinogradov S and Agras WS. Clomipramine, clonazepam, and clonidine treatment of obsessive-compulsive disorder. J Clin Psychopharmacol 1992; 12:420-30	comparator not covered (clonazepam, clonidine)
22.	Hoehn-Saric R, Ninan P, Black DW et al. Multicenter double-blind comparison of sertraline and desipramine for concurrent obsessive-compulsive and major depressive disorders. Arch Gen Psychiatry 2000; 57:76-82	see diagnosis and control not covered
23.	Hohagen F, König A, Rasche-Räuchle H, et al. Behavior therapy and fluvoxamine versus behavior therapy and placebo: Results of a multicenter study	duplicate - early congress abstract of the Hohagen1998 paper
24.	Holland R, Vardy A and Bolt G. A comparison of fluvoxamine (FL) and clomipramine (CLO) in the treatment of obsessive compulsive disorder (OCD)	abstract congress about tolerability including previously published data from solvay
25.	Insel TR, Murphy DL, Cohen R. M et al. Obsessive-compulsive disorder. A double-blind trial of clomipramine and clorgyline. Arch Gen Psychiatry 1983; 40:605-12	control intervention not covered
26.	Jakubovski E, Diniz JB, Valerio C et al. Clinical predictors of long-term outcome in obsessive-compulsive disorder. Depress Anxiety 2013; 30:763-72	duplicate with belotto - secondary
27.	Jenike MA, Baer L, Summergrad P et al. Obsessive-compulsive disorder: a double-blind, placebo-controlled trial of	duplicate with CCSG1991

	clomipramine in 27 patients. Am J Psychiatry 1989; 146:1328-30	
28.	Jonsson H, Hougaard E and Bennedsen BE. Randomized comparative study of group versus individual cognitive behavioural therapy for obsessive compulsive disorder. Acta Psychiatr Scand 2011; 123:387-97	control intervention not covered (comparison between different forms of the same therapy)
29.	Karabanow O. Double-blind controlled study in phobias and obsessions. J Int Med Res 1977; Suppl 5:42-8	not exclusively OCD (phobias) - unstandardised diagnosis
30.	Kearns C, Tone Y, Rush G et al. Effectiveness of group-based cognitive-behavioural therapy in patients with obsessive-compulsive disorder. The Psychiatrist 2010; 34:6-9	uncontrolled case series (not randomised)
31.	Khan MN, Hotiana UA and Ahmad S. Escitalopram in the treatment of obsessive-compulsive disorder: a double blind placebo control trial. J Ayub Med Coll Abbottabad 2007; 19:58-63	first phase of the study open label uncontrolled trial, 2nd phase randomised responders only for relapse prevention
32.	Koran LM, Cain JW, Dominguez RA et al. Are fluoxetine plasma levels related to outcome in obsessive-compulsive disorder? Am J Psychiatry 1996; 153:1450-4	duplicate with Tolefson
33.	Kudo Y. A placebo controlled double blind study in obsessive compulsive disorder with fluvoxamine	early congress report of the Nakajima paper
34.	Leonard HL, Swedo SE, Rapoport JL, et al. Treatment of obsessive-compulsive disorder with clomipramine and desipramine in children and adolescents A double-blind crossover comparison. Arch Gen Psychiatry 1989; 46:1088-92	comparator not covered
35.	Ma JD, Wang CH, Li HF, et al. Cognitive-coping therapy for obsessive-compulsive disorder: a randomized controlled trial J Psychiatr Res 2013; 47:1785-90	non extractable data for non-resistant patients: this study has included patients that were treatment resistant within the study but no separate data are given for those non-resistant
36.	Mallya GK, White K, Waternaux C and Quay S. Short and long term treatment of obsessive compulsive disorder with fluvoxamine. Annals of Clinical Psychiatry 1992; 4:77-80	duplicate data also reported in Goodman1996
37.	Marks IM, Lelliott P, Basoglu M, et al. Clomipramine, self-exposure and therapist-aided exposure for obsessive-compulsive rituals. Br J Psychiatry 1988; 152:522-34.	No extractable data for treatment comparisons

