Correction to: Impact of the Covid-19 pandemic on primary care utilization: evidence from Sweden using national register data

Björn Ekman^{1*}, Eva Arvidsson^{2,3}, Hans Thulesius¹, Jens Wilkens¹ and Olof Cronberg¹

Correction to: BMC Research Notes (2021) 14:424

<https://doi.org/10.1186/s13104-021-05839-7>

Following the publication of the original article [1], the authors informed us that a typographical error had occurred during the final stages of processing: the thousand comma-separators in Table 1 had inadvertently been misplaced.

The correct table is included in this Correction as well as the original article, which has already been updated.

Table 1 Primary care consultations by type and year, selected regions

Consultation type	Year	
	2019 N %	2020 N %
Clinic visits	10,499,364 86.9	8,819,487 81.3
Telemedicine contacts	320,873 2.7	269,609 2.5
Home visits	159,844 1.3	171,380 1.6
Telephone/letter contacts	1,099,187 9.1	1,587,442 14.6
Total	12,079,268	10,847,918

Source: VTDB 2019 and 2020
