

Corrigendum to “Osteocalcin is necessary and sufficient to maintain muscle mass in older mice” [Mol Metabol 5 (2017) 1042–1047]

Paula Mera, Kathrin Laue, Jianwen Wei, Julian Meyer Berger, Gerard Karsenty*

In the original article, the authors inadvertently re-used the data panel shown in Figure 1C (Ocn^{-/-} panel) for Figure 4C (Vehicle panel). The corrected data for Figure 4C for the representative histology of 10-month-old WT female mice receiving vehicle or Ocn for 28 days are

provided here. The figure legend and reference to these data are correct and remain unchanged. This correction does not affect the interpretation of the conclusions, and the authors sincerely apologize to the readers for this oversight.
