

A Systematic Approach to Incision Planning and Graft Excision in Gender-affirming Vaginoplasty: Erratum

The article “A Systematic Approach to Incision Planning and Graft Excision in Gender-affirming Vaginoplasty,” published as e4103 in *Plastic and Reconstructive Surgery Global Open* on February 15, 2022, was published with an error in the data. On page 2 in the Methods section, in the sentence, “In our experience, patients with DPS more than 8cm tend to have insufficient penoscrotal skin flap surface area to reliably cover the area around the

introitus,” this should be instead be “patients with DPS **less** than 8 cm....”

This how now been corrected on the website.
