► This corrects the article "Urological Problems in Patients with Menkes Disease" in volume 34, number 1, e4.

To the Editor:

The authors regret that there was an important error in the results in **Table 1**; the *ATP7A* mutations detected in Patients 2 and 14 were incorrectly noted.

The corrected notation of the mutations is as follows:

- 1) The c.1303delA (p.A434Qfs\*2) mutation detected in Patient 2 should be changed to c.1303delA (p.Ile435").
- 2) Patient 14 had a previously known mutation, i.e., c.3257delA (p.His1086Profs\*3); c.4048G>A (p.E1350K) is a common single nucleotide polymorphism detected together with the mutation.

Accordingly, corrections in the main text are needed as follows:

- 1) In the first paragraph of "Mutational analyses of the *ATP7A* gene" on page 3, "2 missense mutations," "2 frame-shifting short deletions," and "Seven mutations were novel" should be changed to "1 missense mutation," "3 frame-shifting short deletions nonsense mutations," and "Six mutations were novel."
- 2) The last sentence in the first paragraph of the "Discussion" section, "Patient 14 in our study had a missense mutation in *ATP7A*," should be changed to "Patient 14 in our study had a frame-shifting short deletion mutation in *ATP7A*."
