

Figure S1. Forest plot of the causal effect of SARS-CoV-2 infection on HER2-positive breast cancer.

Figure S2. Funnel plot of the causal effect of SARS-CoV-2 infection on HER2-positive breast cancer.

Figure S3. Scatter plots for the causal effect of SARS-CoV-2 infection on HER2-positive breast cancer.

Figure S4. Leave-one-out analysis for the causal effect of SARS-CoV-2 infection on HER2-positive breast cancer.

Figure S5. Forest plot of the causal effect of hospitalized COVID-19 on HER2-positive breast cancer.

Figure S6. Funnel plot of the causal effect of hospitalized COVID-19 on HER2-positive breast cancer.

Figure S7. Scatter plots for the causal effect of hospitalized COVID-19 on HER2-positive breast cancer.

Figure S8. Leave-one-out analysis for the causal effect of hospitalized COVID-19 on HER2-positive breast cancer.

Figure S9. Forest plot of the causal effect of critically ill COVID-19 on HER2-positive breast cancer.

Figure S10. Funnel plot of the causal effect of critically ill COVID-19 on HER2-positive breast cancer.

Figure S11. Scatter plots for the causal effect of critically ill COVID-19 on HER2-positive breast cancer.

Figure S12. Leave-one-out analysis for the causal effect of critically ill COVID-19 on HER2-positive breast cancer.
