Title:

Individualized Portal Pressure Gradient Threshold Based on Liver Function Categories in Preventing Rebleeding After TIPS

Journal name:

Hepatology International

Authors:

Yifu Xia^{1, #}, Jun Tie^{2, #}, Guangchuan Wang^{3, 4, #}, Yuzheng Zhuge⁵, Hao Wu⁶, Hui Xue⁷, Jiao Xu², Feng Zhang⁵, Lianhui Zhao^{1, 3}, Guangjun Huang³, Mingyan Zhang³, Bo Wei⁶, Peijie Li⁷, Wei Wu⁸, Chao Chen⁸, Chengwei Tang⁶, Chunqing Zhang^{1, 3}

Yifu Xia, Jun Tie and Guangchuan Wang have contributed equally as first authors.

Supplementary Figure 1 Flow chart

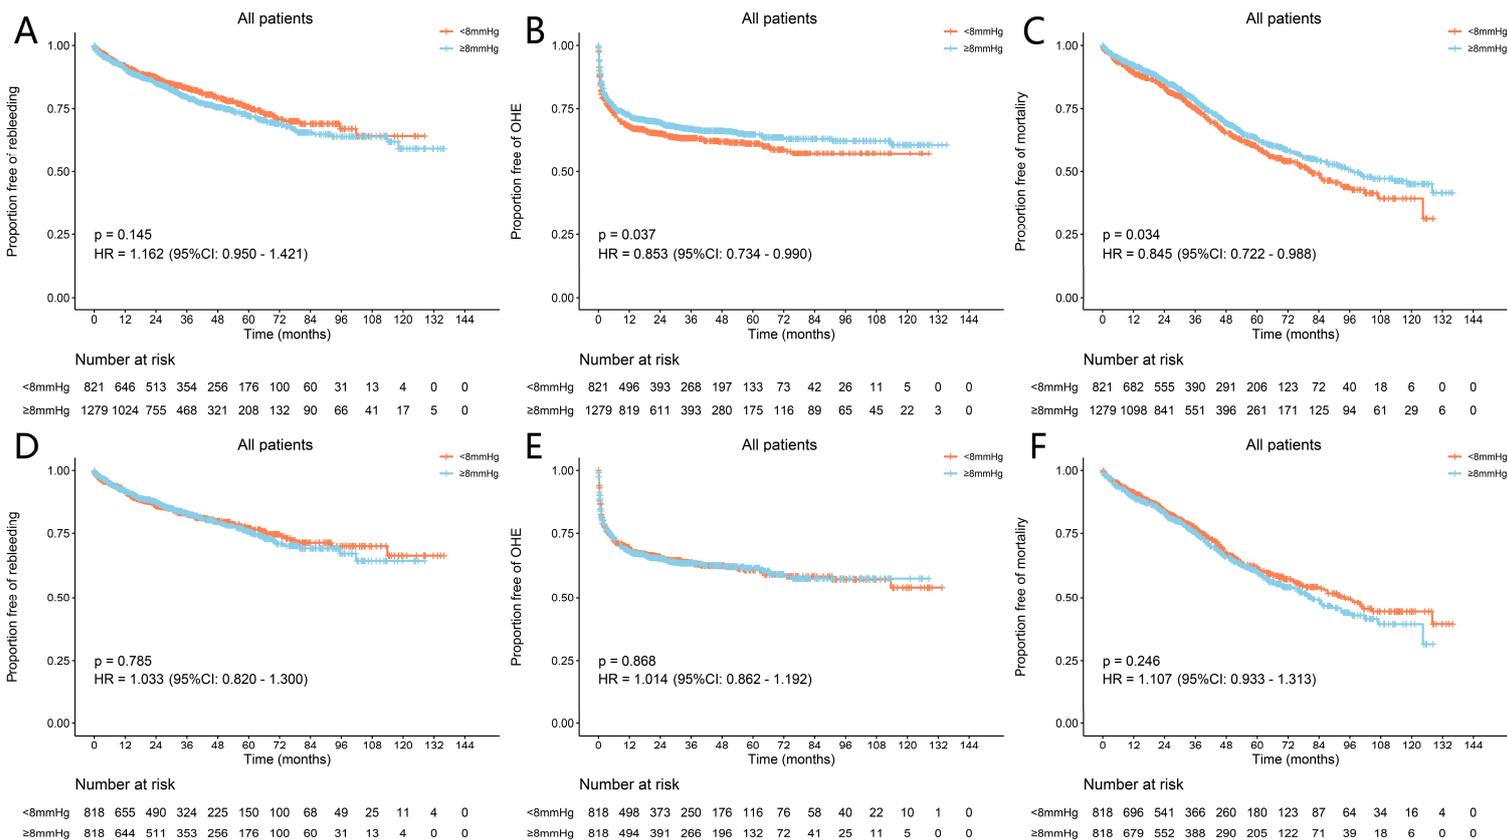

Supplementary Figure 2 Proportion free of OHE and mortality in all patients with 12mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of OHE in all patients with 12mmHg threshold before PSM.
- (B) Proportion free of OHE in all patients with 12mmHg threshold after PSM.
- (C) Proportion free of mortality of all patients with 12mmHg threshold before PSM.
- (D) Proportion free of mortality of all patients with 12mmHg threshold after PSM.

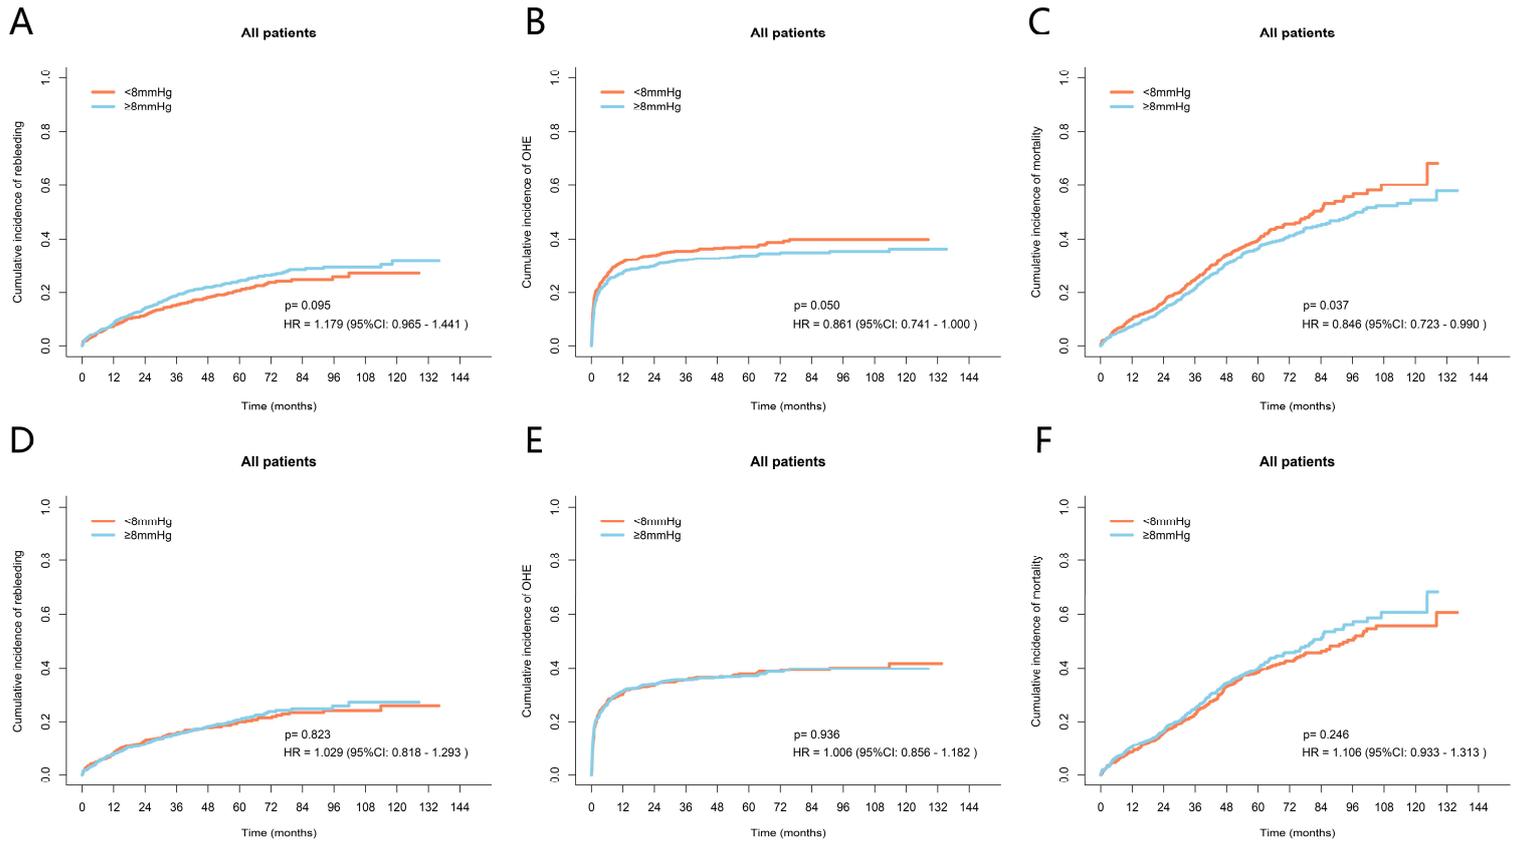

Supplementary Figure 3 Cumulative incidence of outcomes in all patients with 12mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in all patients with 12mmHg threshold before PSM. (B) Cumulative incidence of OHE in all patients with 12mmHg threshold before PSM. (C) Cumulative incidence of mortality of all patients with 12mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in all patients with 12mmHg threshold after PSM. (E) Cumulative incidence of OHE in all patients with 12mmHg threshold after PSM. (F) Cumulative incidence of mortality of all patients with 12mmHg threshold after PSM.

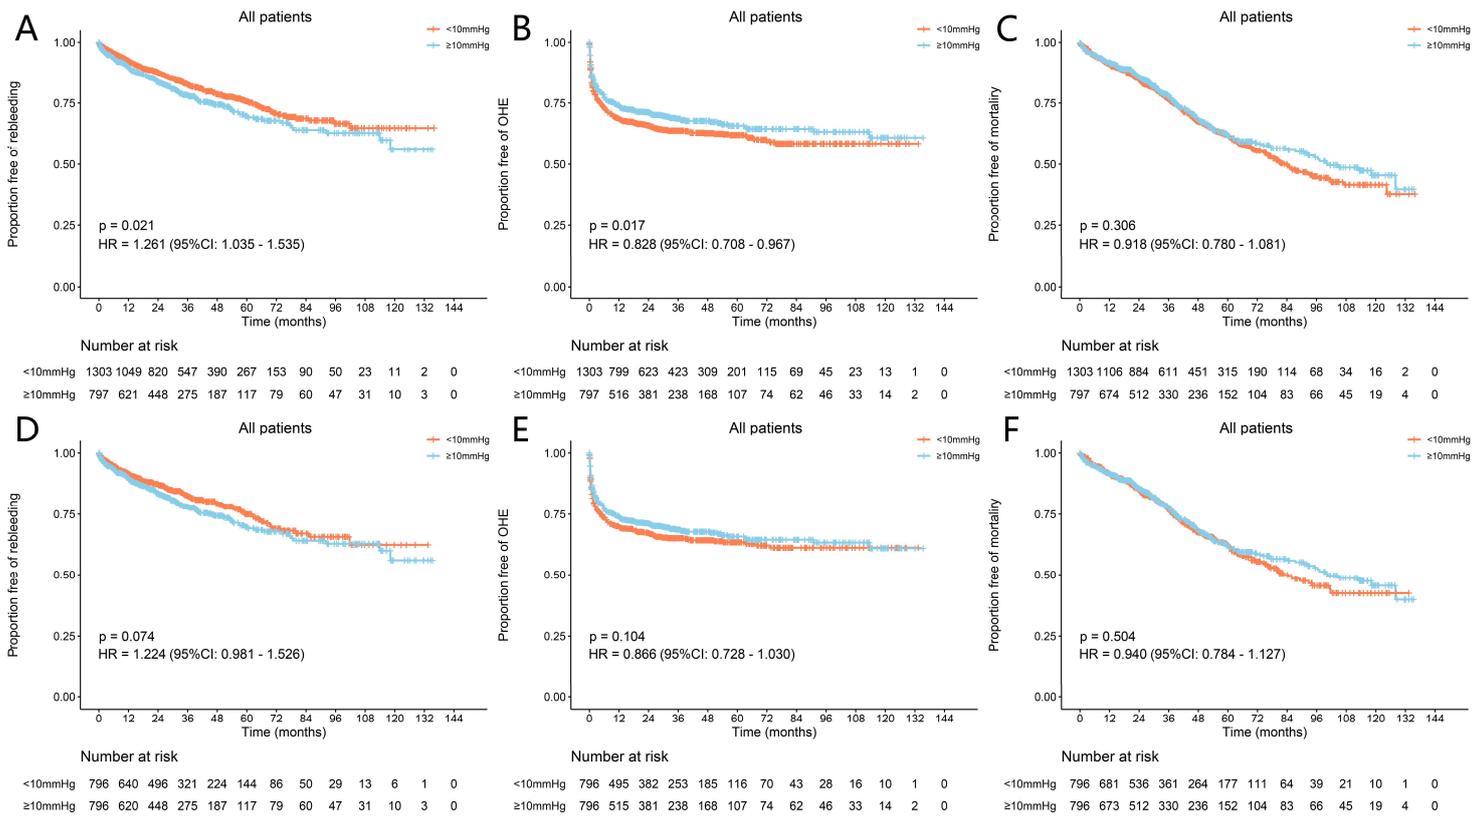

Supplementary Figure 4 Proportion free of outcomes in all patients with 8mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of rebleeding in all patients with 8mmHg threshold before PSM.
- (B) Proportion free of OHE in all patients with 8mmHg threshold before PSM.
- (C) Proportion free of mortality of all patients with 8mmHg threshold before PSM.
- (D) Proportion free of rebleeding in all patients with 8mmHg threshold after PSM.
- (E) Proportion free of OHE in all patients with 8mmHg threshold after PSM.
- (F) Proportion free of mortality of all patients with 8mmHg threshold after PSM.

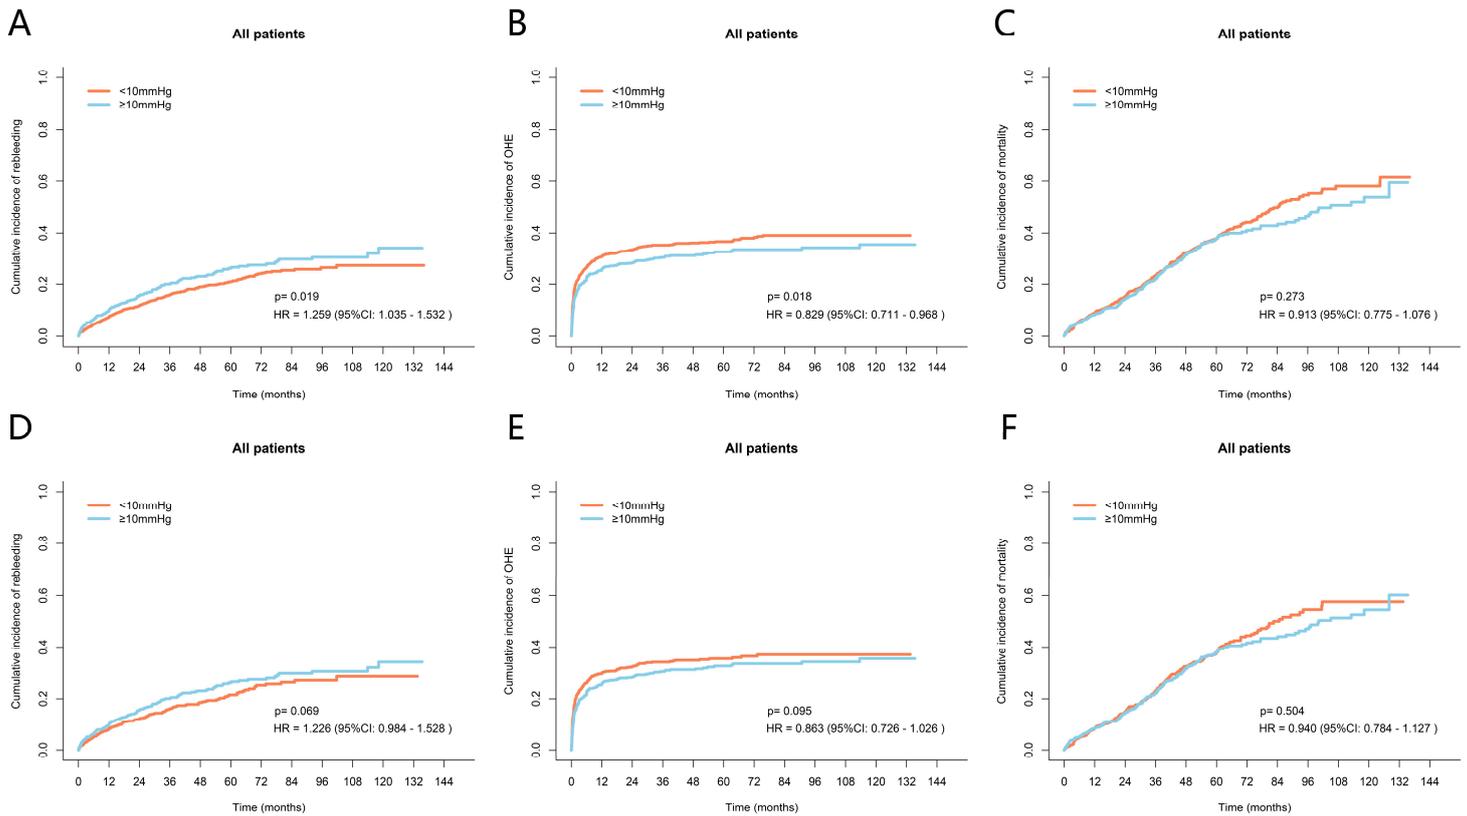

Supplementary Figure 5 Cumulative incidence of outcomes in all patients with 8mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in all patients with 8mmHg threshold before PSM. (B) Cumulative incidence of OHE in all patients with 8mmHg threshold before PSM. (C) Cumulative incidence of mortality of all patients with 8mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in all patients with 8mmHg threshold after PSM. (E) Cumulative incidence of OHE in all patients with 8mmHg threshold after PSM. (F) Cumulative incidence of mortality of all patients with 8mmHg threshold after PSM.