38.	Marks IM, Stern RS, Mawson D et al. Clomipramine and exposure for obsessive-compulsive rituals. Br J Psychiatry 1980; 136:1-25.	No extractable data for treatment comparisons- OCD diagnosis not standardised
39.	Mavissakalian MR, Jones B, Olson S et al. Clomipramine in obsessive-compulsive disorder: clinical response and plasma levels. J Clin Psychopharmacol 1990; 10:261-8.	duplicate with CCSG1991
40.	Montgomery SA. Clomipramine in obsessional neurosis: a placebo-controlled trial. Pharmacological Medicine 1980; 1:189-192	duplicate - crossover data at the point of cross-over, also reported later in Montgomery1990
41.	Mundo E, Bianchi L and Bellodi L. Efficacy of fluvoxamine, paroxetine, and citalopram in the treatment of obsessive-compulsive disorder: a single-blind study. J Clin Psychopharmacol 1997; 17:267-71	dose ranging study of the same drug - no comparator
42.	Mundo E, Maina G. and Uslenghi C. Multicentre, double-blind, comparison of fluvoxamine and clomipramine in the treatment of obsessive-compulsive disorder. Int Clin Psychopharmacol 2000; 15:69-76.	early report of a subset of the data that also reported in Mundo2001 (14 out of the 40 centres)
43.	Muroff J, Steketee G, Bratiliotis C et al. Group cognitive and behavioral therapy and bibliotherapy for hoarding: A pilot trial. Depress Anxiety 2012; 29:597-604.	hoarding disorder not OCD
44.	Nazari H, Momeni N, Jariani M et al. Comparison of eye movement desensitization and reprocessing with citalopram in treatment of obsessivecompulsive disorder. Int J Psychiatry Clin Pract 2011; 15:270-4	main intervention not covered - eye movement desensitization and reprocessing (EMDR)
45.	Olatunji BO, Rosenfield D, Tart CD et al. Behavioral versus cognitive treatment of obsessive-compulsive disorder: an examination of outcome and mediators of change. J Consult Clin Psychol 2013; 81:415-28.	reports same data with Cottraux2001 but different method of analysis and treating missing data (multilevel instead LOCF)
46.	Omranifard V, Akuchakian S, Almasi A et al. Effect of religious cognitive-behavior therapy on religious content obsessive compulsive disorder and marital satisfaction [conference abstract]	duplicate with the Akuchakian2011 paper that has been excluded
47.	Pigott TA, L'Heureux F, Rubenstein CS et al. A double-blind, placebo controlled study of trazodone in patients with obsessive-compulsive disorder. J Clin Psychopharmacol 1992; 12: 156-62.	Intervention not included (trazodone)
48.	Pigott TA, Pato MT, Bernstein SE et al. Controlled comparisons of clomipramine and fluoxetine in the treatment of	data not extractable at the point of cross-over

	obsessive-compulsive disorder. Behavioral and biological results. Arch Gen Psychiatry 1990; 47:926-32	
49.	Rapoport, J, Elkins R and Mikkelsen E. Clinical controlled trial of chlorimipramine in adolescents with obsessive-compulsive disorder. Psychopharmacol Bull 1980; 16:61-3	duplicate data - this is an early report of the Flament1985 study (this is reported and cited in the later Flament study)
50.	Richter P, Witheridge K, Daskalakis ZJ et al. Investigation of predictors of drug response in obsessive compulsive disorder (OCD) [conference abstract]	congress abstract only - crossover of escitalopran vs clomipramine but no usable data given
51.	Rouillon F. A double-blind comparison of fluvoxamine and clomipramine in OCD	duplicate, early congress report of the Mundo2001 study
52.	Shareh H, Gharai B and Vahid MKA. Comparison between metacognitive therapy, fluvoxamine and combined therapy in the improvement of thought control strategies and stop signal criteria in obsessive compulsive disorder. [Farsi (Iranian)]. IJPCP 2011; 17:199-207	duplicate publication of Shareh2011a
53.	Shareh H, Gharraee B and Vahid MKA. Comparison of metacognitive therapy, fluvoxamine and combined treatment in Improving metacognitive beliefs and subjective distress of patients with obsessive-compulsive disorder. [Farsi (Iranian)]. Advances in Cognitive Science 2011; 12:45-59	secondary analysis of Sharreh2010
54.	Shavitt R, Valerio C, Diniz, JB et al. Clinical predictors of treatment outcome in obsessive-compulsive disorder: A two-year follow-up [conference abstract]	congress abstract - extension of the Belotto-Silava2012 dataset
55.	Sibon I, Leyton M, Gravel P et al. CBT vs sertraline in OCD: Effects on brain regional serotonin synthesis index ACNP, Dec. 11-15, 2005, Waikoloa, HI	congress abstract, data not given for analysis, unable to decide on inclusion criteria
56.	Solyom L and Sookman D. A comparison of clomipramine hydrochloride (Anafranil) and behaviour therapy in the treatment of obsessive neurosis. J Int Med Res 1977; Suppl 5:49-61	not randomised
57.	Stein DJ, Hollander E, Mullen LS, et al. Comparison of clomipramine, alprazolam and placebo in the treatment of obsessive compulsive disorder. Human Psychopharmacology: Clinical and Experimental 1992; 7:389-395	continuous data not extractable for treatment comparisons
58.	Stein DJ, Tonniar B. and Andersen EW. Escitalopram in the treatment of ocd	early congress abstract of the full Stein2007 paper

