Correction: Activity of the Human Rhinovirus 3C Protease Studied in Various Buffers, Additives and Detergents Solutions for Recombinant Protein Production

Raheem Ullah, Majid Ali Shah, Soba Tufail, Fouzia Ismat, Muhammad Imran, Mazhar Iqbal, Osman Mirza, Moazur Rahman

The eighth author's name is incorrectly spelled. The correct name is: Moazur Rahman.

The footnote for Table 3 appears incorrectly in the Results and Discussion section. Please see the correct [Table 3](#) and footnote here.

49	LDAO	2 mM	++

The extent to which the HRV 3C protease has cleaved His8-MBP-HRV 3C-domain in presence of various detergents at their critical micelle concentration is shown in Fig 3 and represented as follows '+++' for cleavage ~ 80 to 100%, '++' for ~ 50% and '+' for <50%, '0' for almost no cleavage at all compared to control. Critical micelle concentration of detergents was taken from http://www.sigmapelab.com/content/dam/sigma-aldrich/docs/Sigma/Instructions/detergent_selection_table
