Showing **all** responses Showing **all** questions Response rate: 60%

In which continent are you based?

2 What is your role in newborn care?

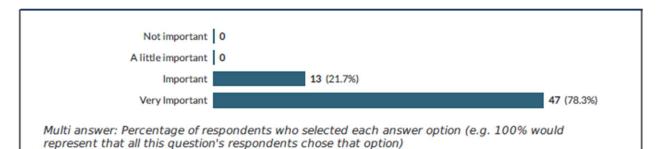

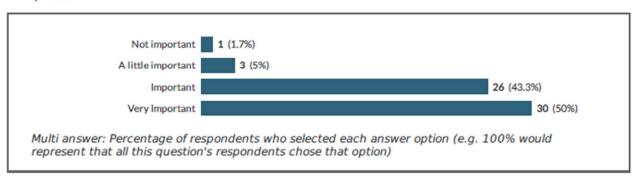

4 In the last 5-10 years, funding for delivery room technology development and research in my continent has been: 4.1 Poorly funded Describe **39** (65%) Multi answer: Percentage of respondents who selected each answer option (e.g. 100% would represent that all this question's respondents chose that option) 4.2 Adequately funded Describe 14 (23%) Multi answer: Percentage of respondents who selected each answer option (e.g. 100% would represent that all this question's respondents chose that option) 4.3 Good funding 7 (12%) Describe Multi answer: Percentage of respondents who selected each answer option (e.g. 100% would represent that all this question's respondents chose that option) 4.4 Excellent funding Describe 0 Multi answer: Percentage of respondents who selected each answer option (e.g. 100% would represent that all this question's respondents chose that option)

15 How important are the following measures to you when using technologies in the delivery room?

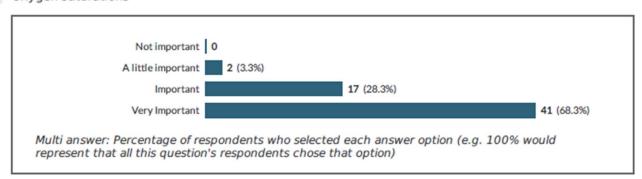

5.1 Heart rate

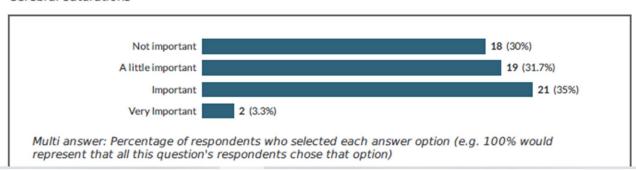

5.2 Temperature

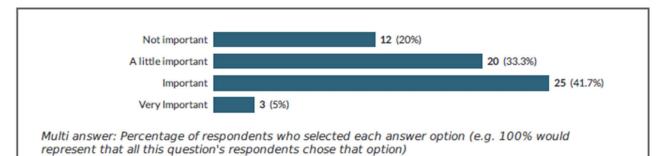

5.3 Oxygen saturations

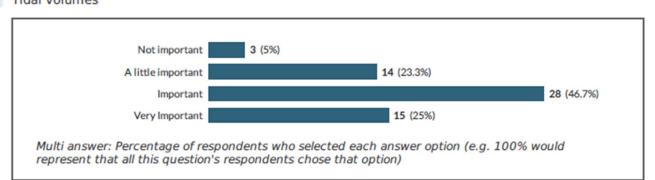

5.4 Cerebral saturations

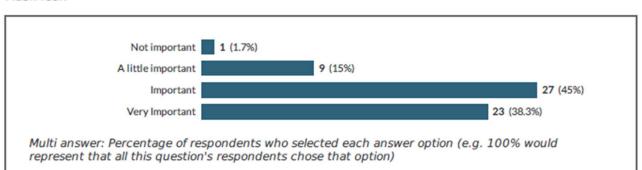

5.5 Exhaled carbon dioxide

5.6 Tidal volumes

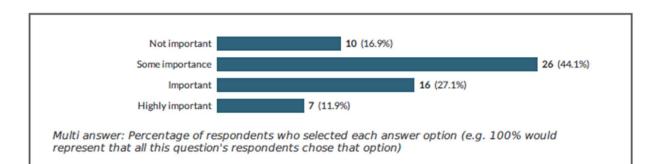

5.7 Mask leak

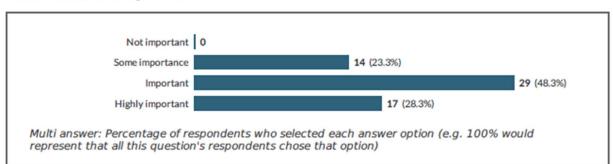

Rate the following delivery room technologies of the future in terms of their importance for the next 5 to 10 years.

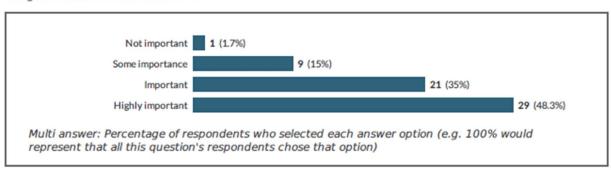

6.1 Near-infrared spectroscopy

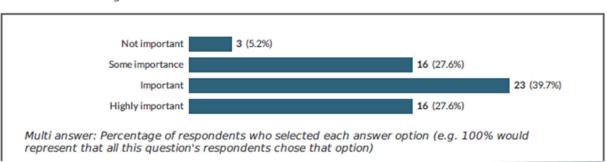

6.2 Wireless multi-vital signs device

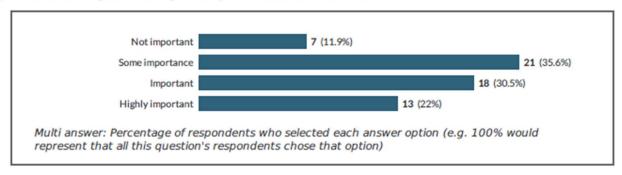

6.3 Lung aeration/recruitment device

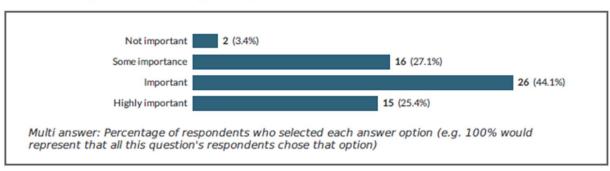

6.4 Contactless vital signs device

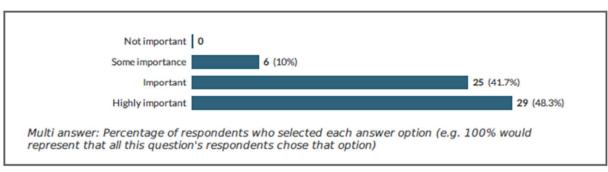

6.5 Artificial intelligence linking delivery room data with outcomes

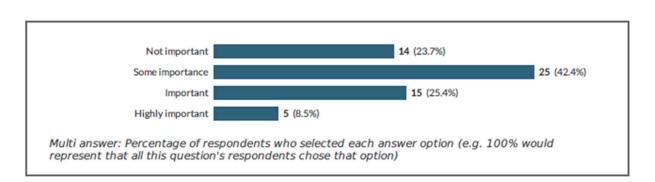

6.6 Autonomous systems such as inspired oxygen

6.7 Video analysis for training/audit

6.8 Ex-uterine suuport systems (e.g. artificial womb)

Are there any other technologies you would like to see in the delivery room (state what it would be)?