59.	Steketee G, Frost RO, Tolin DF et al. Waitlist-controlled trial of cognitive behavior therapy for hoarding disorder. <i>Depress Anxiety</i> 2010; 27:476-84	hoarding disorder not OCD
60.	Tamimi Raed R, Mavissakalian MR, Jones B et al. Clomipramine versus fluvoxamine in obsessive-compulsive disorder. <i>Annals of Clinical Psychiatry</i> 1991; 3:275-279	unblinded (open label) controlled trial
61.	Turner SM, Jacob RG, Beidel DC and Himmelhoch J. Fluoxetine treatment of obsessive-compulsive disorder. <i>J Clin Psychopharmacol</i> 1985; 5:207-12	uncontrolled study, only one fluoxetine arm
62.	Vallejo J, Olivares J, Marcos T et al. Clomipramine versus phenelzine in obsessive-compulsive disorder. A controlled clinical trial. <i>Br J Psychiatry</i> 1992; 161:665-70	comparator (phenelzine) - not covered
63.	van Balkom AJ, de Haan E, van Oppen P et al. Cognitive and behavioral therapies alone versus in combination with fluvoxamine in the treatment of obsessive compulsive disorder. <i>J Nerv Ment Dis</i> 1998; 186:492-9	the usable comparison (CBT vs BT for 16 weeks has been fully reported in vanOppen1995 study, therefore this reports is duplicate. Remaining arms cannot be used due to the complexity of the design)
64.	Wheadon DE, Bushnell WD and Steiner MA. A fixed-dose comparison of 20, 40 or 60 mg paroxetine to placebo in the treatment of obsessive-compulsive disorder. Paper presented at the annual meeting of the American College of Neuropsychopharmacology Honolulu 1993	early report of the Hollander2003 data set
65.	Wilhelm S, Steketee G, Fama JM et al. Modular cognitive therapy for obsessive-compulsive disorder: A wait-list controlled trial. <i>J Cogn Psychother</i> 2009; 23:294-305	not random assignment (but "according to therapist availability)
66.	Williams TI, Salkovskis P, White H et al. Trialling cognitive behaviour therapy for children with OCD: a randomised controlled trial	duplicate - early congress abstract of the Williams2010 full paper
67.	Wootton BM, Dear BF, Johnston L et al. Remote treatment of obsessive-compulsive disorder: A randomized controlled trial. <i>Journal of Obsessive-Compulsive and Related Disorders</i> 2013; 2:375-384	main aim of the paper to compare different form of same treatment

68.	Yaryura-Tobias JA and Neziroglu FA. Venlafaxine in obsessive-compulsive disorder. Arch Gen Psychiatry 1996; 53:653-4	this is a letter from a small pilot study that according to the authors is double blind but the results have not been published. The authors report very general trends and the study is negative. It is not possible to extraxt any information
69.	Alaghband-Rad J, Hakimshoostary M. A randomized controlled clinical trial of citalopram versus fluoxetine in children and adolescents with obsessive-compulsive disorder (OCD). Eur Child Adolesc Psychiatry 2009 Mar;18(3):131-5.	Included in Children & Adolescent subset
70.	Asbahr FR, Castillo AR, Ito LM, Latorre MR, Moreira MN, Lotufo-Neto F. Group cognitive-behavioral therapy versus sertraline for the treatment of children and adolescents with obsessive-compulsive disorder. J Am Acad Child Adolesc Psychiatry 2005; 44:1128-1136.	Included in Children & Adolescent subset
71.	Barrett P, Healy-Farrell L, March JS. Cognitive-behavioral family treatment of childhood obsessive-compulsive disorder: a controlled trial. J Am Acad Child Adolesc Psychiatry 2004; 43:46-62.	Included in Children & Adolescent subset
72.	Bolton D, Perrin S. Evaluation of exposure with response-prevention for obsessive compulsive disorder in childhood and adolescence. J Behav Ther Exp Psychiatry 2008; 39:11-22.	Included in Children & Adolescent subset
73.	Bolton D, Williams T, Perrin S, Atkinson L, Gallop C, Waite P, Salkovskis P. Randomized controlled trial of full and brief cognitive-behaviour therapy and wait-list for paediatric obsessive-compulsive disorder. J Child Psychol Psychiatry 2011; 52:1269-1278.	Included in Children & Adolescent subset
74.	DeVeugh-Geiss J, Moroz G, Biederman J, et al. Clomipramine hydrochloride in childhood and adolescent obsessive-compulsive disorder: a multicenter trial. J Am Acad Child Adolesc Psychiatry 1992; 31:45-49.	Included in Children & Adolescent subset
75.	Flament MF, Rapoport JL, Berg CJ, Sceery W, Kilts C, Mellström B, et al. Clomipramine treatment of childhood obsessive-compulsive disorder: a double-blind controlled study. Arch Gen Psychiatry 1985;42:977-83.	Included in Children & Adolescent subset
76.	Freeman JB, Garcia AM, Coyne L, Ale C, Przeworski A, Himle M, Compton S, Leonard HL. Early childhood OCD:	Included in Children & Adolescent subset

