

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

The authors regret that population density was mislabeled in the original text. This variable should be labeled as land area in square miles. This correction applies to Tables 1 and 2, as well as the text within our 3.2.2. *Explanatory and control variables* section. The authors note that

when controlling for population density (calculated as the number of persons per square mile), as opposed to land area in square miles, the results are consistent with those presented in the manuscript.

The authors would like to apologise for any inconvenience caused.
