Performance of the EUCAST disc diffusion method and two MIC methods in detection of Enterobacteriaceae with reduced susceptibility to meropenem: the NordicAST CPE study

Björg Haldorsen, Christian G. Giske, Dennis S. Hansen, Kristjan Orri Helgason, Gunnar Kahlmeter, Iren H. Löhr, Erika Matuschek, Monica Österblad, Kaisu Rantakokko-Jalava, Mikala Wang, Lars Småbrekke, Ørjan Samuelson and Arnfinn Sundsfjord on behalf of the NordicAST CPE Study Group

J Antimicrob Chemother 2018; **73**: 2738–47

In the original published version of this article, the first column of Table 2 contained an error. The text ‘Class D (OXA-48-like) ($n=6$)’ was repeated when the second instance should have read ‘CPE-negative ($n=8$)’. The error has now been corrected.

OUP apologizes for the error.