	preliminary findings from a family-based cognitive-behavioral approach. J Am Acad Child Adolesc Psychiatry 2008; 47:593-602.	
77.	Geller DA, Hoog SL, Heiligenstein JH, et al. Fluoxetine treatment for obsessive-compulsive disorder in children and adolescents: a placebo-controlled clinical trial. J Am Acad Child Adolesc Psychiatry 2001; 40:773-779.	Included in Children & Adolescent subset
78.	GSK. A Randomized, Multicenter, 10-Week, Double-Blind, Placebo- Controlled, Flexible-Dose Study to Evaluate the Efficacy and Safety of Paroxetine in Children and Adolescents with Obsessive-Compulsive Disorder (OCD) (29060/704).	Included in Children & Adolescent subset
79.	De Haan E, Hoogduin KA, Buitelaar JK, et al. Behavior therapy versus clomipramine for the treatment of obsessive-compulsive disorder in children and adolescents. J Am Acad Child Adolesc Psychiatry 1998; 37:1022-1029.	Included in Children & Adolescent subset
80.	Liebowitz MR, Turner SM, Piacentini J, et al. Fluoxetine in children and adolescents with OCD: a placebo-controlled trial. J Am Acad Child Adolesc Psychiatry 2002; 41:1431-1438.	Included in Children & Adolescent subset
81.	March JS, Johnston H, Jefferson JW, et al. Do subtle neurological impairments predict treatment resistance to clomipramine in children and adolescents with obsessive-compulsive disorder? J Child Adolesc Psychopharmacol 1990; 1:133-140.	Included in Children & Adolescent subset
82.	March JS, Biederman J, Wolkow R, et al. Sertraline in children and adolescents with obsessive-compulsive disorder: a multicenter randomized controlled trial. JAMA 1998; 280:1752-1756.	Included in Children & Adolescent subset
83.	Neziroglu F, Yaryura-Tobias JA, Walz J, et al. The effect of fluvoxamine and behavior therapy on children and adolescents with obsessive-compulsive disorder. J Child Adolesc Psychopharmacol 2000; 10:295-306.	Included in Children & Adolescent subset
84.	Piacentini J, Bergman RL, Chang S, Langley A, Peris T, Wood JJ, McCracken J. Controlled comparison of family cognitive behavioral therapy and psychoeducation/relaxation training for child obsessive-compulsive disorder. J Am Acad Child Adolesc Psychiatry 2011; 50:1149-1161.	Included in Children & Adolescent subset

85.	POTS. Cognitive-behavior therapy, sertraline, and their combination for children and adolescents with obsessive-compulsive disorder: the Pediatric OCD Treatment Study (POTS) randomized controlled trial. JAMA 2004; 292:1969-1976.	Included in Children & Adolescent subset
86.	Riddle MA, Scahill L, King RA, et al. Double-blind, crossover trial of fluoxetine and placebo in children and adolescents with obsessive-compulsive disorder. J Am Acad Child Adolesc Psychiatry 1992;31:1062-1069.	Included in Children & Adolescent subset
87.	Riddle MA, Reeve EA, Yaryura-Tobias JA, et al. Fluvoxamine for children and adolescents with obsessive-compulsive disorder: a randomized, controlled, multicenter trial. J Am Acad Child Adolesc Psychiatry 2001;40:222-229.	Included in Children & Adolescent subset
