K. Ballanyi

University of Alberta
Edmonton
Canada

Dr. Ballanyi obtained a Dr. rer. nat. (equivalent to a Ph.D.) in Zoology from the University of Munich in Germany. Currently, he is Professor at the Department of Physiology at the University of Alberta in Edmonton, Canada. Dr. Ballanyi's main research topic is modulation of rhythmically active neuron-glia networks in newborn mammals by clinically important agents like opioids or methylxanthines and pathological processes like hypoxia and ischemia. He published >130 articles so far. He is also editor of the European Journal of Physiology (Pflügers Archiv) and Frontiers in Physiology (Respiratory Physiology).
