We would like to submit the correction to our published paper [1]. The reason for the correction is an error in the histological image presented in the published article. Two histological images (Figure 3A,B in [1]) are incorrect and, therefore, they need to be replaced with the correct new figure (Figure 1).

Figure 1. Representative morphological images of the pancreas observed in control rats treated with saline (A); rats pretreated with acenocoumarol at the dose of 50 µg/kg/day without induction of acute pancreatitis (B); rats with cerulein-induced acute pancreatitis (C); rats pretreated with acenocoumarol (given the dose of 50 µg/kg/day) before induction of acute pancreatitis by cerulein (D). Hematoxylin-eosin counterstain, original magnification 200×.

The reported error does not have any material impact on the final results and conclusions of our published paper. We apologize for this inconvenient situation.

Conflicts of Interest: The authors declare no conflict of interest.
