The authors regret that there is a typo in the abstract, where a decimal point is missing.

The following sentence from the Abstract:

On a scale of – 3 to 3, mean scores indicated greater respondent concern about the risk of HIV transmission to partners during ATI (Time to rebound Mean: 0.4 and Fixed duration Mean: 11), compared to participant health risks from ATI (Time to Rebound Mean: -.9 and Fixed duration Mean: 0.0).

is restated as:

On a scale of – 3 to 3, mean scores indicated greater respondent concern about the risk of HIV transmission to partners during ATI (Time to rebound Mean: 0.4 and Fixed duration Mean: 1.1), compared to participant health risks from ATI (Time to Rebound Mean: -.9 and Fixed duration Mean: 0.0).

Fixed duration Mean is corrected from 11 to 1.1. As a typo, this does not affect the rest of the article nor our findings. This is restated herein, and the original article has been corrected and updated.

The authors would like to apologise for any inconvenience caused.
