Fig. S1. Identification of volatile organic compounds (VOCs) emitted by *Cladosporium halotolerans* NGPF1. (A) Analysis of VOCs derived from *C. halotolerans* NGPF1 was performed using an HS-GC/MS system. The numbers of the peaks indicate the individual chemical compounds identified during the analysis. (B) Identification of VOC structures emitted by *C. halotolerans* strain NGPF1 by HS-GC/MS.