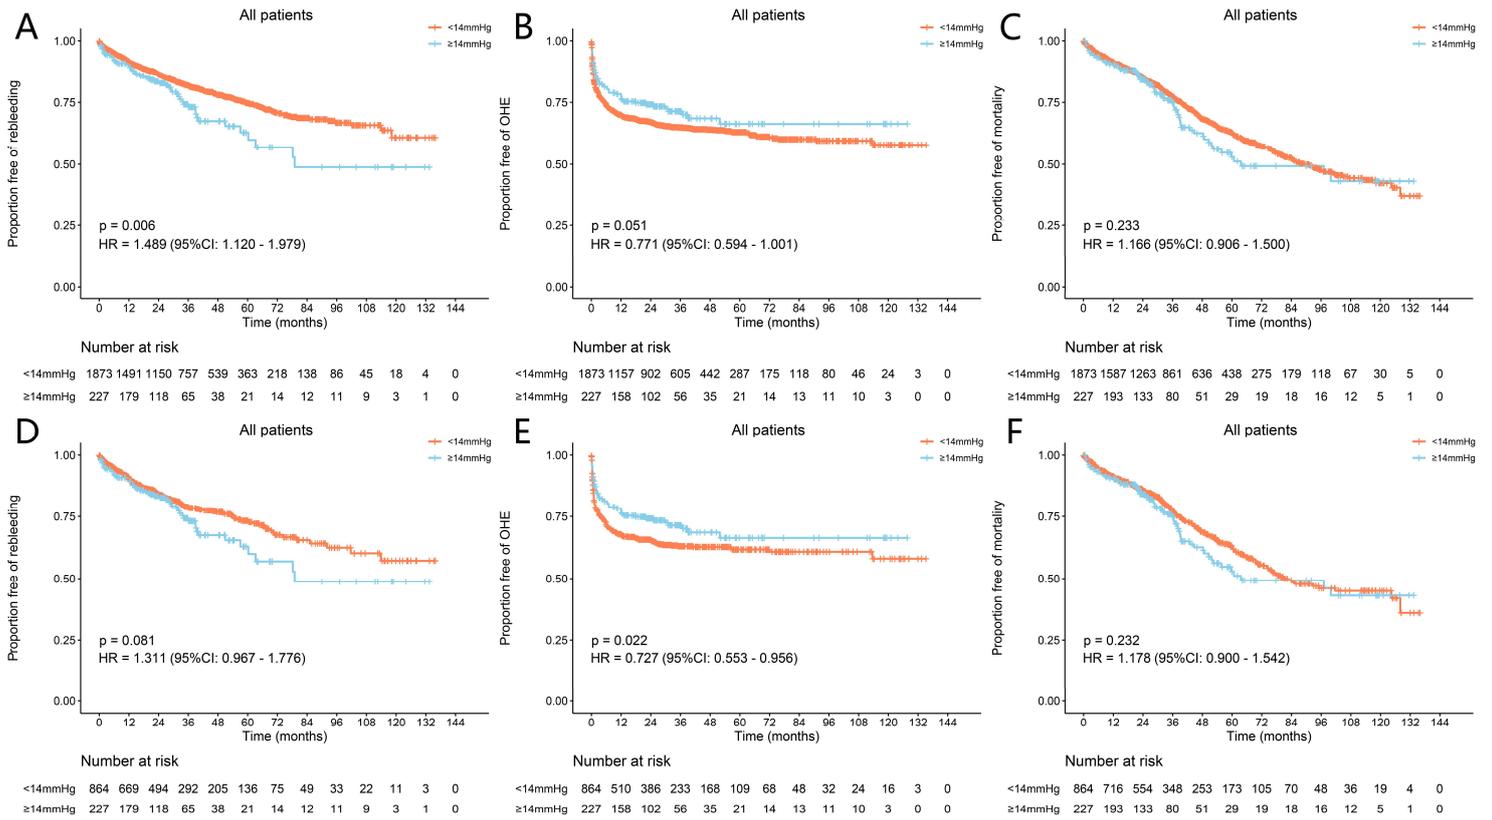

Supplementary Figure 6 Proportion free of outcomes in all patients with 10mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of rebleeding in all patients with 10mmHg threshold before PSM.
- (B) Proportion free of OHE in all patients with 10mmHg threshold before PSM.
- (C) Proportion free of mortality of all patients with 10mmHg threshold before PSM.
- (D) Proportion free of rebleeding in all patients with 10mmHg threshold after PSM.
- (E) Proportion free of OHE in all patients with 10mmHg threshold after PSM.
- (F) Proportion free of mortality of all patients with 10mmHg threshold after PSM.

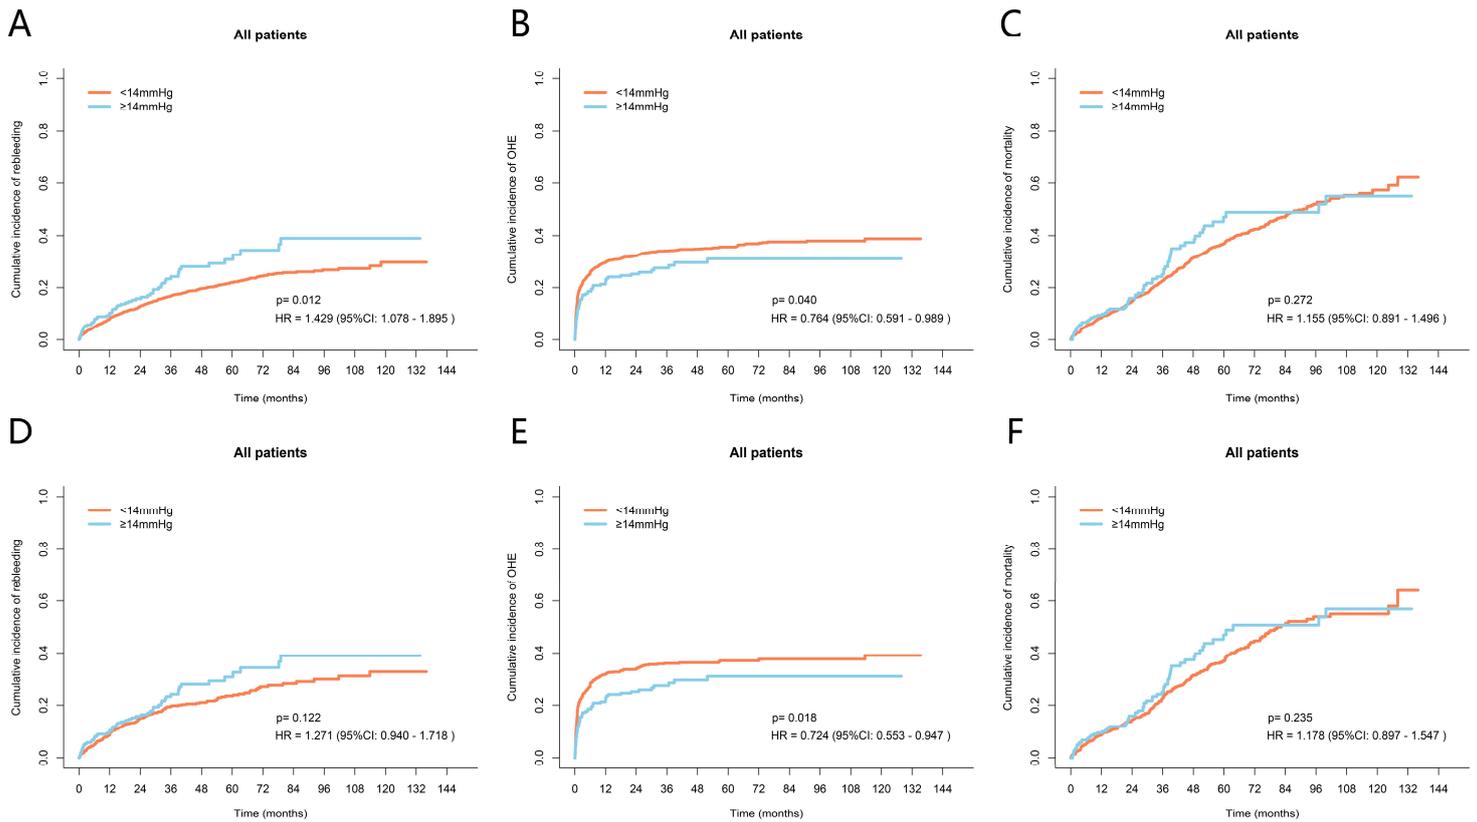

Supplementary Figure 7 Cumulative incidence of outcomes in all patients with 10mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in all patients with 10mmHg threshold before PSM. (B) Cumulative incidence of OHE in all patients with 10mmHg threshold before PSM. (C) Cumulative incidence of mortality of all patients with 10mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in all patients with 10mmHg threshold after PSM. (E) Cumulative incidence of OHE in all patients with 10mmHg threshold after PSM. (F) Cumulative incidence of mortality of all patients with 10mmHg threshold after PSM.

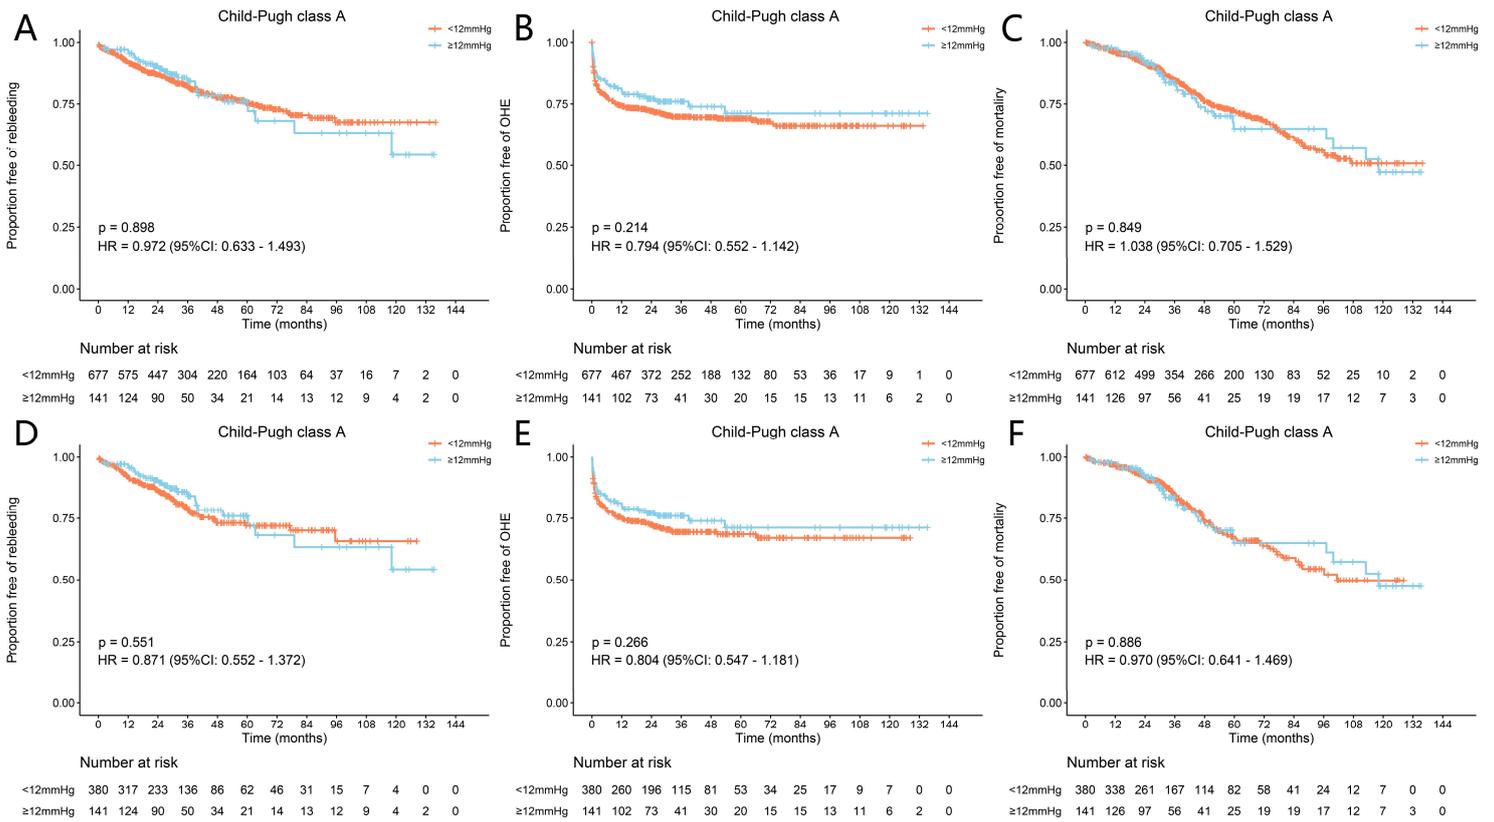

Supplementary Figure 8 Proportion free of outcomes in all patients with 14mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of rebleeding in all patients with 14mmHg threshold before PSM.
- (B) Proportion free of OHE in all patients with 14mmHg threshold before PSM.
- (C) Proportion free of mortality of all patients with 14mmHg threshold before PSM.
- (D) Proportion free of rebleeding in all patients with 14mmHg threshold after PSM.
- (E) Proportion free of OHE in all patients with 14mmHg threshold after PSM.
- (F) Proportion free of mortality of all patients with 14mmHg threshold after PSM.

