Annals of Dermatology 2022;34(6):419-430

<https://doi.org/10.5021/ad.21.239>

We found that the Supplementary Fig. 1 in article above was published incorrectly.

The corrected version should be as follows:

**Supplementary Fig. 1.** Impact of AD severity on QoL (n=1,163). AD: atopic dermatitis, QoL: quality of life, DLQI: Dermatology Life Quality Index, EASI: Eczema Area and Severity Index. \* $p < 0.05$  compared to mild EASI severity; † $p < 0.05$  compared to moderate EASI severity. ‡Number of patients analyzed. §Number of patients with non-missing results at the visit.

The original article has been modified also.

We sincerely apologize for any confusions that we may have caused.
