Projection from the Amygdala to the Thalamic Reticular Nucleus Amplifies Cortical Sound Responses

Mark Aizenberg, Solymar Rolón-Martínez, Tuan Pham, Winnie Rao, Julie S. Haas, Maria N. Geffen*

In the originally published version of this article, the duration of the DC stimulation to TRN and TC was stated as 100 ms and 10 ms, respectively. However, it should have been stated as 250 ms and 50 ms. The error has now been corrected online.

The correct numbers were used to mimic the experiments. The simulation results, the conclusion, and the figure do not change.

The authors regret this error.