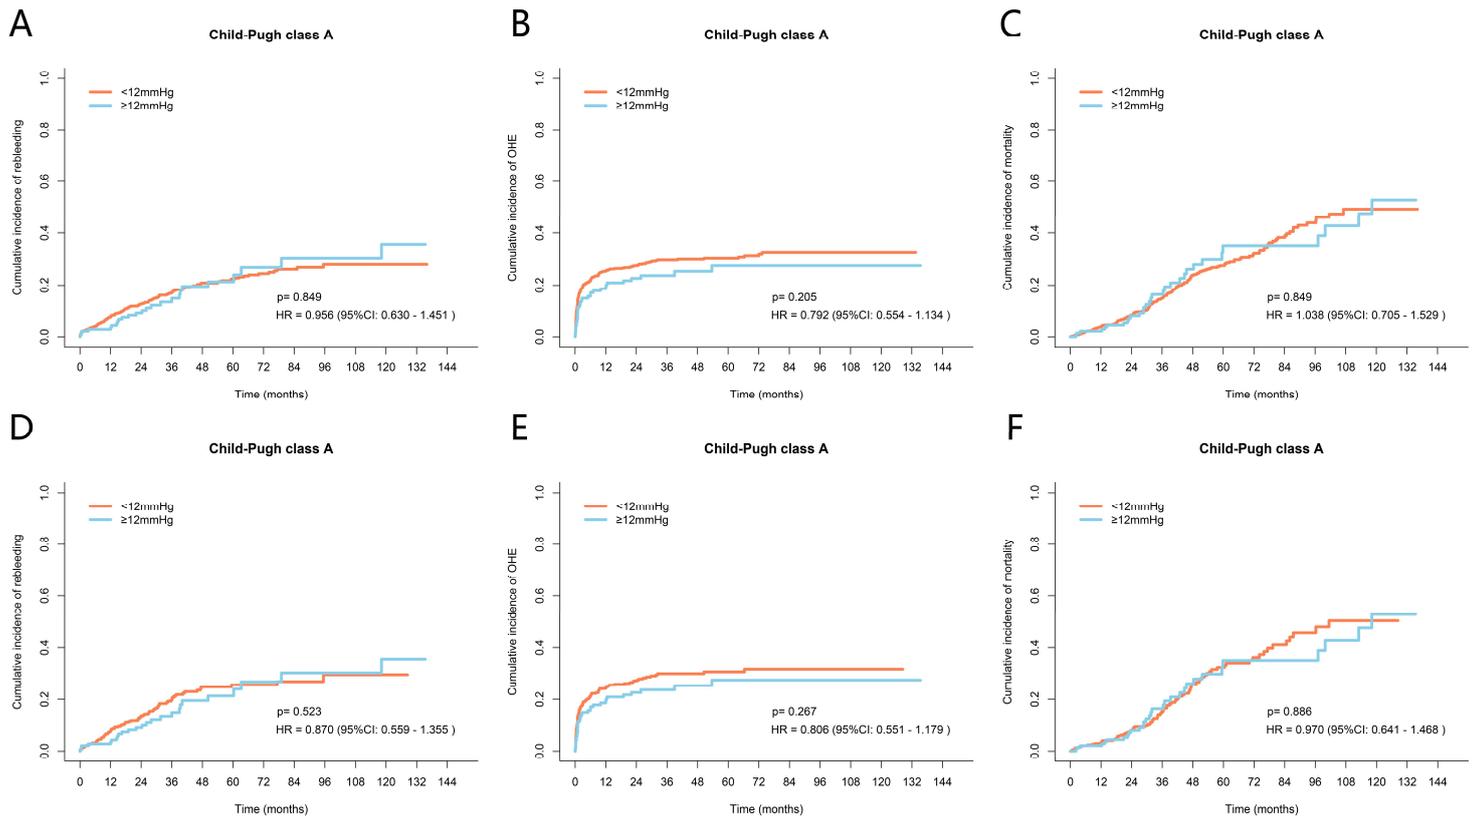

Supplementary Figure 9 Cumulative incidence of outcomes in all patients with 14mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in all patients with 14mmHg threshold before PSM. (B) Cumulative incidence of OHE in all patients with 14mmHg threshold before PSM. (C) Cumulative incidence of mortality of all patients with 14mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in all patients with 14mmHg threshold after PSM. (E) Cumulative incidence of OHE in all patients with 14mmHg threshold after PSM. (F) Cumulative incidence of mortality of all patients with 14mmHg threshold after PSM.

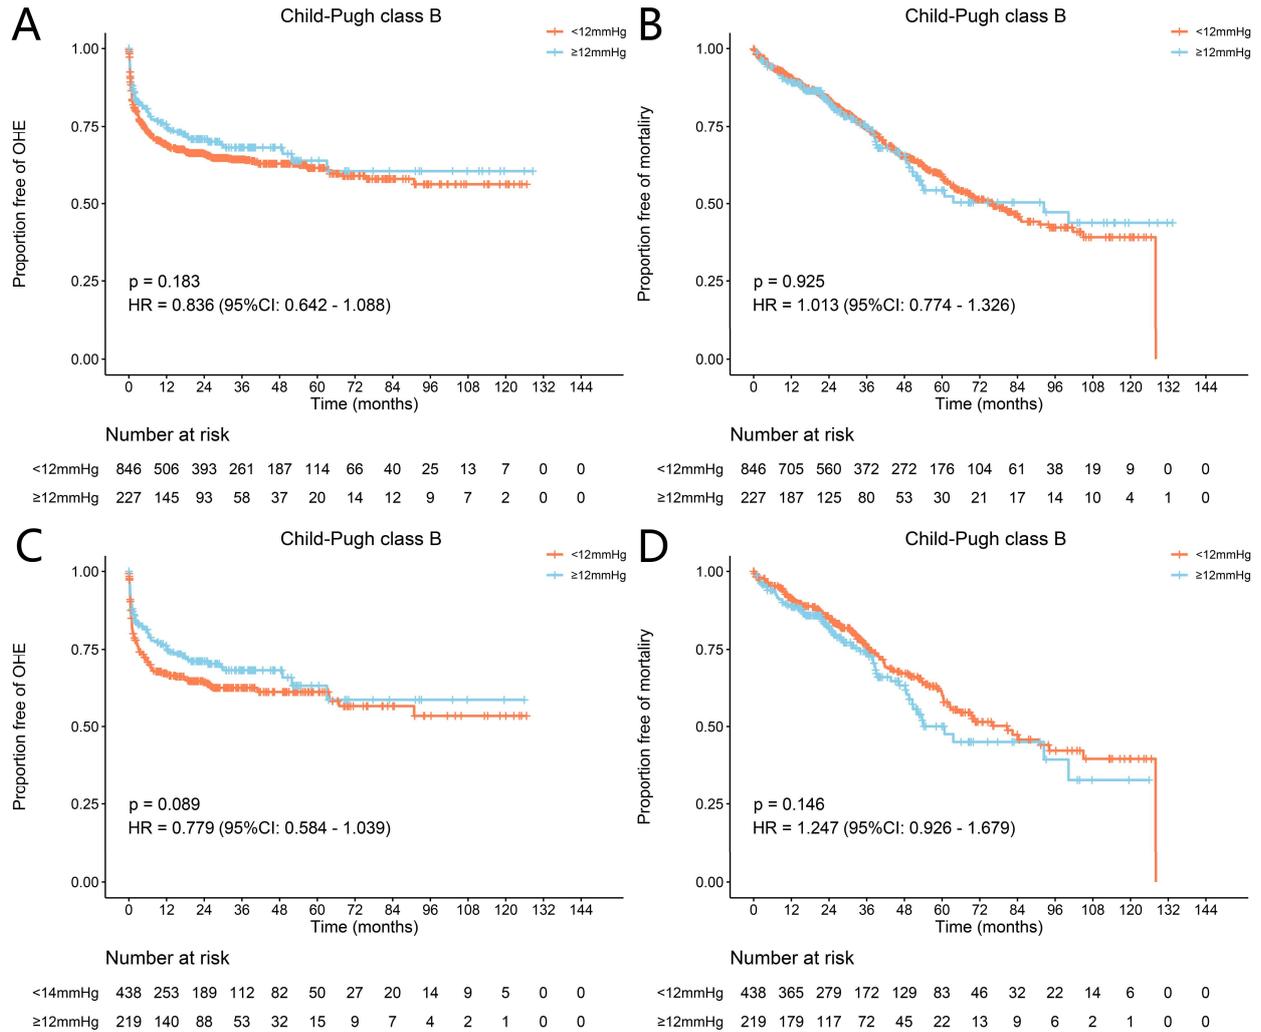

Supplementary Figure 10 Proportion free of outcomes in Child-Pugh class A with 12mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class A with 12mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class A with 12mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class A with 12mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class A with 12mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class A with 12mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class A with 12mmHg threshold after PSM.

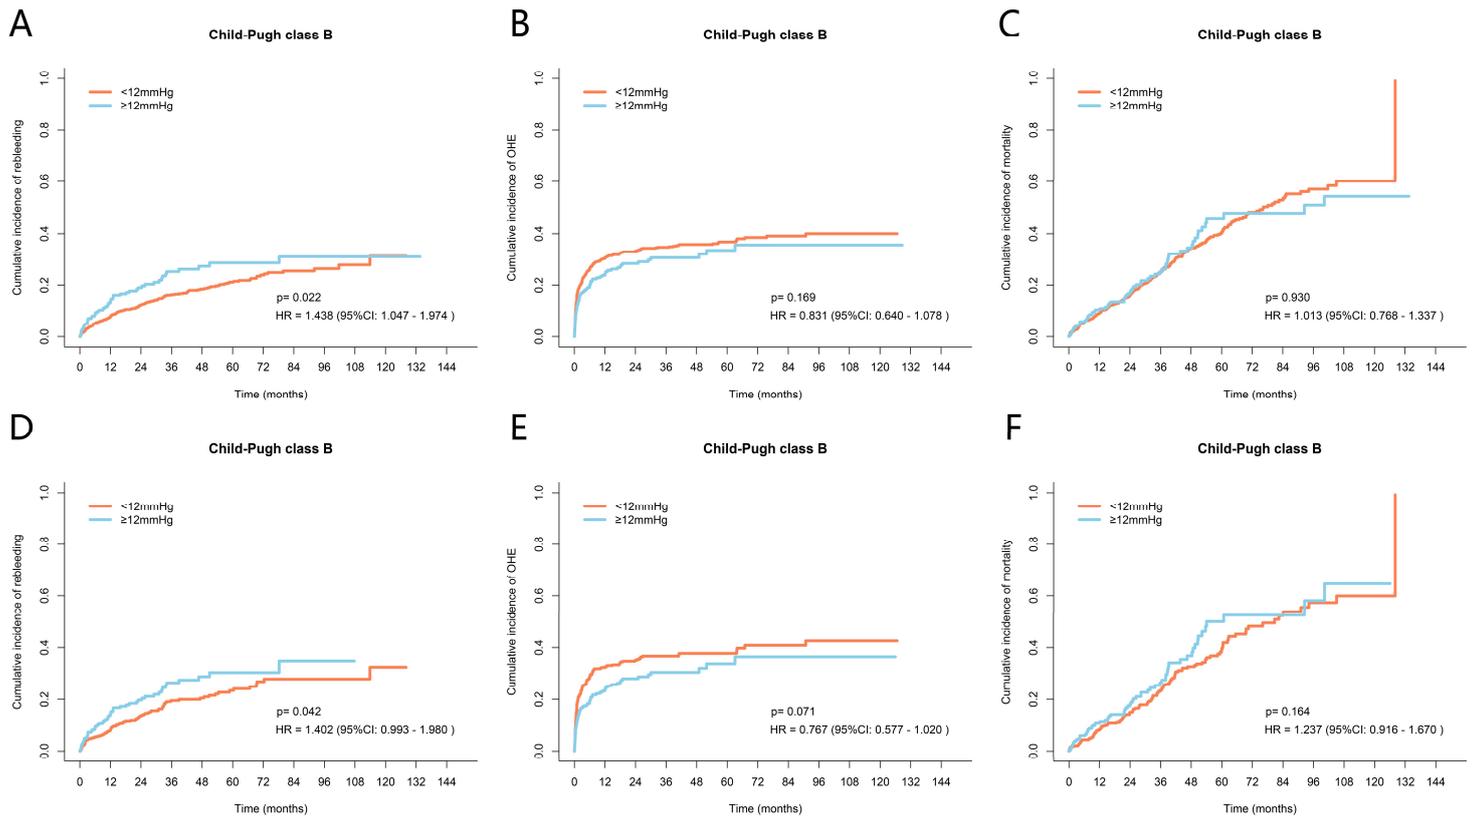

Supplementary Figure 11 Cumulative incidence of outcomes in Child-Pugh class A with 12mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class A with 12mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class A with 12mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class A with 12mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class A with 12mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class A with 12mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class A with 12mmHg threshold after PSM.

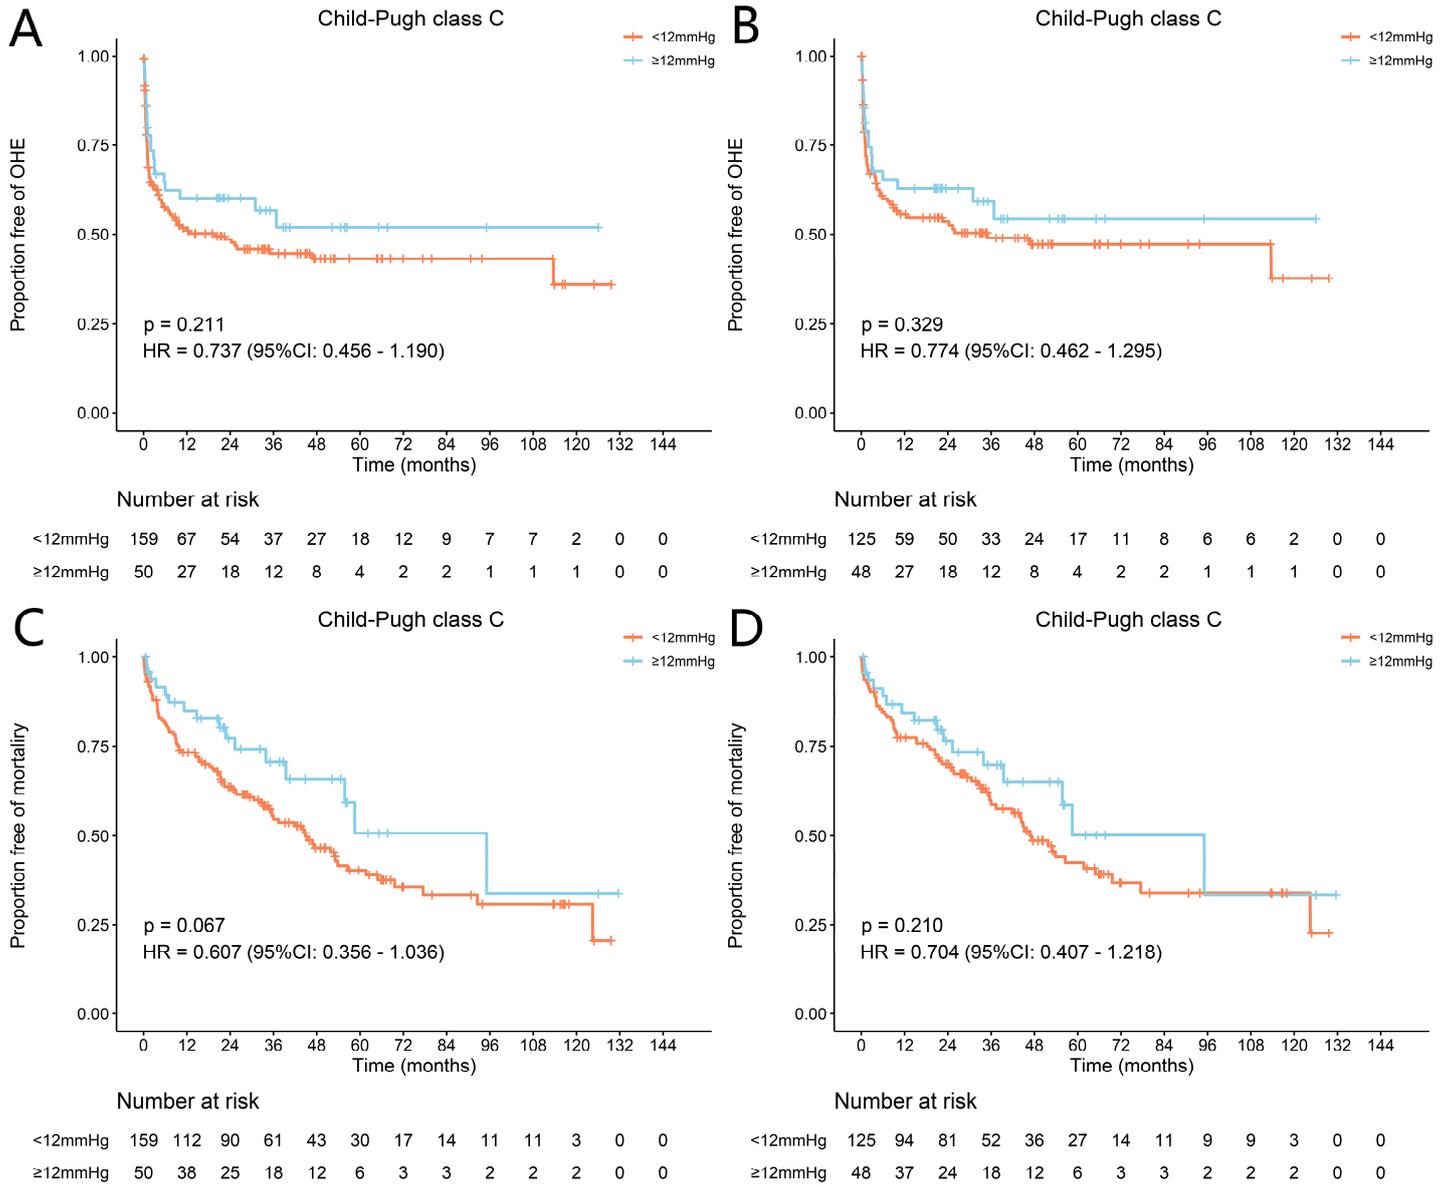

Supplementary Figure 12 Proportion free of OHE and mortality in Child-Pugh class B with 12mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of OHE in Child-Pugh class B with 12mmHg threshold before PSM. (B) Proportion free of mortality of Child-Pugh class B with 12mmHg threshold before PSM. (C) Proportion free of OHE in Child-Pugh class B with 12mmHg threshold after PSM. (D) Proportion free of mortality of Child-Pugh class B with 12mmHg threshold after PSM.

