(Cell Genomics 4, 100469; January 10, 2024)

In the version initially published online of our article, Table S8 contained incorrect data. In addition, a citation to Table S3 was made incorrectly and Table S18 was missing. To address these issues, we have updated Table S8 with the correct data, added a new Table S18, and corrected any citations to these tables. The paper has now been corrected online. The authors apologize for the errors.
