(Molecular Therapy: Nucleic Acids 19, 1164–1175; March 2020)

This article has been retracted at the request of the editor-in-chief. The corresponding author (H.X.) contacted the editorial office requesting a correction for image duplication between Figures 4J and 7B. Image analysis conducted by the editorial office confirmed the finding of image duplication. The editors reached out to the authors to request the original data. Per journal policy, the editors, at their discretion, may request deposition of any or all original data files for examination by the reviewers and/or editors. As a result of the authors' failure to provide these data within 30 days—in violation of journal policy—the editors feel that the findings of the manuscript cannot be relied upon. The co-corresponding author (K.W.) responded agreeing to this retraction.