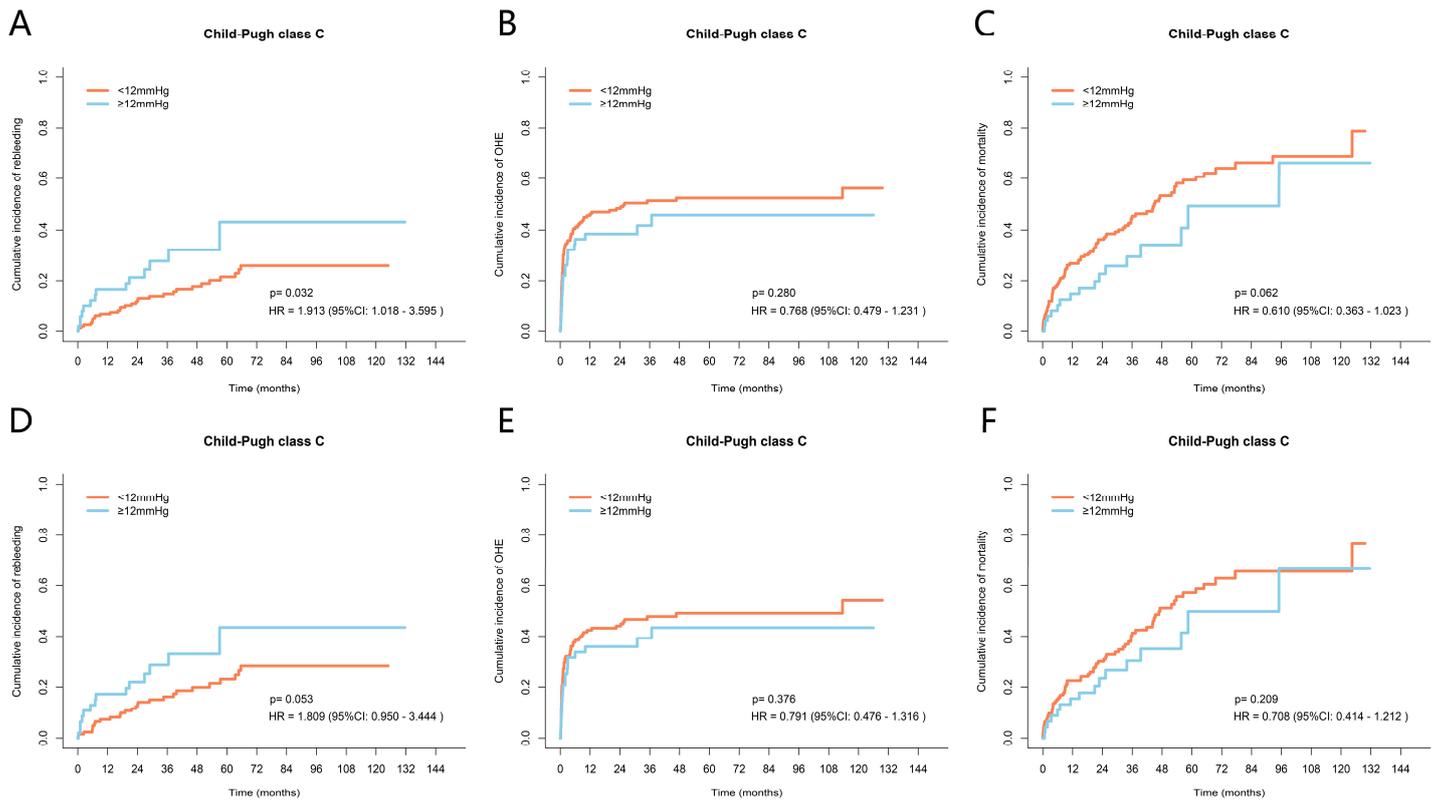

Supplementary Figure 13 Cumulative incidence of outcomes in Child-Pugh class B with 12mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class B with 12mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class B with 12mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class B with 12mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class B with 12mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class B with 12mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class B with 12mmHg threshold after PSM.

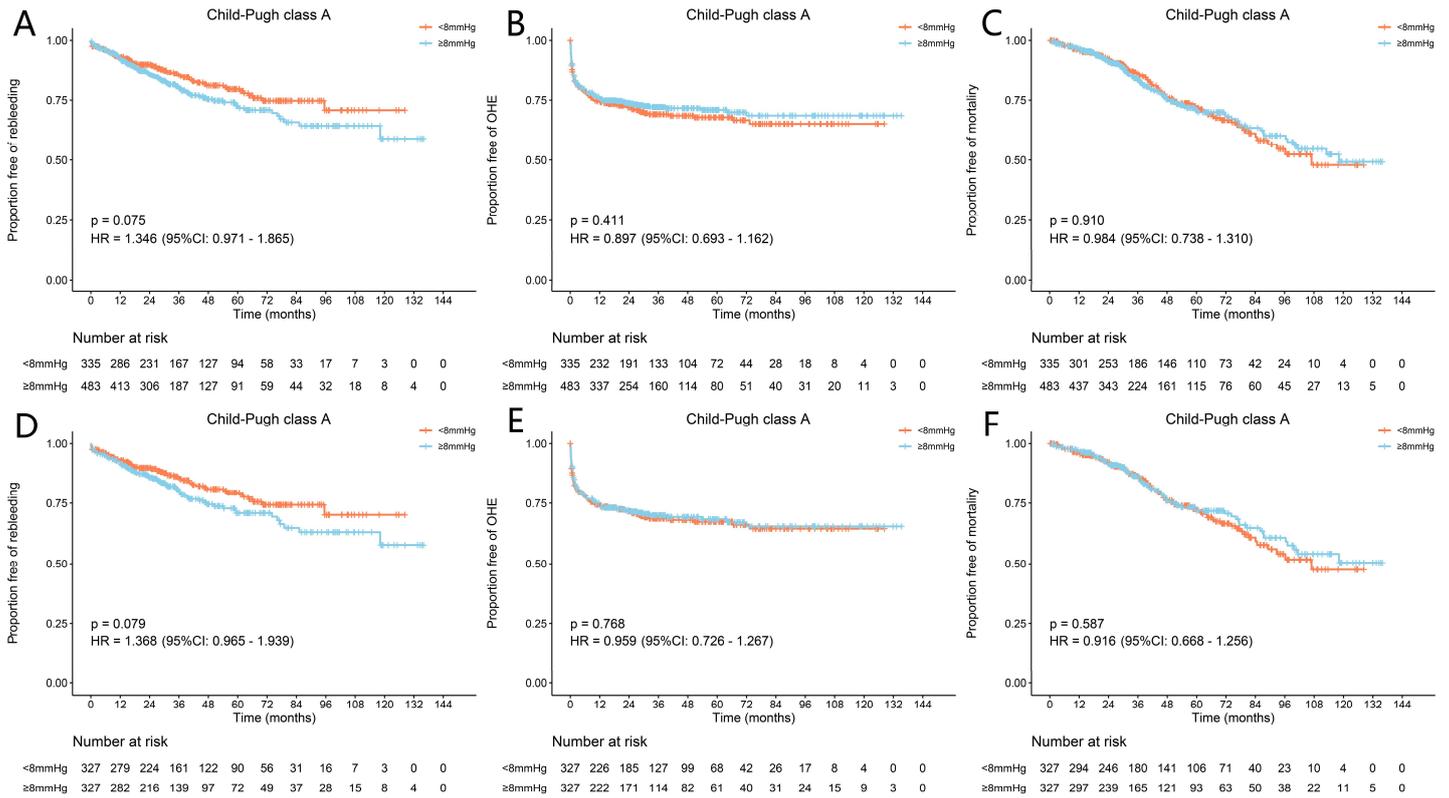

Supplementary Figure 14 Proportion free of OHE and mortality in Child-Pugh class C with 12mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of OHE in Child-Pugh class C with 12mmHg threshold before PSM.
- (B) Proportion free of OHE in Child-Pugh class C with 12mmHg threshold after PSM.
- (C) Proportion free of mortality of Child-Pugh class C with 12mmHg threshold before PSM.
- (D) Proportion free of mortality of Child-Pugh class C with 12mmHg threshold after PSM.

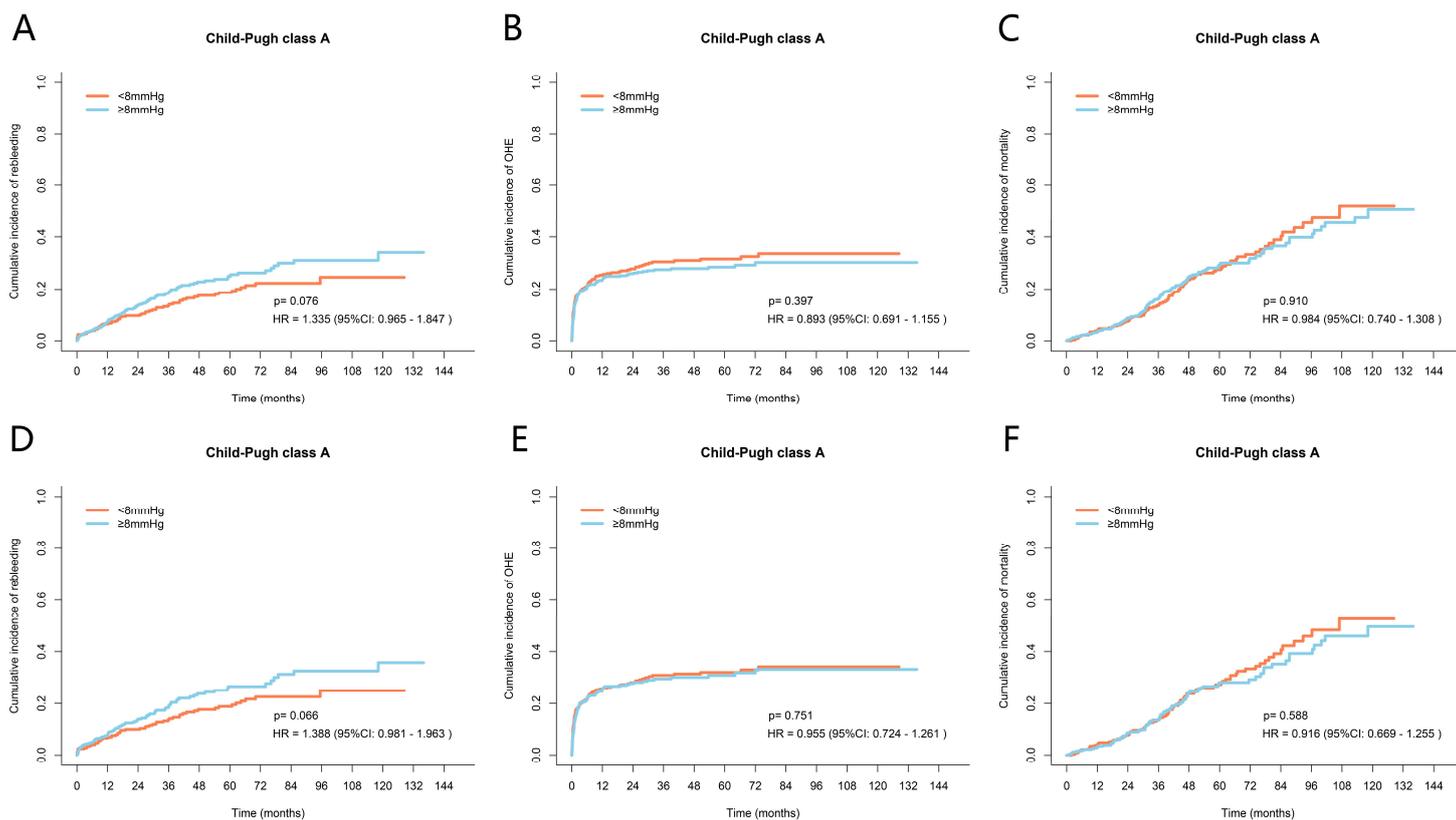

Supplementary Figure 15 Cumulative incidence of outcomes in Child-Pugh class C with 12mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class C with 12mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class C with 12mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class C with 12mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class C with 12mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class C with 12mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class C with 12mmHg threshold after PSM.

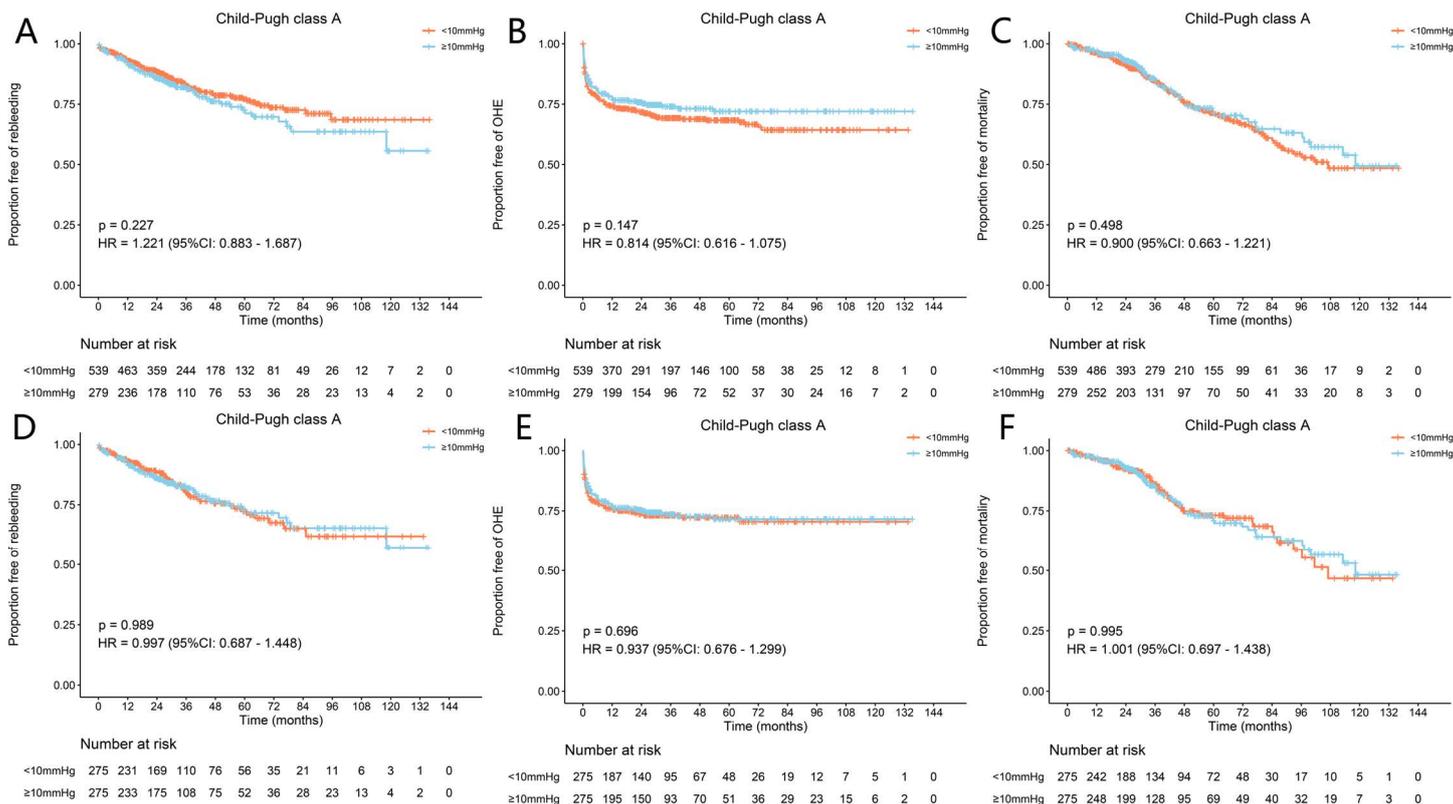

Supplementary Figure 16 Proportion free of outcomes in Child-Pugh class A with 8mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class A with 8mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class A with 8mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class A with 8mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class A with 8mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class A with 8mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class A with 8mmHg threshold after PSM.

