I. Guber Department of Ophthalmology, University of Geneva, Geneva, Switzerland Posture on Macular Slippage after Macula-Off Retinal Detachment: A Randomized Controlled Trial" [1]. The authors of the letter highlighted this study's similarity to another paper published by the same author group in the journal *Ophthalmology Retina* "How to Prevent Retinal Shift after Rhegmatogenous Retinal Detachment Repair" [2].

Following this, the reader's letter [3] and author's response and clarification [3] have been published in *Ophthalmology Retina*. The letter and response clarify the distinction between the two studies, which were based on the same patient group. In order to avoid duplicating the letter and response in *Ophthalmology and Therapy*, links are provided below:

Reader's letter: https://doi.org/10.1016/j. oret.2020.01.020

Author's response: https://doi.org/10.1016/ j.oret.2020.01.021

Retrospective permission was also obtained from Elsevier for re-use of Tables 1 and 2 in the *Ophthalmology and Therapy* publication. These are labelled as Tables 1 and 2 in both publications. The following credit is attributed to both:
