Medical scientists = Explorers, historiographers

**Panel 1:** Medical scientists try new things on the scientific basis. When asthma was not controlled with drugs,

**Panel 2:** smooth muscles were destroyed with heat. Medical scientists trying new things are like explorers.

**Panel 3:** They then record results based on fact. Among 4 patients who undergone this procedure, 2 patients were cured well,

**Panel 4:** 1 patient was cured less, 1 patient was not cured. Medical scientists recording based on fact are like historiographers.