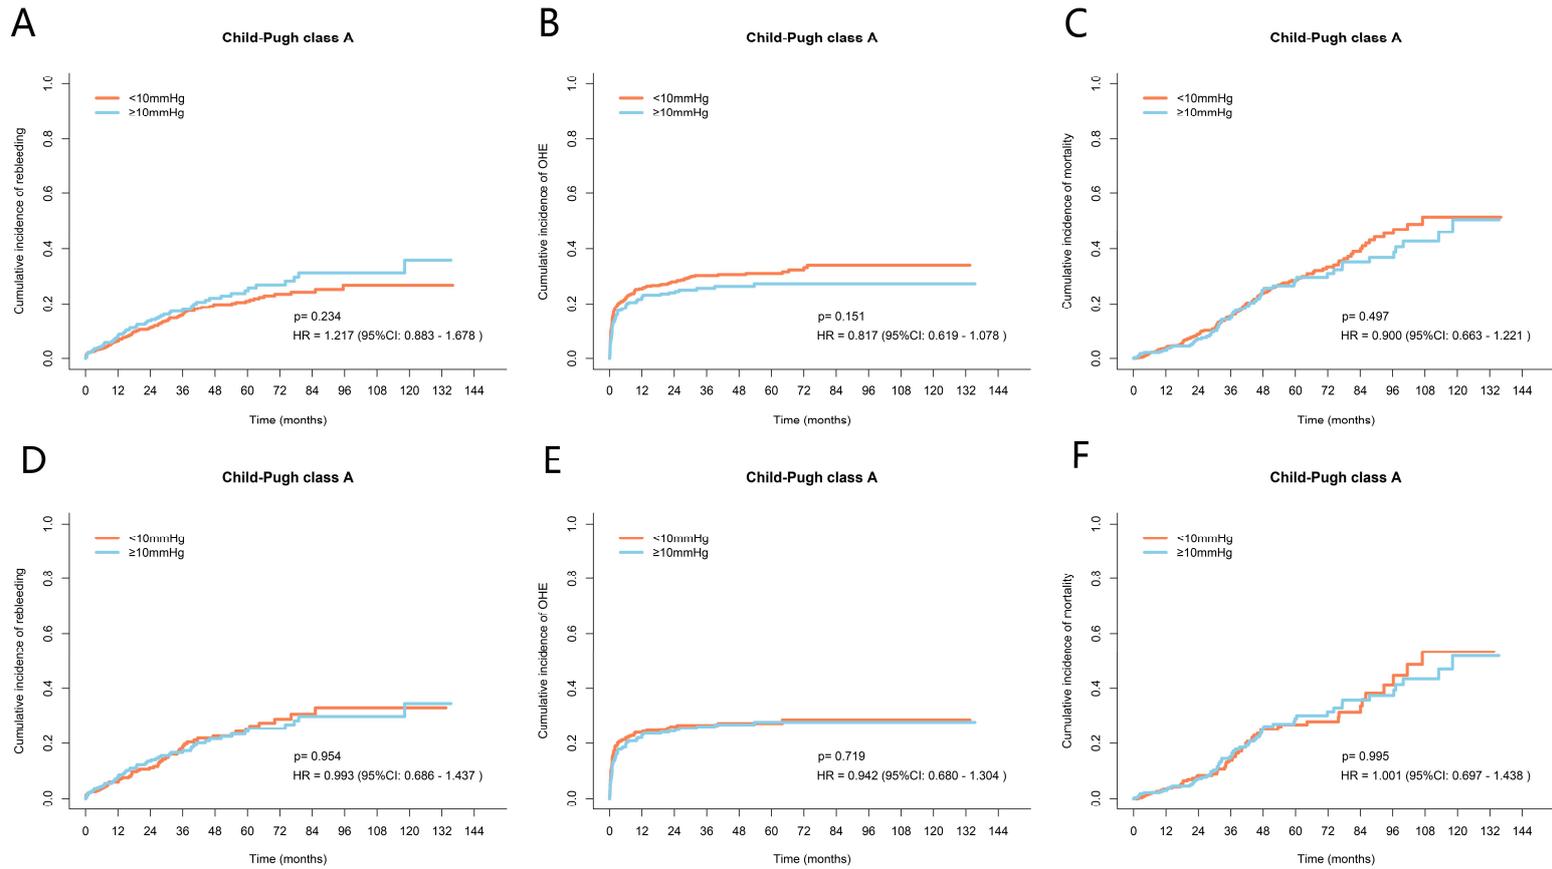

Supplementary Figure 17 Cumulative incidence of outcomes in Child-Pugh class A with 8mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class A with 8mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class A with 8mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class A with 8mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class A with 8mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class A with 8mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class A with 8mmHg threshold after PSM.

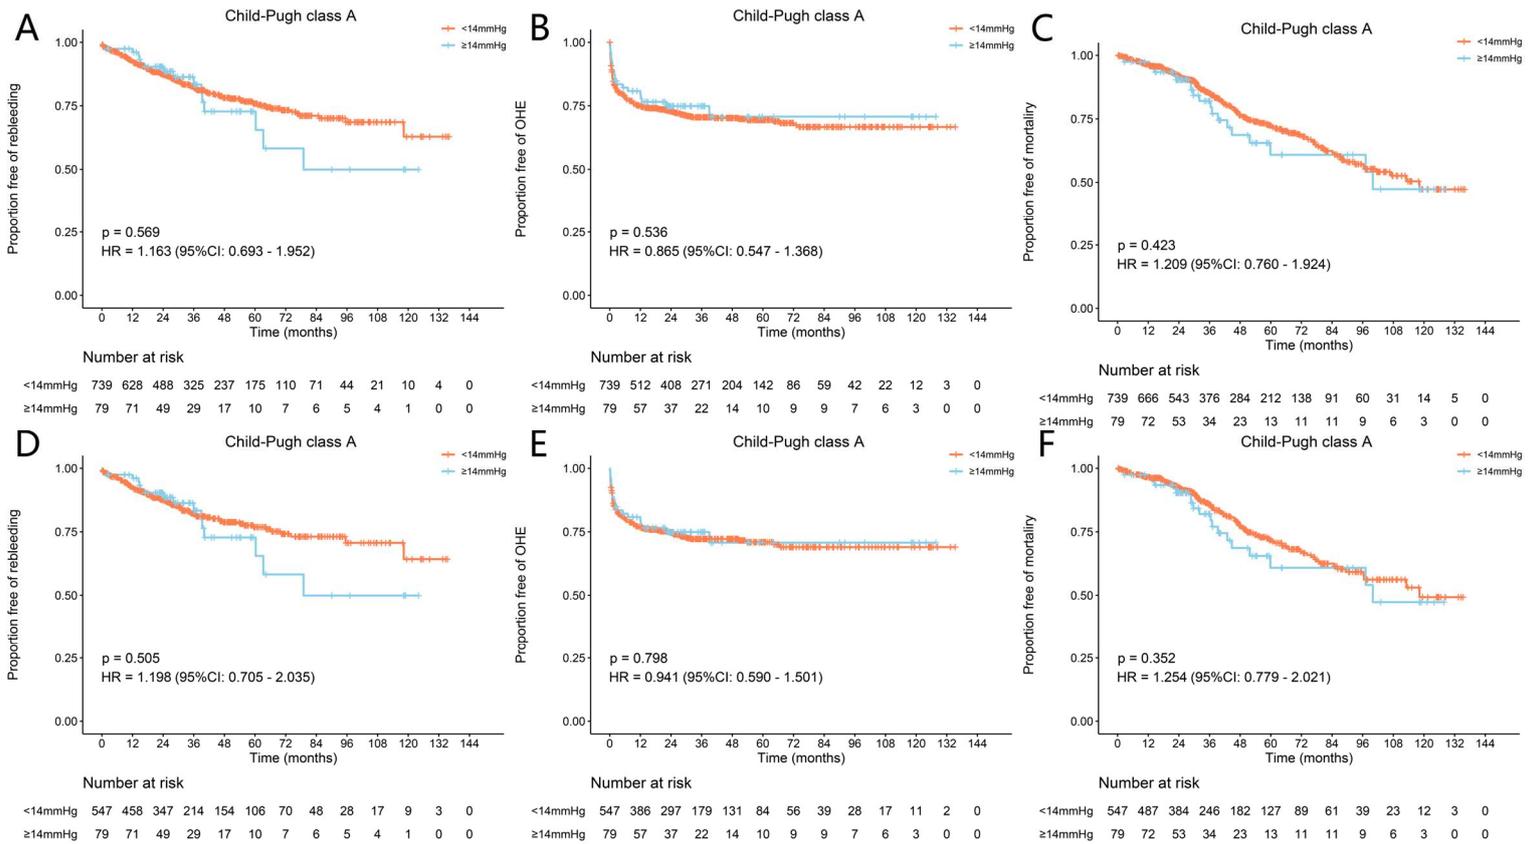

Supplementary Figure 18 Proportion free of outcomes in Child-Pugh class A with 10mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class A with 10mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class A with 10mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class A with 10mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class A with 10mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class A with 10mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class A with 10mmHg threshold after PSM.

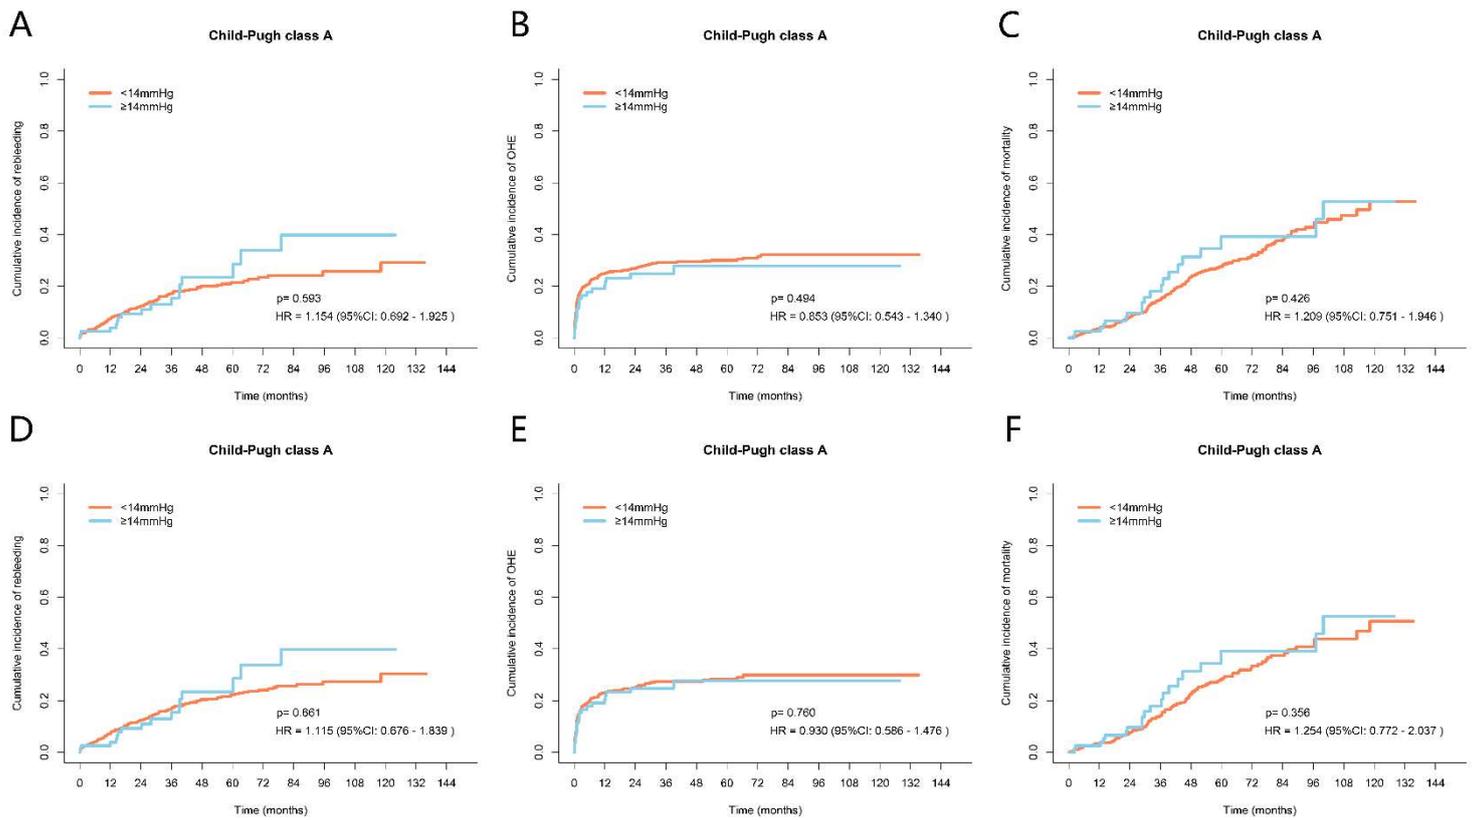

Supplementary Figure 19 Cumulative incidence of outcomes in Child-Pugh class A with 10mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class A with 10mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class A with 10mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class A with 10mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class A with 10mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class A with 10mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class A with 10mmHg threshold after PSM.

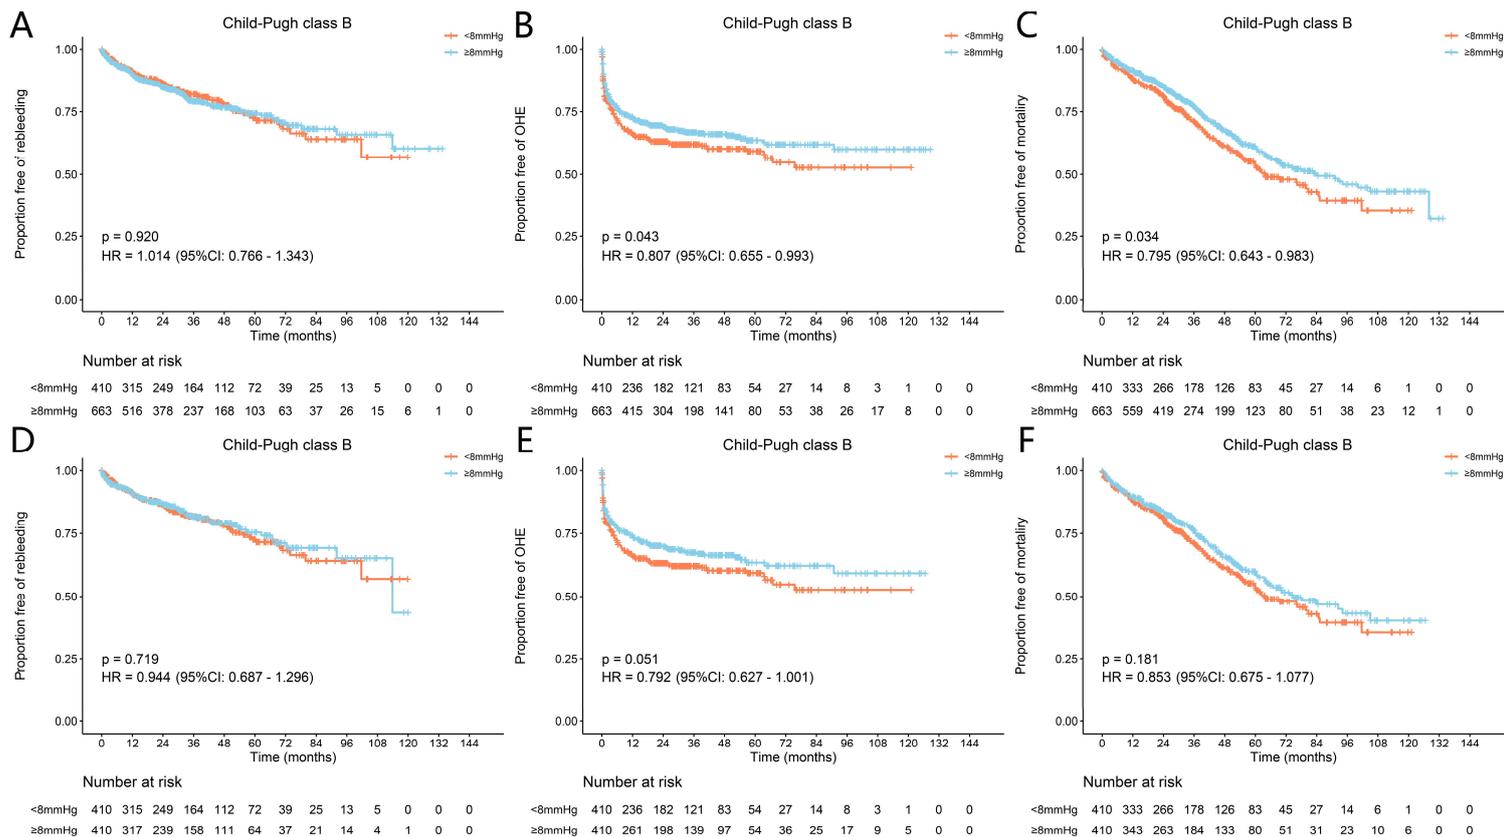

Supplementary Figure 20 Proportion free of outcomes in Child-Pugh class A with 14mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class A with 14mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class A with 14mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class A with 14mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class A with 14mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class A with 14mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class A with 14mmHg threshold after PSM.

