## Correction to: *BMC Psychiatry* 14, 319 (2014)

<https://doi.org/10.1186/s12888-014-0319-3>

Following publication of the original article [1], the authors identified errors in the numbers of the below sentences. The updated numbers are given below and the changes have been highlighted in **bold typeface**.

The sentences currently read:

In format A (GST-A), two-year GST consists of 124 groups sessions with a duration of 90 minutes.

In addition, in GST-A a total of up to 18 individual sessions can be used at the patients discretion or in times of crisis.

In total, patients in this condition receive 74 group sessions and 62 individual sessions.

The sentences should read:

In format A (GST-A), two-year GST consists of **118** groups sessions with a duration of 90 minutes.

In addition, in GST-A a total of up to **17** individual sessions can be used at the patients discretion or in times of crisis.

In total, patients in this condition receive **63** group sessions and **61** individual sessions.

The original article [1] has been corrected.

**Ready to submit your research? Choose BMC and benefit from:**

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

**At BMC, research is always in progress.**
