This supplemental material has been provided by the authors to give readers additional information about their work.

eTable 1. List of laboratory methods across the province of Alberta

Test	Manufacturer	Method
Creatinine	Roche Cobas, QuidelOrtho Vitros	Enzymatic
	Siemens Vista and EXL, Beckman DxC, Siemens Atellica	Jaffe (alkaline picrate)
Total Calcium	Roche Cobas	Colorimetric (NM-BAPTA)
	Beckman DxC	Indirect Potentiometric Electrode
	QuidelOrtho Vitros	Colorimetric (Arsenazo III)
	Siemens Vista, EXL, and Atellica	Colorimetric (o-Cresolphthalein Complexone)
Albumin	Beckman DxC, Siemens Atellica, EXL and Vista, Roche Cobas	Colorimetric (Bromocresol Purple)
	QuidelOrtho Vitros	Colorimetric (Bromocresol Green)
pH	Werfen GEM premier, Abbott iSTAT, Radiometer ABL	Direct Potentiometric Electrode
Ionized Calcium	Werfen GEM premier, Abbott iSTAT, Radiometer ABL	Direct Potentiometric Electrode

eTable 2. Adjustment formulas for calcium

Formulas		Variables required (SI units)
Total calcium		Total calcium (mmol/L)
Payne ⁶	total calcium (mg/100mL) ^a – albumin (g/100mL) ^b + 4	Total calcium (mmol/L) Albumin (g/L)
Simplified ⁷	total calcium (mmol/L) + 0.02 [40 – albumin (g/L)]	Total calcium(mmol/L) Albumin(g/L)
Orrell ⁴⁶	total calcium (mmol/L) +0.0177 [34 – albumin (g/L)]	Total calcium (mmol/L) Albumin (g/L)
Berry ⁴⁷	total calcium (mmol/L) +0.0225 [46 – albumin (g/L)]	Total calcium(mmol/L) Albumin (g/L)
Thode ⁴⁸	total calcium (mmol/L) x [2.7 / (1.7 + (albumin (g/L) / 42 (g/L))]	Total calcium (mmol/L) Albumin (g/L)
James ³⁷	total Ca (mmol/L) +0.012 [39.9 – albumin (g/L)]	Total calcium Albumin (g/L)
Antonio (A) ³⁸	0.815 x total calcium ^{0.5} (mmol/L)	Total calcium (mmol/L)
Antonio (B) ³⁸	0.826 x total calcium ^{0.5} (mmol/L) – 0.023 x renal function (RF) where RF is: • normal function (eGFR > 60 ml/min/1.73m ²) = 0 • moderate dysfunction (eGFR 30-59 ml/min/1.73m ²) =1 • severe dysfunction (eGFR<30 ml/min/1.73m ²) = 2	Total calcium (mmol/L) eGFR (ml/min/1.73m ²)
Antonio (C) ³⁸	0.813 x total calcium ^{0.5} (mmol/L) – 0.006 x Alb ^{0.75} (g/L) + 0.079	Total calcium(mmol/L) Albumin(g/L)
Pekar ⁸	2.567 – 2.045e -3[albumin (g/L)] – 5.601e - 4 [creatinine (mg/L) ^c] +0.4493[total calcium (mmol/L)] – 0.307[pH]	Total calcium(mmol/L) Albumin(g/L) creatinine (mg/L) pH

eTable 3. Correlation between ionized calcium and other adjusted calcium formulas

Adjusted formula	N	R ² (95% CI)
Total calcium	22 658	71.7% (71.1, 72.2)*
Payne	10 659	60.3% (59.3, 61.3)*
Simplified	10 659	68.9% (68.0, 69.6)*
Orrell	10 659	72.0% (71.3, 72.7)*
Berry	10 659	64.8% (63.9, 65.7)*
Thode	10 659	65.8% (65.0, 66.7)*
James	10 659	76.7% (76.1, 77.3)*
Antonio (A)	22 658	70.4% (69.9, 70.9)*
Antonio (B)	17 157	66.7% (66.0, 67.3)*
Antonio (C)	10 659	76.1% (75.5, 76.7)*
Pekar	8228	74.1% (73.3, 74.8)*

* $p \leq 0.05$ for the overall R² correlation

eTable 4. Correlation between ionized calcium and other adjusted calcium formulas