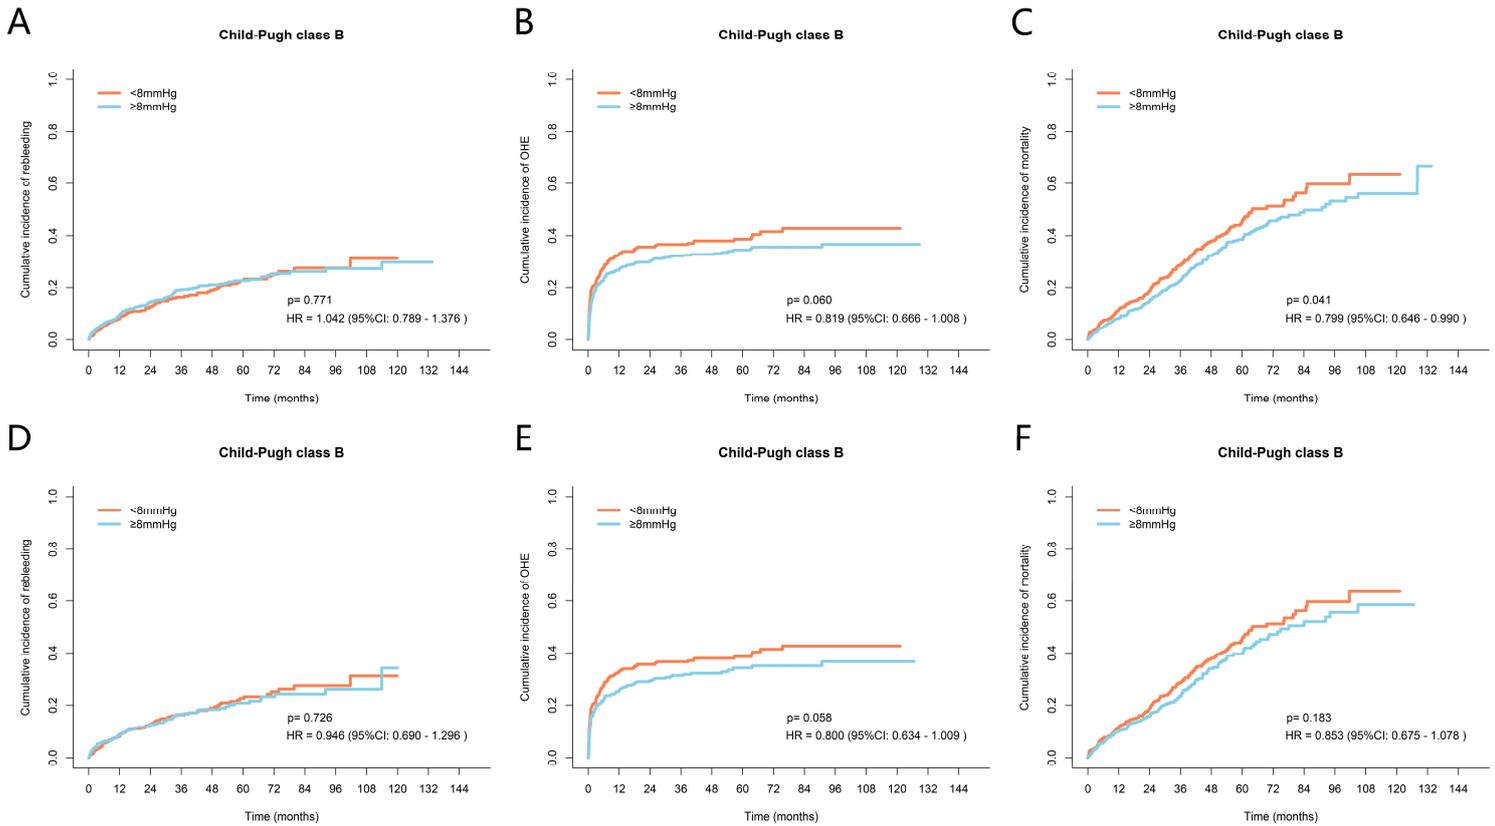

Supplementary Figure 21 Cumulative incidence of outcomes in Child-Pugh class A with 14mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class A with 14mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class A with 14mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class A with 14mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class A with 14mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class A with 14mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class A with 14mmHg threshold after PSM.

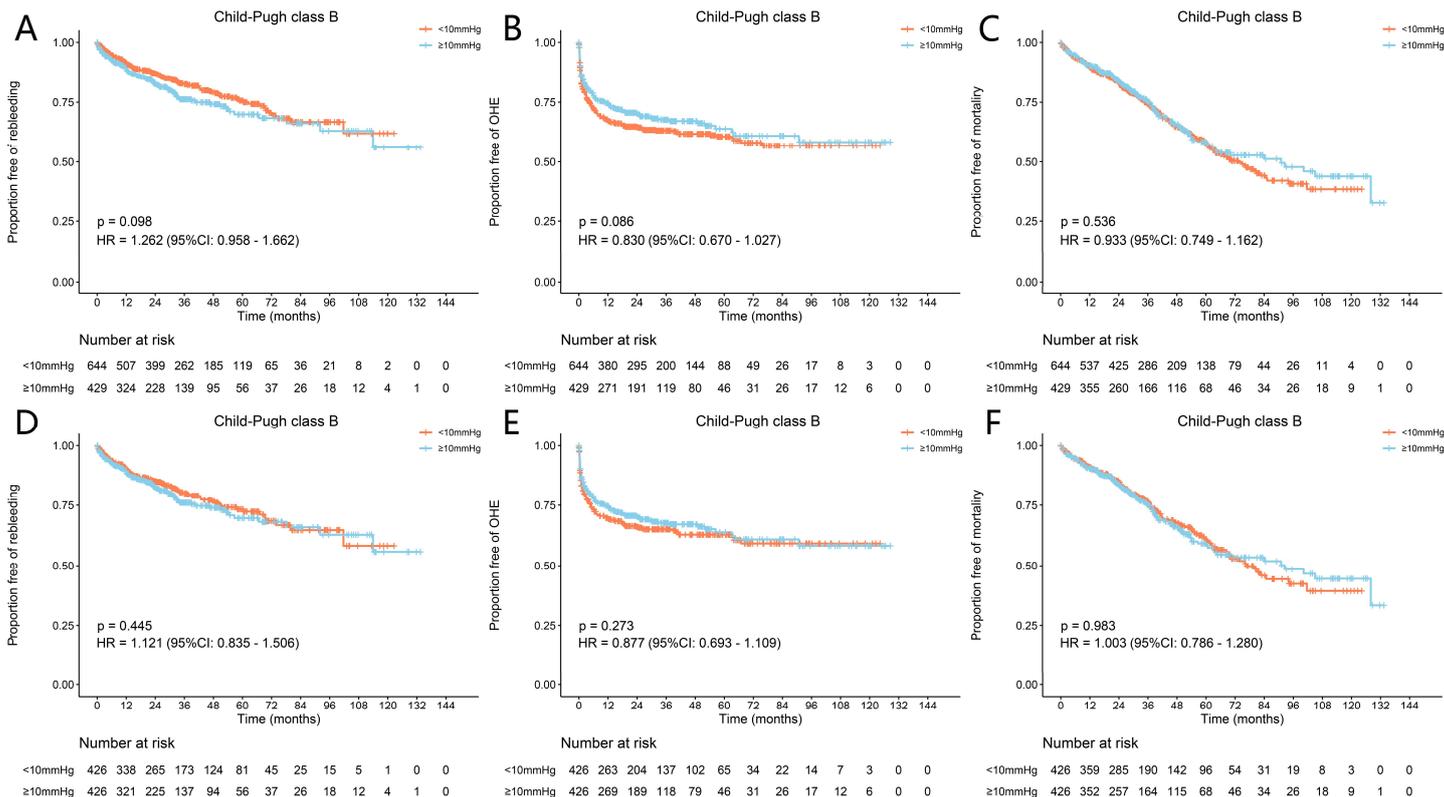

Supplementary Figure 22 Proportion free of outcomes in Child-Pugh class B with 8mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class B with 8mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class B with 8mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class B with 8mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class B with 8mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class B with 8mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class B with 8mmHg threshold after PSM.

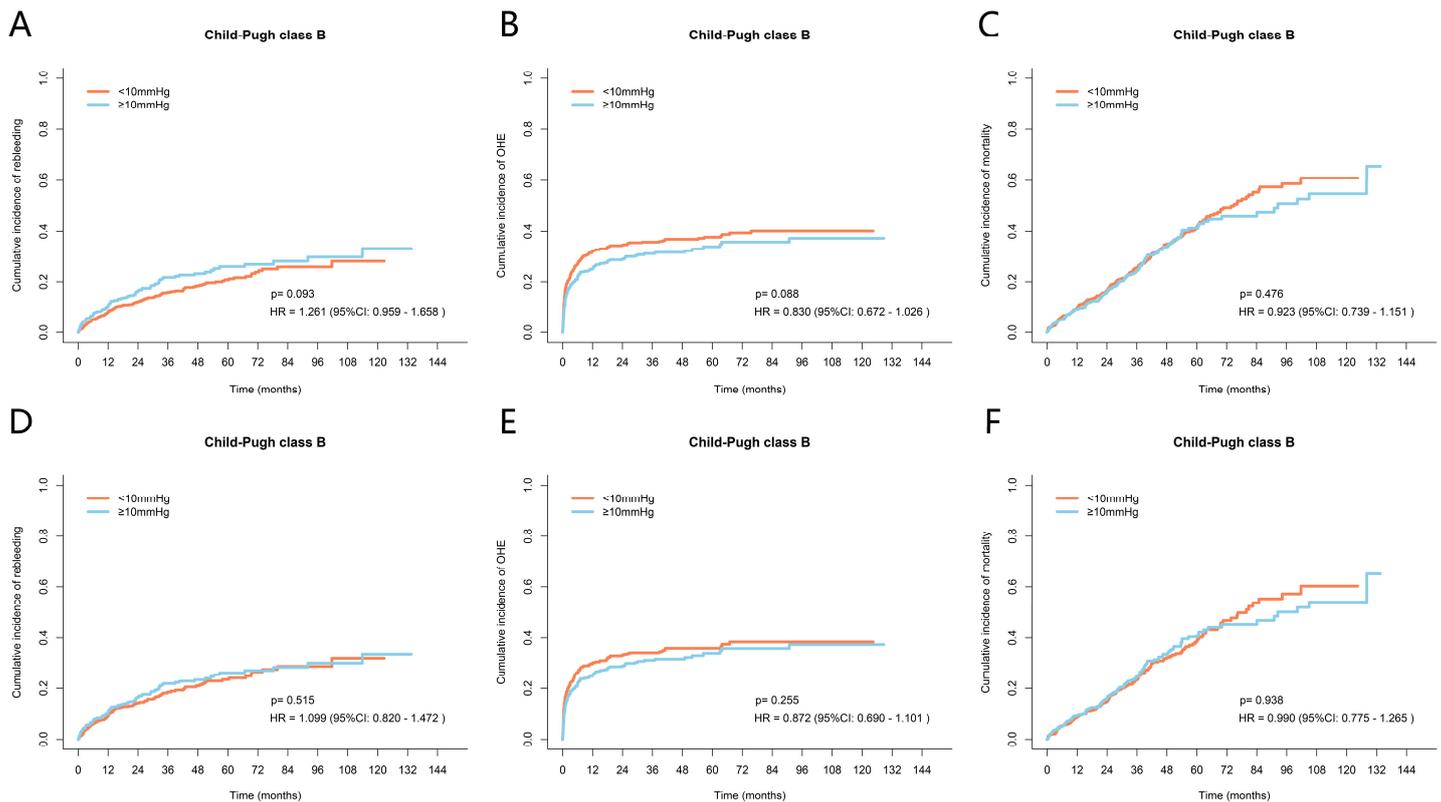

Supplementary Figure 23 Cumulative incidence of outcomes in Child-Pugh class B with 8mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class B with 8mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class B with 8mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class B with 8mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class B with 8mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class B with 8mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class B with 8mmHg threshold after PSM.

