

CORRIGENDUM

In the article entitled “Hemodynamic variation is a dominant contributing factor of Graves' hyperthyroidism complication: Heart failure and fatal liver dysfunction, a case report and analysis”¹ which was previously published in Volume 10 Issue 2 of Clinical Case Reports, the corresponding author's name was misspelt. The correct name is Jianbin Su.

In addition, in the Case Presentation section, the following sentence was wrong.

“The serum-free FT3 and FT4 levels were normalized on the twelfth day of admission.”

It should read as follows:

“The FT3 and FT4 levels were normalized on the twelfth day of admission.”
