We thank Dr. Pradeep Kumar Panigrahi for his comment on our article “Thinner temporal peripapillary retinal nerve fibre layer in Stargardt disease detected by optical coherence tomography” [1] and for his valuable suggestions. We agree that the study design is better described by “cross-sectional, monocentric, observational study”. Regarding the influence of possible systemic medication, we can confirm that none of the included patients was taking systemic medications associated with peripapillary retinal nerve fibre layer thinning.

Acknowledgements Michael Reich is a recipient of a scholarship from the “Dr. Gabriele Lederle-Stiftung” and thanks this organization for their support.