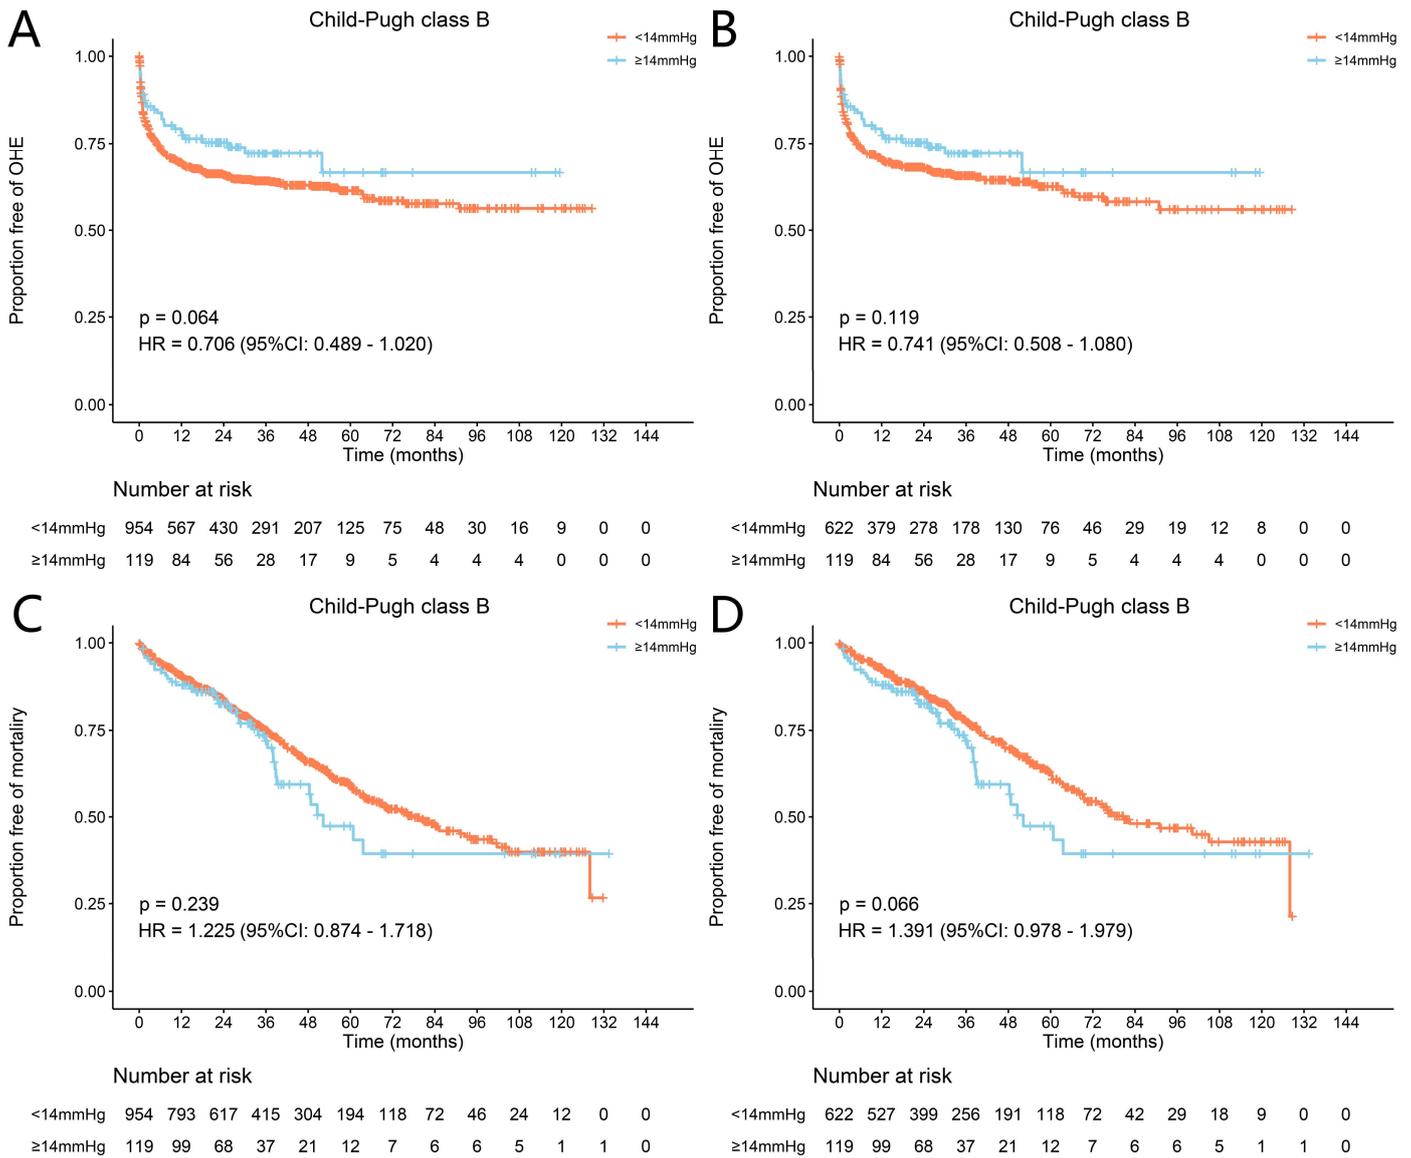

Supplementary Figure 24 Proportion free of outcomes in Child-Pugh class B with 10mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class B with 10mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class B with 10mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class B with 10mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class B with 10mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class B with 10mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class B with 10mmHg threshold after PSM.

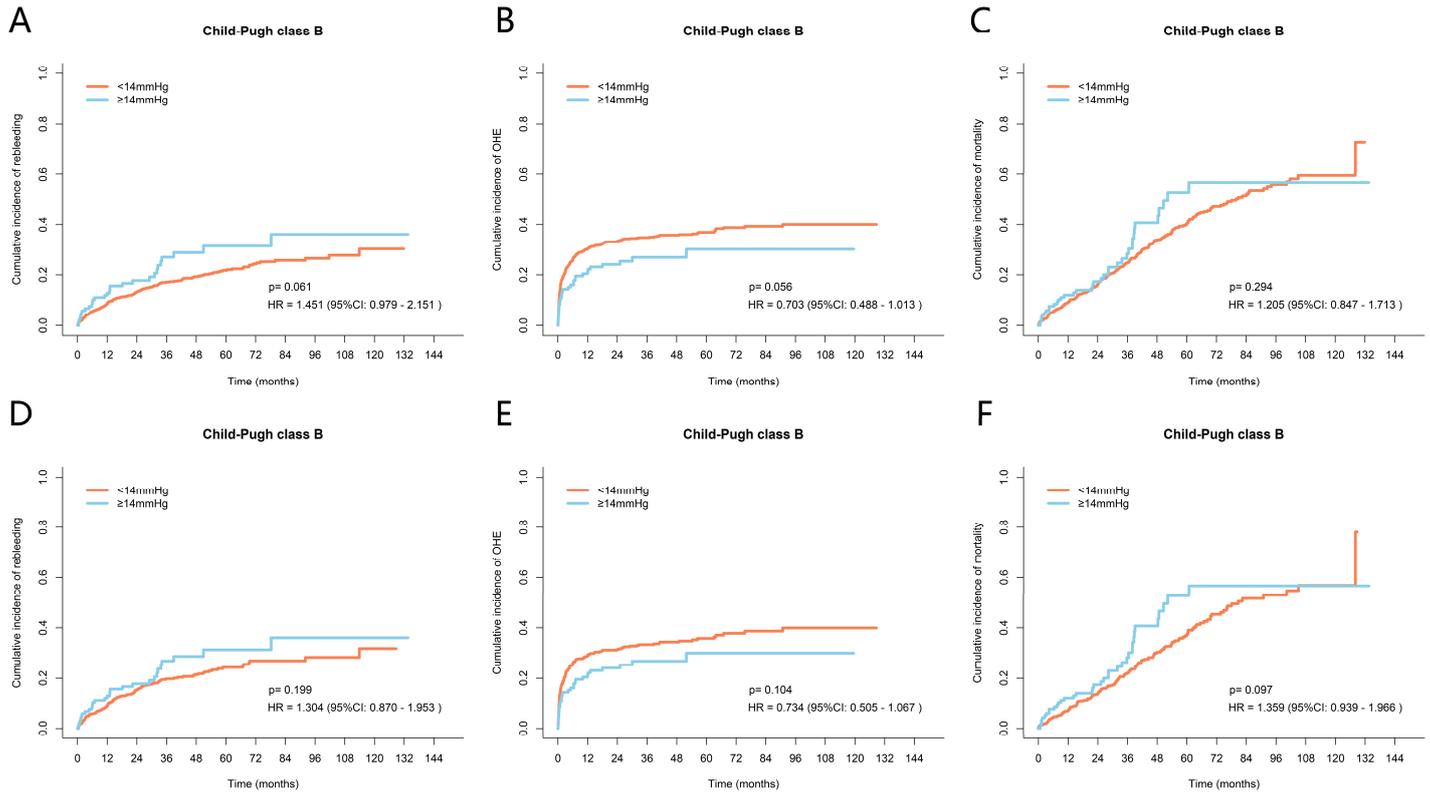

Supplementary Figure 25 Cumulative incidence of outcomes in Child-Pugh class B with 10mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class B with 10mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class B with 10mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class B with 10mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class B with 10mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class B with 10mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class B with 10mmHg threshold after PSM.

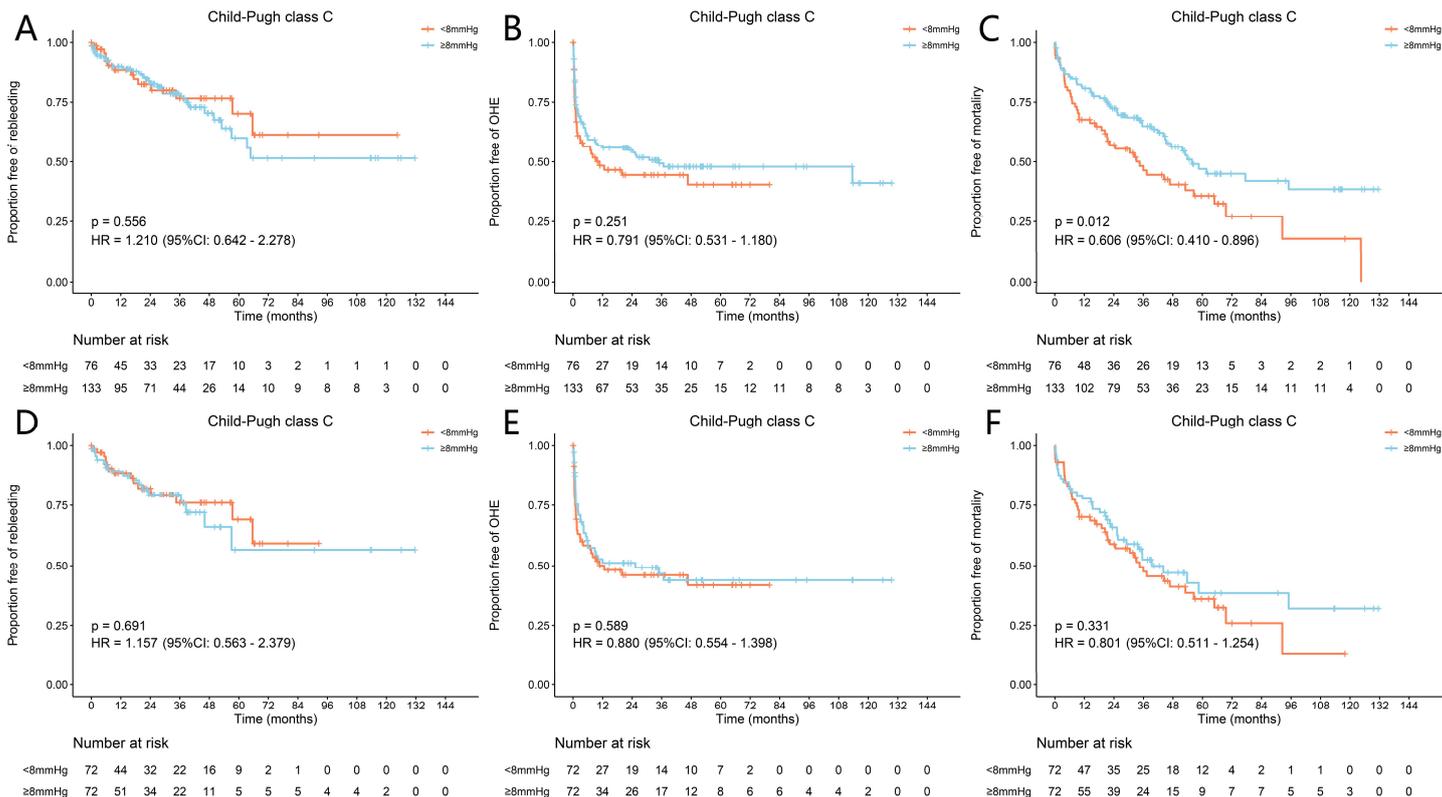

Supplementary Figure 26 Proportion free of OHE and mortality in Child-Pugh class B with 14mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of OHE in Child-Pugh class B with 14mmHg threshold before PSM.
- (B) Proportion free of OHE in Child-Pugh class B with 14mmHg threshold after PSM.
- (C) Proportion free of mortality of Child-Pugh class B with 14mmHg threshold before PSM.
- (D) Proportion free of mortality of Child-Pugh class B with 14mmHg threshold after PSM.

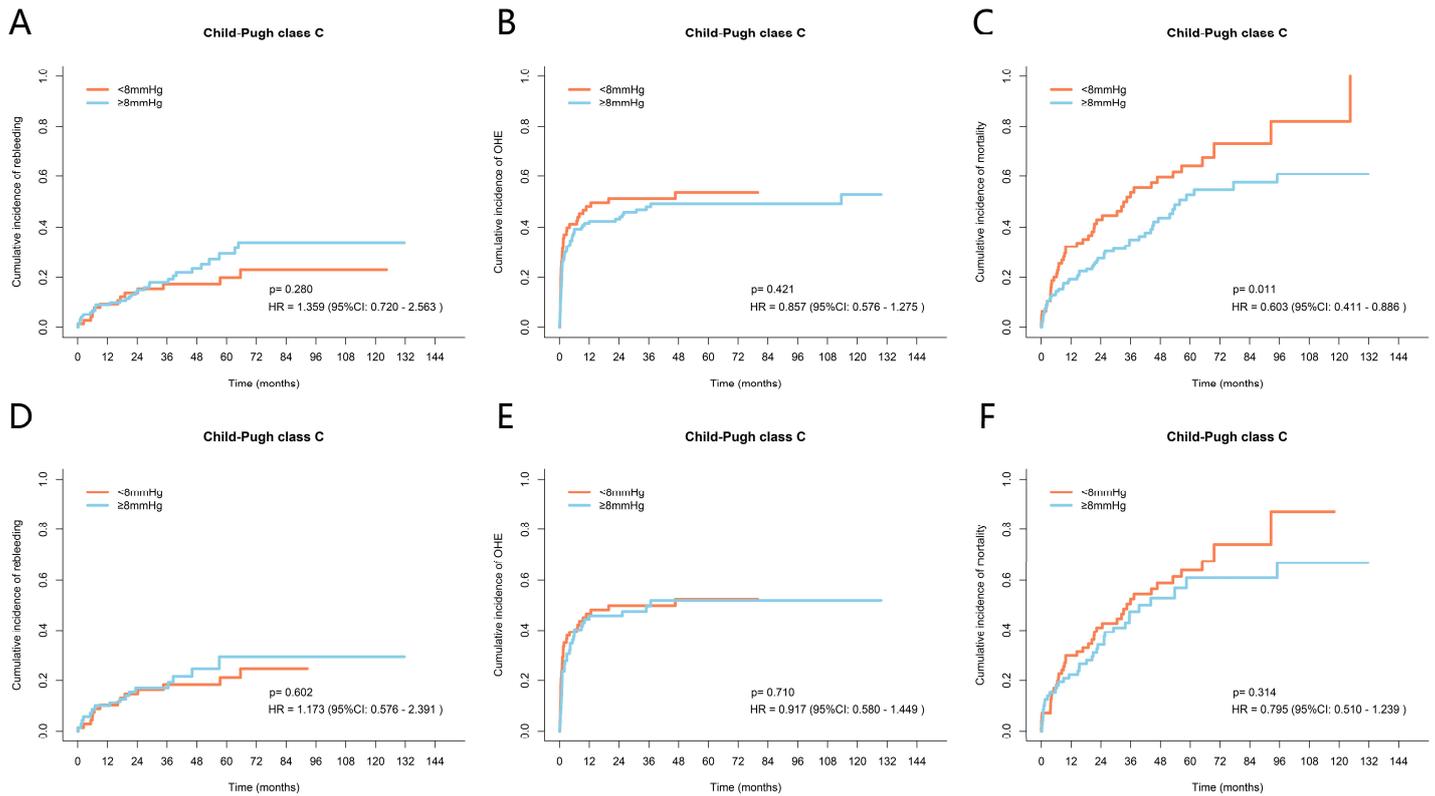

Supplementary Figure 27 Cumulative incidence of outcomes in Child-Pugh class B with 14mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class B with 14mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class B with 14mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class B with 14mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class B with 14mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class B with 14mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class B with 14mmHg threshold after PSM.

