The authors would like to issue a correction to our manuscript titled “Rapid Deployment of Inpatient Telemedicine In Response to COVID-19 Across Three Health Systems”. Despite how common it has been to use the terms “master” and “slave” to describe

the configuration of hardware, we should have used more culturally appropriate descriptors. We wish to foster a more inclusive scientific community, and thus these terms in Table 1 and the section titled “Implementation of inpatient telemedicine at Stanford Health Care” have been updated to read “hub” and “spoke” instead.
