In the article titled “The Antiosteoporosis Effects of Yishen Bugu Ye Based on Its Regulation on the Differentiation of Osteoblast and Osteoclast” [1], the authors identified a mistake in Figure 1, where panel 2 of the liver samples was duplicated with panel 6. The authors confirm that this does not affect the results and conclusions of the article, and the corrected Figure 1 is as follows:

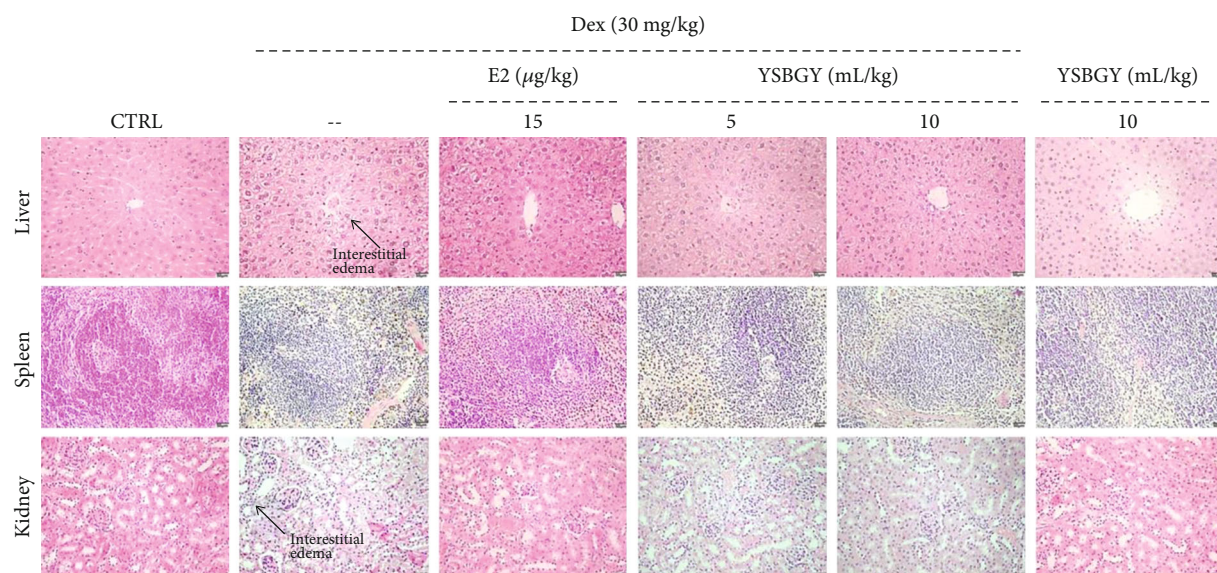

FIGURE 1: Effects of YSBGY on the structures of the liver, spleen, and kidney of OP mice visualized by H&E staining ($n = 6$; 200x, scale bar: 50 μm).
