

Introduction

Optimal approach for localised rectal cancer

CJA Punt *

Academic Medical Center, Amsterdam, The Netherlands

Rectal cancer remains one of the most challenging tumours in respect of local treatment. The many disciplines involved, the development of new insights and novel treatment strategies, and the close correlation between quality of care and outcome provides a fascinating scenario. In this educational session several of these aspects are discussed, and will

be of interest to surgeons, radiotherapists, medical oncologists, radiologists and pathologists.
