Extended synaptotagmin interaction with the fibroblast growth factor receptor depends on receptor conformation, not catalytic activity.

Michel G. Tremblay, Chelsea Herdman, François Guillou, Prakash K. Mishra, Joëlle Baril, Sabrina Bellenfant, and Tom Moss

There was an error in the grant footnote. The grant footnote should indicate that T. M. was supported by the Cancer Research Society/S. Cohen Fund.

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
