

CORRECTION

Correction: Bone Cells in Birds Show Exceptional Surface Area, a Characteristic Tracing Back to Saurischian Dinosaurs of the Late Triassic

John M. Rensberger, Ricardo N. Martínez

There is an error in [Fig 3](#), “Total lengths of canaliculi per sample.” Please see the corrected [Fig 3](#) and its legend here.

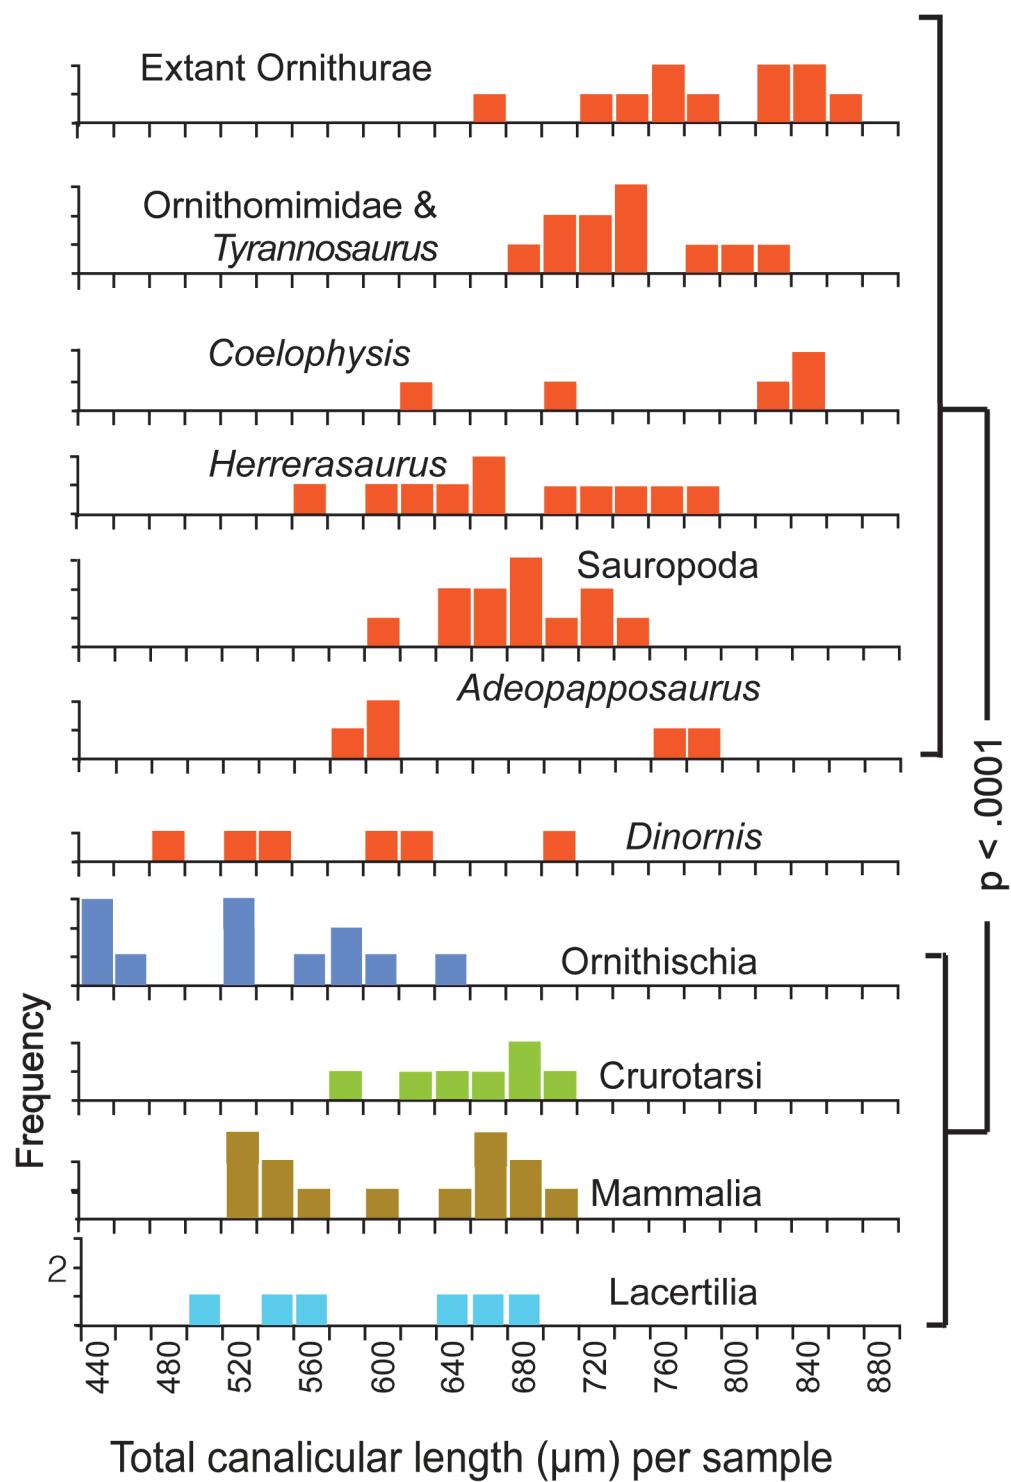

Fig 3. Total lengths of canaliculi per sample. Total lengths of canaliculi per sample. Each sample is 2025 μm^2 in area; null probabilities were calculated with Fisher's Exact test; red frequency distributions identify Saurischia in this and subsequent figures. Original measurements for Figs 3, 4 and 5 are listed in [S1 Table](#).
