

OPEN **Author Correction: Long-term stress levels are synchronized in dogs and their owners**

Ann-Sofie Sundman, Enya Van Poucke¹, Ann-Charlotte Svensson Holm, Åshild Faresjö, Elvar Theodorsson, Per Jensen & Lina S. V. Roth²

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-019-43851-x>, published online 06 June 2019

This Article contains errors.

In the Results section,

“On winter dog HCC there was an effect of breed (Fig. 3; $\chi^2=6.451$, $P=0.011$), and Shetland sheepdogs had a higher HCC than border collies (12.905 ± 1.417 vs. 12.069 ± 1.203 ; mean \pm SEM).”

should read:

“On winter dog HCC there was an effect of breed (Fig. 3; $\chi^2=6.451$, $P=0.011$), and Shetland sheepdogs had a higher HCC than border collies (14.185 ± 1.877 vs. 12.069 ± 1.203 ; mean \pm SEM).”

Additionally, in Figure 2B, the trend line colours are incorrect and should be reversed. The correct Figure 2 appears below as Figure 1.

Published online: 08 October 2020

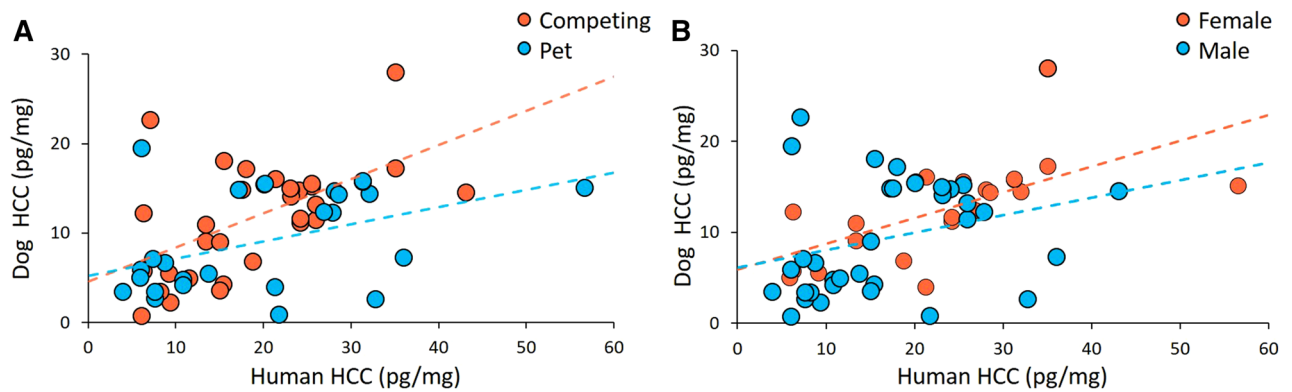

Figure 1. The hair cortisol concentration (HCC) synchronization of dogs and their owners was moderated by lifestyle (**A** competing dogs red, pet dogs blue) and sex of the dog (**B** females red, males blue). Dotted lines show linear fitted lines for lifestyle and sex of the dog.
