and John M. Wilkinson¹

Reply from the Authors

Thank you for this letter and short article: “Obesity: A Complex Process Requiring Reframing” which extended upon our review¹ to describe upstream determinants of the obesity epidemic. We agree that stigmatization or victimization by care providers is counterproductive and that tackling the obesity epidemic requires both public health and social interventions.

Acknowledgments

The authors would like to thank Dr Tom D. Thacher, Mayo Clinic Department of Family Medicine Research Chair, for support of our work.

Declaration of Conflicting Interests

The author(s) declared no potential conflicts of interest with respect to the research, authorship, and/or publication of this article.

Funding

The author(s) received no financial support for the research, authorship, and/or publication of this article.
