**Table S1**Post-Hoc Comparisons of HbO in Right ROI

| Time Bin | Raw Time | <i>t</i> -Value | <i>p</i> -Value |
|----------|----------|-----------------|-----------------|
| 1        | 0-3 s    | 2.20            | .03             |
| 2        | 3-6 s    | 2.34            | .03             |
| 3        | 6-9 s    | 2.45            | .02             |
| 4        | 9-12 s   | 2.13            | .04             |
| 5        | 12-15 S  | 2.14            | .04             |
| 6        | 15-18s   | 2.26            | .01             |

*Note*. Significant (p < .05) comparisons are

presented in bold font.

**Table S2**Post-Hoc Comparisons of HbO in Left ROI

| Time Bin | Raw Time | <i>t</i> -Value | <i>p</i> -Value |  |
|----------|----------|-----------------|-----------------|--|
| 1        | 0-3 s    | 0.03            | .97             |  |
| 2        | 3-6 s    | 1.14            | .26             |  |
| 3        | 6-9 s    | 1.61            | .11             |  |
| 4        | 9-12 s   | 1.66            | .10             |  |
| 5        | 12-15 s  | 2.04            | .05             |  |
| 6        | 15-18s   | 1.93            | .06             |  |

*Note*. Significant (p < .05) comparisons are

presented in bold font.

**Table S3**Linear Regression Results on the Differential Activation in the Left ROI

| Variable        | Estimate | SE     | 95% CI            | t-Value | p-Value |
|-----------------|----------|--------|-------------------|---------|---------|
| Intercept       | 0.2885   | 0.6622 | [-1.0520, 1.6290] | 0.44    | .67     |
| Affective Touch | -0.0018  | 0.0077 | [-0.0173, 0.0185] | -0.23   | .82     |
| All Touch       | -0.0003  | 0.0023 | [-0.0049, 0.0042] | -0.14   | .89     |
| Contingency     | -0.1379  | 0.2503 | [-0.6447, 0.3688] | -0.55   | .59     |
| Sensitivity     | -0.0649  | 0.0548 | [-0.1759, 0.0461] | -1.18   | .24     |
| Age             | 0.0001   | 0.0036 | [-0.0072, 0.0075] | -0.04   | .97     |

**Table S4**Linear Regression Results on the Activation to the Non-Contingent Condition in the Right ROI

| Variable        | Estimate | SE     | 95% CI             | t-Value       | p-Value |
|-----------------|----------|--------|--------------------|---------------|---------|
| Intercept       | 1.8378   | 0.8406 | [0.1313, 3.5443]   | 2.19          | .04     |
| Affective Touch | 0.0094   | 0.0094 | [-0.0096, 0.0285]  | 1.01          | .32     |
| All Touch       | -0.0068  | 0.0027 | [-0.0125, -0.0012] | <b>-2.4</b> 7 | .02     |
| Contingency     | 0.0496   | 0.3031 | [-0.5658, 0.6649]  | 0.16          | .87     |
| Sensitivity     | -0.1411  | 0.0663 | [-0.2757, -0.066]  | -2.13         | .04     |
| Age             | -0.0037  | 0.0045 | [-0.0130, 0.0055]  | -0.83         | .42     |

**Table S5**Linear Regression Results on the Activation to the Contingent Condition in the Right ROI

| Variable        | Estimate | SE     | 95% CI            | t-Value | p-Value |
|-----------------|----------|--------|-------------------|---------|---------|
| Intercept       | -0.2863  | 0.3974 | [-1.0932, 0.5205] | -0.72   | .48     |
| Affective Touch | 0.0046   | 0.0044 | [-0.0044, 0.0136] | 1.04    | .31     |
| All Touch       | -0.0007  | 0.0013 | [-0.0033, 0.0020] | -0.51   | .61     |
| Contingency     | -0.0802  | 0.1433 | [-0.3711, 0.2107] | -0.56   | .58     |
| Sensitivity     | -0.0029  | 0.0313 | [-0.0665, 0.0607] | -0.09   | .93     |
| Age             | 0.0014   | 0.0021 | [-0.0030, 0.0057] | 0.65    | .52     |

#### **Additional Analysis**

We analyzed looking times in the fNIRS task. For this, we calculated the percent of time the infant looked at the screen for each trial, and compared mean looking times with a paired t-test. On average, infants looked at the screen for 73.15% (SD = 18.75) of time in the contingent condition and for 73.16% (SD = 18.86) of time in the non-contingent condition. These looking times were not significantly different from each other (t(81) = 0.006, p = .99). Correlations between average looking times and the respective average fNIRS activation in each condition are reported in Table S6.

Table S6Correlations between fNIRS Signal and Looking Times

|                               |       |                    | Average Looking Time per Condition (%) |            |            |
|-------------------------------|-------|--------------------|--|------------|------------|
|                               | ROI   | Condition          | Non-<br>Contingent                     | Contingent | Difference |
| fNIRS<br>Activation<br>(μMol) |       | Non-<br>Contingent | -0.21                                  |            |            |
|                               | Left  | Contingent         |  | -0.08      |            |
|                               |       | Difference         |  |            | 0.39**     |
|                               |       | Non-<br>Contingent | -0.37**                                |            |            |
|                               | Right | Contingent         |  | 0.09       |            |
|                               |       | Difference         |  |            | -0.03      |