Adjusted formula	Albumin <30 g/L		Albumin 30-50 g/L	
	N	R ² (95% CI)	N	R ² (95% CI)
Total calcium	3617	74.3% (73.1, 75.4)*	7017	75.2% (74.4, 76.0)*
Payne	3617	70.6% (69.3, 71.9)*	7017	70.9% (70.0, 71.9)*
Simplified	3617	73.3% (72.0, 74.4)*	7017	74.1% (73.3, 74.9)*
Orrell	3617	74.2% (73.0, 75.3)*	7017	75.2% (74.4, 76.0)*
Berry	3617	72.1% (70.8, 73.3)*	7017	72.7% (71.8, 73.5)*
Thode	3617	72.1% (70.8, 73.3)*	7017	73.3% (72.4, 74.1)*
James	3617	75.5% (74.3, 76.5)*	7017	76.9% (76.1, 77.6)*
Antonio (A)	3617	72.7% (71.4, 73.9)*	7017	74.4% (73.5, 75.2)*
Antonio (B)	3202	72.2% (70.8, 73.5)*	5691	69.6% (68.5, 70.6)*
Antonio (C)	3617	74.2% (73.0, 75.3)*	7017	76.3% (75.5, 77.0)*
Pekar	2798	72.7% (71.3, 74.0)*	5410	76.0% (75.0, 76.8)*

* $p \leq 0.05$ for the overall R² correlation

eTable 5. Classification of calcium status by total calcium and ionized calcium among patients with albumin <30 g/L

Classification by corrected calcium using Payne formula, n (% of total)	Classification by ionized calcium, n (% of total)			
	Hypocalcemia	Normocalcemia	Hypercalcemia	Total
Hypocalcemia	174 (4.8%)	≤10 (≤0.3%)	0 (0.0%)	174 (4.8%)
Normocalcemia	1634 (45.2%)	909 (25.1%)	≤10 (≤0.3%)	2543 (70.3%)
Hypercalcemia	128 (3.5%)	499 (13.8%)	267 (7.4%)	894 (24.7%)
Total	1936 (53.5%)	1408 (38.9%)	267 (7.4%)	3617 (100%)
Observed agreement	1350 (37.3%)			
Classification by corrected calcium using simplified formula, n (% of total)	Classification by ionized calcium			
	Hypocalcemia	Normocalcemia	Hypercalcemia	Total
Hypocalcemia	286 (7.9%)	≤10 (≤0.3%)	0 (0.0%)	286 (7.9%)
Normocalcemia	1606 (44.4%)	1161 (32.1%)	≤10 (≤0.3%)	2767 (76.5%)
Hypercalcemia	44 (1.2%)	245 (6.8%)	263 (7.3%)	552 (15.3%)
Total	1936 (53.5%)	1406 (38.9%)	263 (7.3%)	3617 (100%)
Observed agreement	1710 (47.3%)			
Classification by total calcium, n (% of total)	Classification by ionized calcium			
	Hypocalcemia	Normocalcemia	Hypercalcemia	Total
Hypocalcemia	1587 (43.9%)	465 (12.9%)	≤10 (≤0.3%)	2052 (56.7%)
Normocalcemia	347 (9.6%)	936 (25.9%)	110 (3.0%)	1393 (38.5%)
Hypercalcemia	≤10 (≤0.3%)	≤10 (≤0.3%)	161 (4.5%)	161 (4.5%)
Total	1934 (53.4%)	1401 (38.7%)	271 (7.5%)	3617 (100%)
Observed agreement	2684 (74.2%)			

eTable 6. Classification of calcium status by total calcium and ionized calcium among patients with albumin between 30 and 50 g/L

Classification by corrected calcium using Payne formula, n (% of total)	Classification by ionized calcium, n (% of total)			
	Hypocalcemia	Normocalcemia	Hypercalcemia	Total
Hypocalcemia	356 (5.1%)	39 (0.6%)	0 (0.0%)	395 (5.6%)
Normocalcemia	1598 (22.8%)	3825 (54.5%)	183 (2.6%)	5606 (79.9%)
Hypercalcemia	≤10 (≤0.1%)	300 (4.3%)	711 (10.1%)	1011 (14.4%)
Total	1954 (27.8%)	4164 (59.3%)	894 (12.7%)	7017 (100%)
Observed agreement	4892 (69.7%)			
Classification by corrected calcium using simplified formula, n (% of total)	Classification by ionized calcium			
	Hypocalcemia	Normocalcemia	Hypercalcemia	Total
Hypocalcemia	389 (5.5%)	26 (0.4%)	0 (0.0%)	415 (5.9%)
