Journal of Public Health, doi: doi.org/10.1093/pubmed/fdab049.

In the originally published version of this manuscript, Figure 1 featured a misalignment of the data labels on the curve of weekly mean no. of contacts per case, and omitted the tabulated public health restrictions.

The graphical misalignment, and the tabulated public health restrictions included in the composite Figure 1, have now been corrected online.

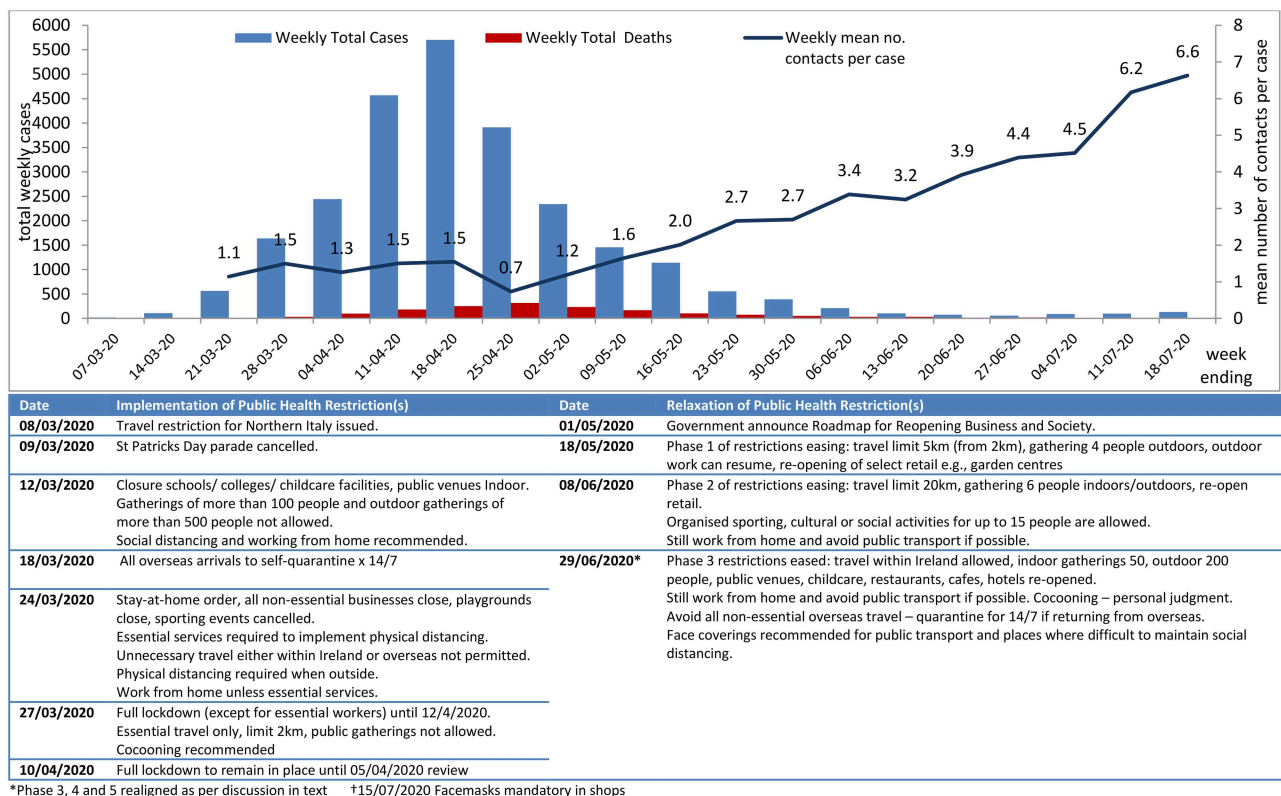

Figure 1: Epidemic curve of weekly total COVID-19 cases, deaths, mean number of contacts per case, and timeline of key public health restrictions implemented and relaxed from March to July 2020 in Ireland.
