

CORRECTION

Correction: Expansion microscopy provides new insights into the cytoskeleton of malaria parasites including the conservation of a conoid

Eloïse Bertiaux, Aurélia C. Balestra, Lorène Bourronville, Vincent Louvel, Bohumil Maco, Dominique Soldati-Favre, Mathieu Brochet, Paul Guichard, Virginie Hamel

In the U-ExM resolves the hemis spindles and reveals a distinct organisation of subpellicular microtubules in *P. falciparum* and *P. berghei* schizonts subsection of the Results, two references are omitted from the fifth sentence of the second paragraph.

The correct sentence is: To ascertain that the observed structures corresponded to subpellicular microtubules, we labelled proteins of expanded parasites in bulk with N-hydroxysuccinimide (NHS) ester-dye conjugates, which bind to amines as previously described (M'Saad et al, 2020 and Mao C et al, 2020) (S4 Fig).
