Keywords: trauma; intimate partner violence; mental disturbance; torture; corrigendum

re-entry of the male survivor back into the family and broader community.

The references Pease & Flood, 2008 and Vichealth, 2014 were mistakenly added following the paragraph:

At a community-wide level, in the case of torture survivors, the focus should be on violence prevention by way of early identification and support for men at risk; provision of timely work, educational, and financial assistance; and programs aimed at harmonizing the
