## Erratum

In the publication of this article [1] it was brought to our attention that the last sentence on page 12 incorrectly states: “Legal gender recognition, in the context of this study, is a precondition for access to gender-confirming health care”. The correct sentence should read: “Gender-confirming health care, in the context of this study, is a precondition for access to legal gender recognition”.

This sentence has been updated in the original article.
