

CORRECTION

Correction: Intraspecies Variability Affects Heterotypic Biofilms of *Porphyromonas gingivalis* and *Prevotella intermedia*: Evidences of Strain-Dependence Biofilm Modulation by Physical Contact and by Released Soluble Factors

Graziela Murta Barbosa, Andrea Vieira Colombo, Paulo Henrique Rodrigues, Maria Regina Lorenzetti Simionato

The image for [Fig 3](#) is missing [Fig 3B and 3C](#). Please see the corrected [Fig 3](#) here.

[Table 1](#) has been corrected for improved readability. Please see the corrected [Table 1](#) here.

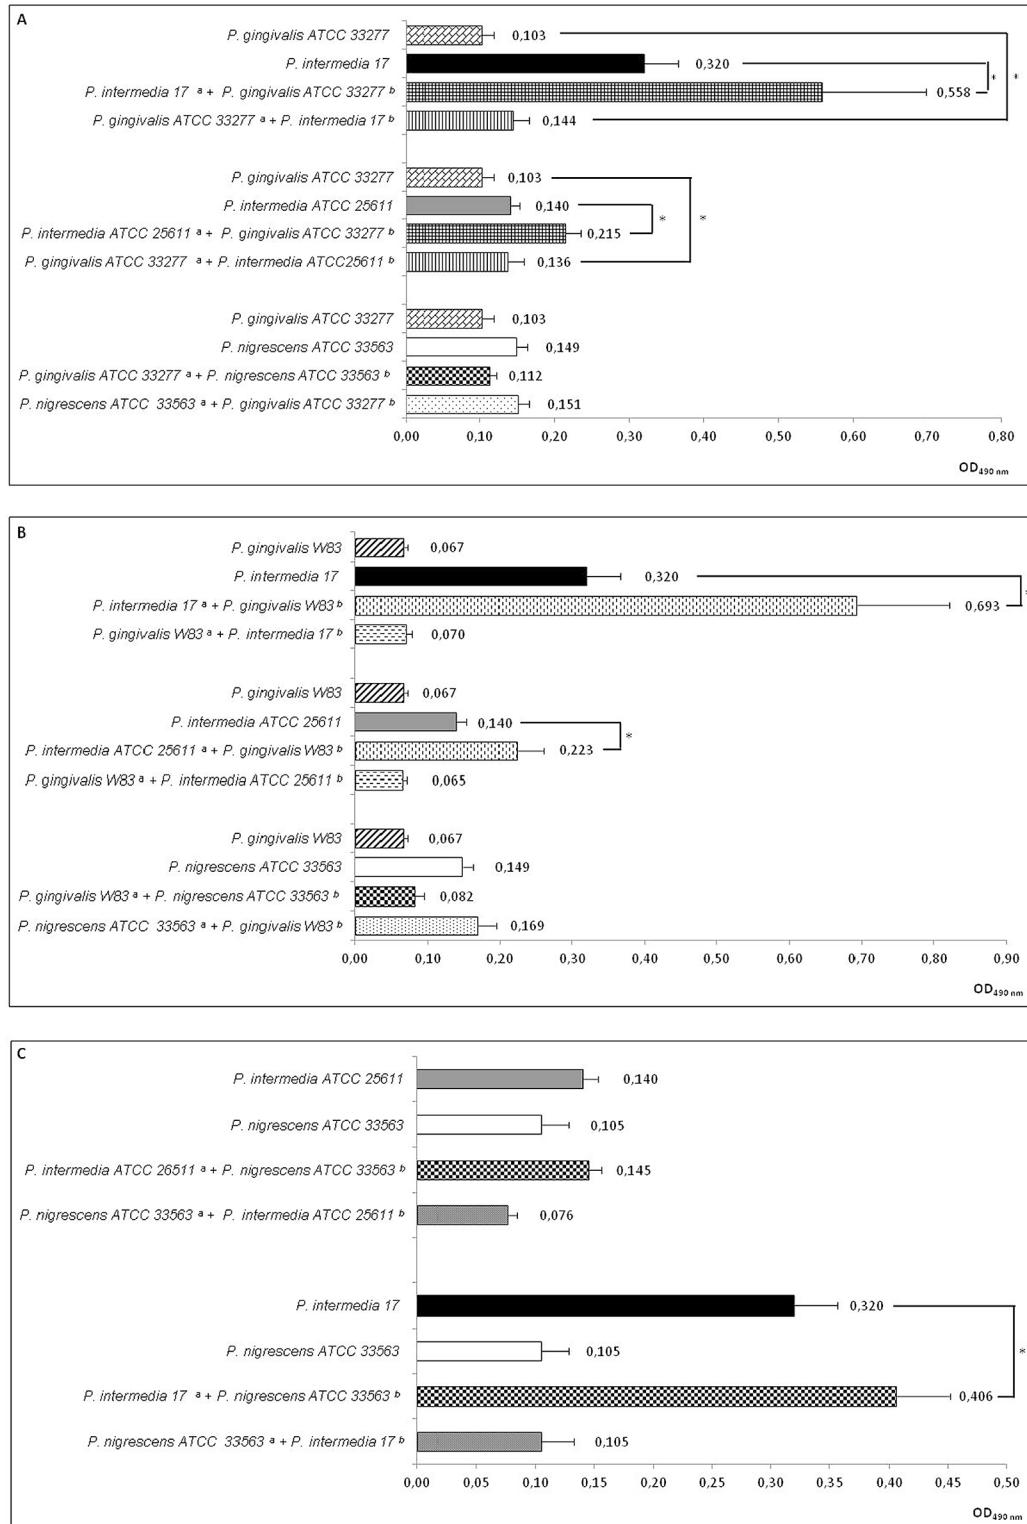

Fig 3. Effect of co-culture of Porphyromonas gingivalis, Prevotella intermedia and Prevotella nigrescens on biofilm formation in a two-compartment co-culture system. Panel A: *P. gingivalis* ATCC33277 and co-culture partners *P. intermedia* strains 17 and ATCC25611, and *P. nigrescens* ATCC33563. **Panel B:** *P. gingivalis* W83 and co-culture partners *P. intermedia* strains 17 and ATCC25611 and co-culture partner *P. nigrescens* ATCC33563 Values represent average of 3 experiments (Kruskal-Wallis test followed by nonparametric post-tests, *p < 0.01). **a** denotes strain in the lower compartment (biomass measured) and **b** denotes strain in the upper compartment.
