

**Editorial****Announcement of new Editorial Board members**

Haruki Nakamura

*Institute for Protein Research, Osaka University, Suita, Osaka 565-0871, Japan*

Received September 8, 2022; Accepted September 16, 2022;  
Released online in J-STAGE as advance publication September 21, 2022  
Edited by Tamiki Komatsuzaki

In this September 2022, the following four biophysicists join the Editorial Board of the Biophysics and Physicobiology (BPPB): Prof. Gautam Basu in Bose Institute, India, Prof. Raymond S. Norton in Monash University, Australia, Prof. Steve Pressé in Arizona State University, USA, and Prof. Jie Yan in National University of Singapore.

Prof. Basu works in the field of structural bioinformatics and biochemistry using both experimental and computational tools [1]. Prof. Norton is a specialist in studies of peptides and proteins from venomous organisms by a range of biophysical approaches, including NMR, SPR, ITC and X-ray crystallography [2]. Prof. Pressé is a data scientist in chemical and biological physics, performing experiments to understand bacterial hunting dynamics and developing theoretical models [3]. Prof. Yan studies molecular and cell biology by combining theoretical modeling and his own single-molecule biophysical methods, single-molecule manipulation and imaging [4].

At the same time, we invite Prof. Lee-Wei Yang in National Tsing-Hua University, Taiwan as one of the Associate Editors, together with the following three new Advisory Board members: Prof. Robert E. Campbell in both The University of Alberta, Canada and The University of Tokyo, Dr. Damien R. Hall in Kanazawa University, Japan, and Prof. Soichi Wakatsuki in Stanford University, USA.

We expect those fresh Editorial Board members, an Associate Editor, and Advisory Board members in various biophysics field will surely contribute to the BPPB very much, to publish many valuable articles and to provide novel biophysical information and knowledge to all over the world.
