

Evaluating Solid Lung Adenocarcinoma Anaplastic Lymphoma Kinase Gene Rearrangement Using Noninvasive Radiomics Biomarkers [Corrigendum]

Ma D, Gao X, Dan Y, et al. Evaluating Solid Lung Adenocarcinoma Anaplastic Lymphoma Kinase Gene Rearrangement Using Noninvasive Radiomics Biomarkers. *Onco Targets Ther.* 2020;13:6927–6935.

Recently, the authors research group reviewed their published article and found that there was an error in **Figure 3B** on page 6932, which was mistakenly duplicated in Figure 4B when they prepared the revised high-resolution Figure 3.

Corrected Figure 3 as follows:

Figure 3 Results of classifier 1. (A) The receiver-operating characteristic curve of classifier 1. (B) Selection of optimal features using ANOVA. (C) Contribution of selected radiomics features of classifier 1.

The authors apologize and advise this error does not influence the results or the conclusion.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
