(iScience 25, 104386; June 17, 2022)

In the originally published version of this article, in the section entitled “Generation of Nestin-CRE::Rnf216/Triad3 Mice,” the deleted exons have been mistakenly indicated as exons 3 to 4, instead of the correct exons 4 to 5. This has now been corrected in the article online. The authors apologize for any confusion this error may have caused.
