[Fig 2](#) incorrectly appears as a duplicate of Fig 3. The authors have provided a corrected version here.

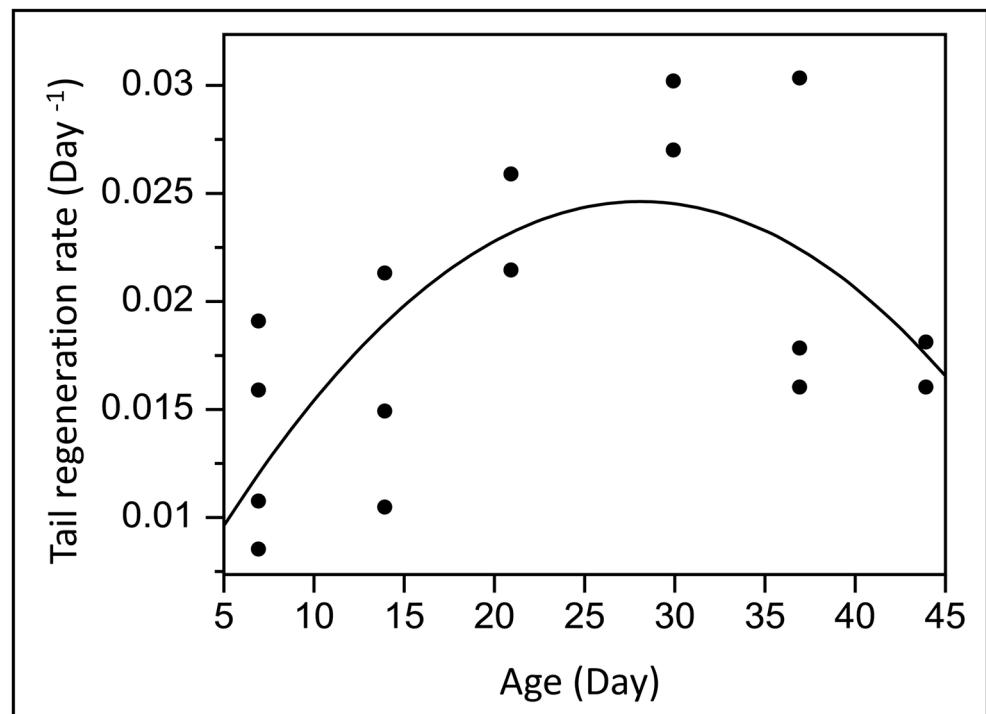

Fig 2. Tail regeneration rate per day of *Salamandra infraimmaculata* larvae versus larval age (day) at the time of tail clipping ($N = 16$). A polynomial 2nd degree curve explained 48.3% of the variation in the data ($F_{2, 13} = 6.07, p = 0.014$).