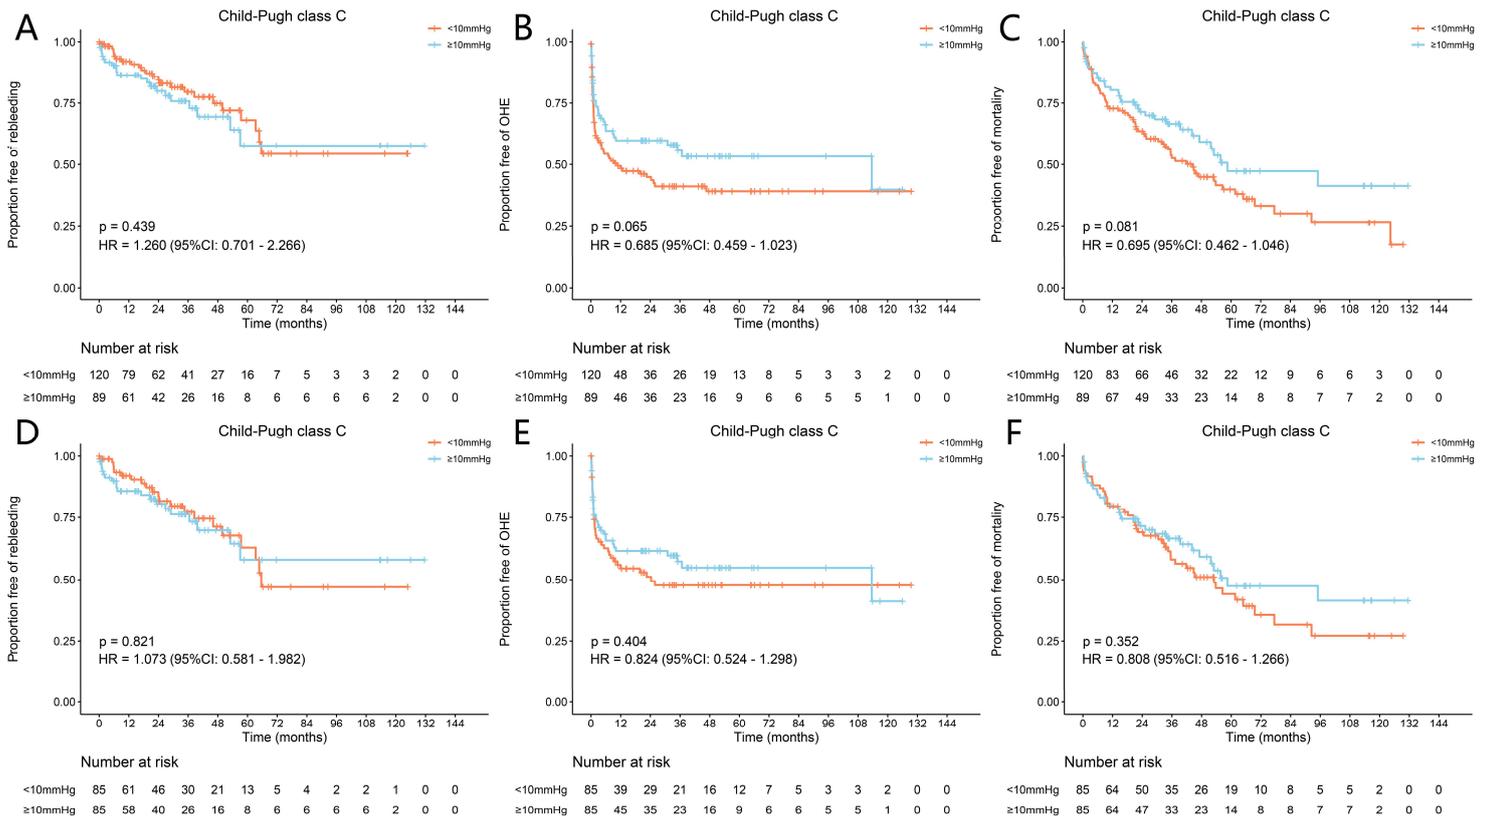

Supplementary Figure 28 Proportion free of outcomes in Child-Pugh class C with 8mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class C with 8mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class C with 8mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class C with 8mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class C with 8mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class C with 8mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class C with 8mmHg threshold after PSM.

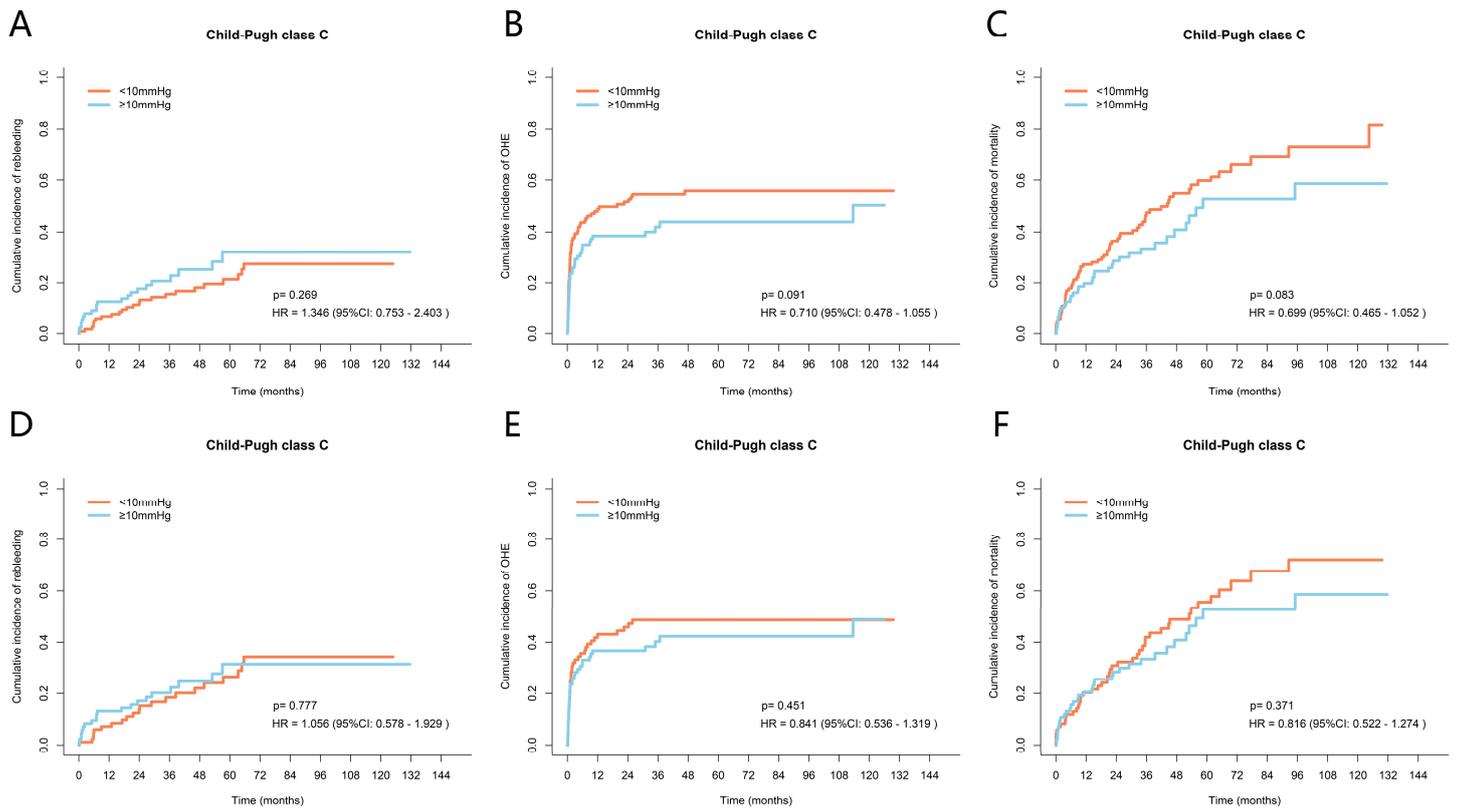

Supplementary Figure 29 Cumulative incidence of outcomes in Child-Pugh class C with 8mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class C with 8mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class C with 8mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class C with 8mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class C with 8mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class C with 8mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class C with 8mmHg threshold after PSM.

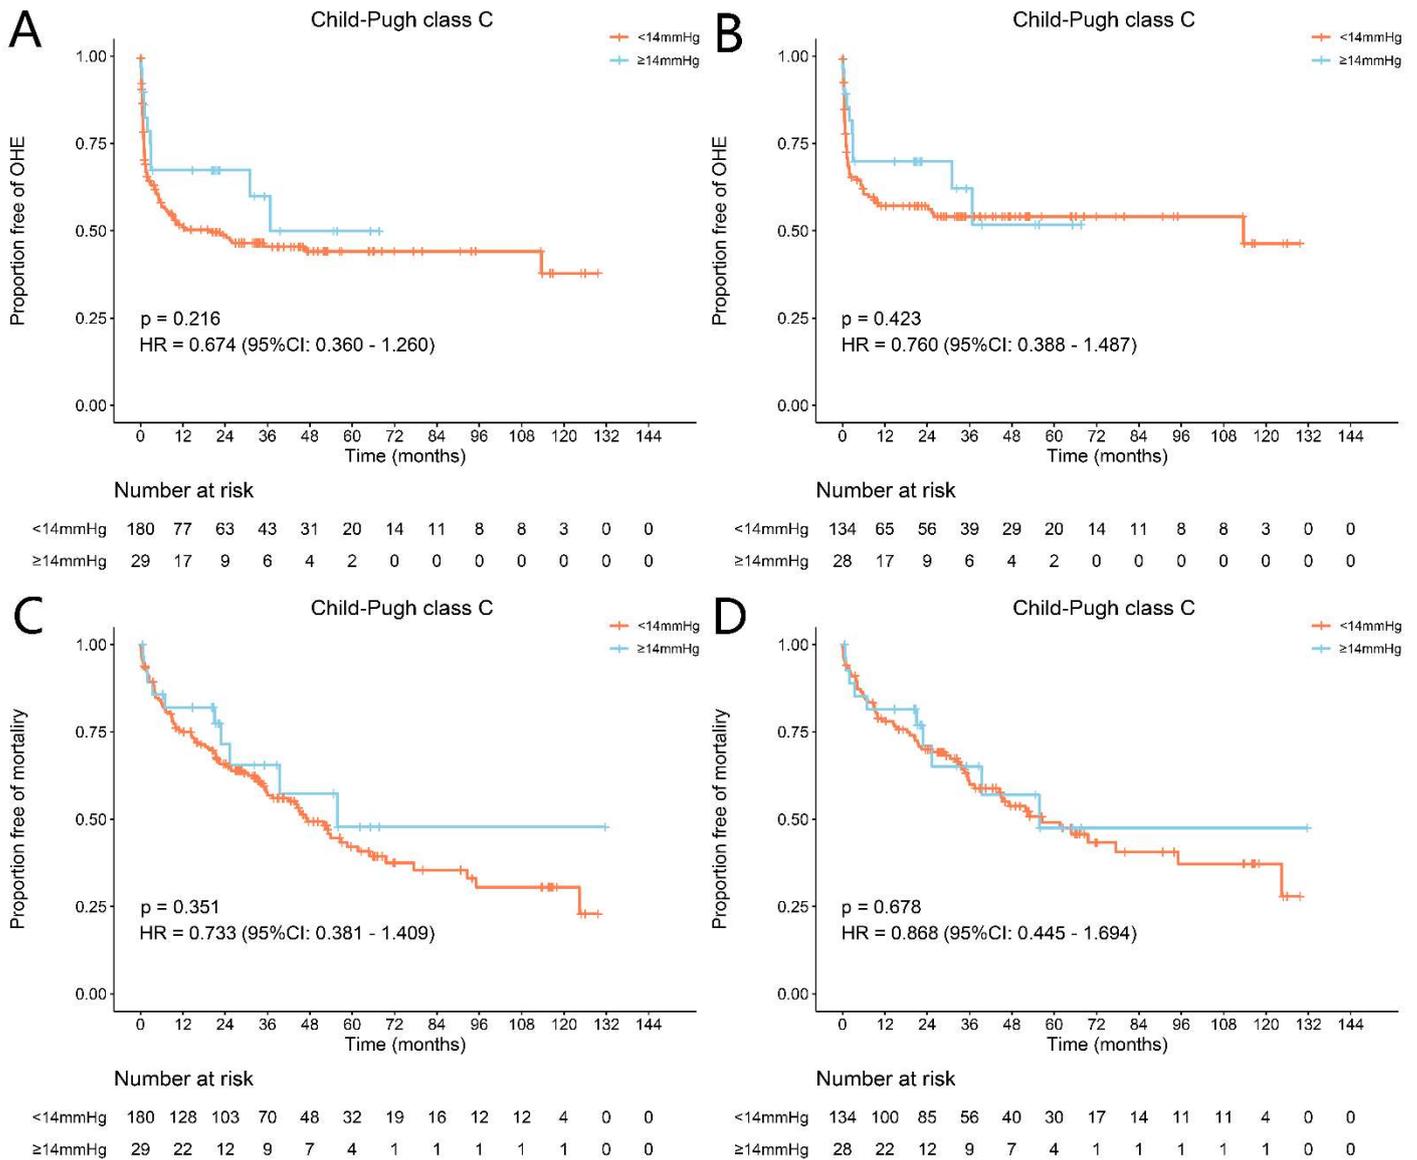

Supplementary Figure 30 Proportion free of outcomes in Child-Pugh class C with 10mmHg post-TIPS PPG before and after PSM.

(A) Proportion free of rebleeding in Child-Pugh class C with 10mmHg threshold before PSM. (B) Proportion free of OHE in Child-Pugh class C with 10mmHg threshold before PSM. (C) Proportion free of mortality of Child-Pugh class C with 10mmHg threshold before PSM. (D) Proportion free of rebleeding in Child-Pugh class C with 10mmHg threshold after PSM. (E) Proportion free of OHE in Child-Pugh class C with 10mmHg threshold after PSM. (F) Proportion free of mortality of Child-Pugh class C with 10mmHg threshold after PSM.

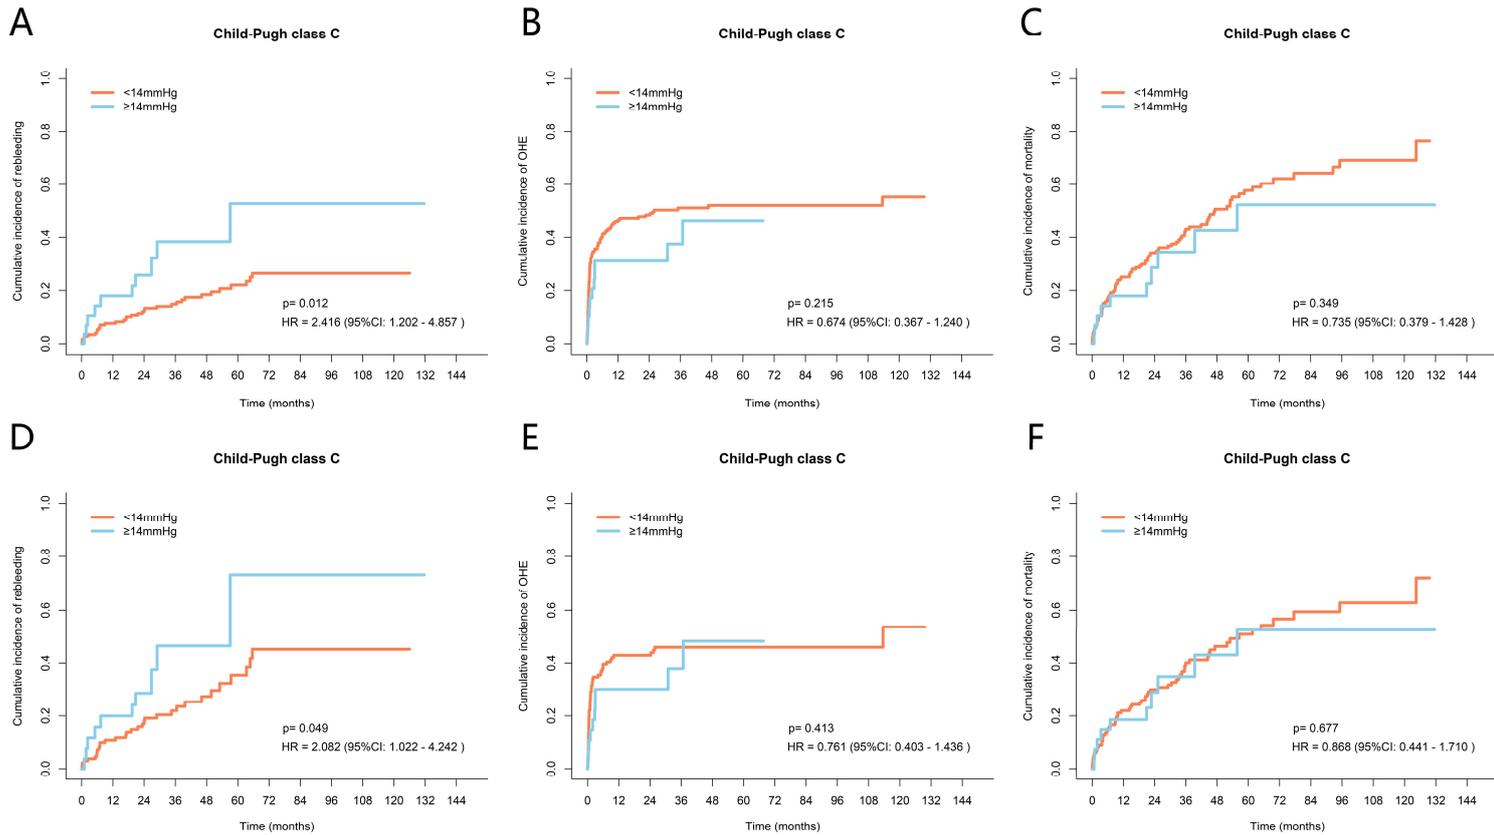

Supplementary Figure 31 Cumulative incidence of outcomes in Child-Pugh class C with 10mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class C with 10mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class C with 10mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class C with 10mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class C with 10mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class C with 10mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class C with 10mmHg threshold after PSM.

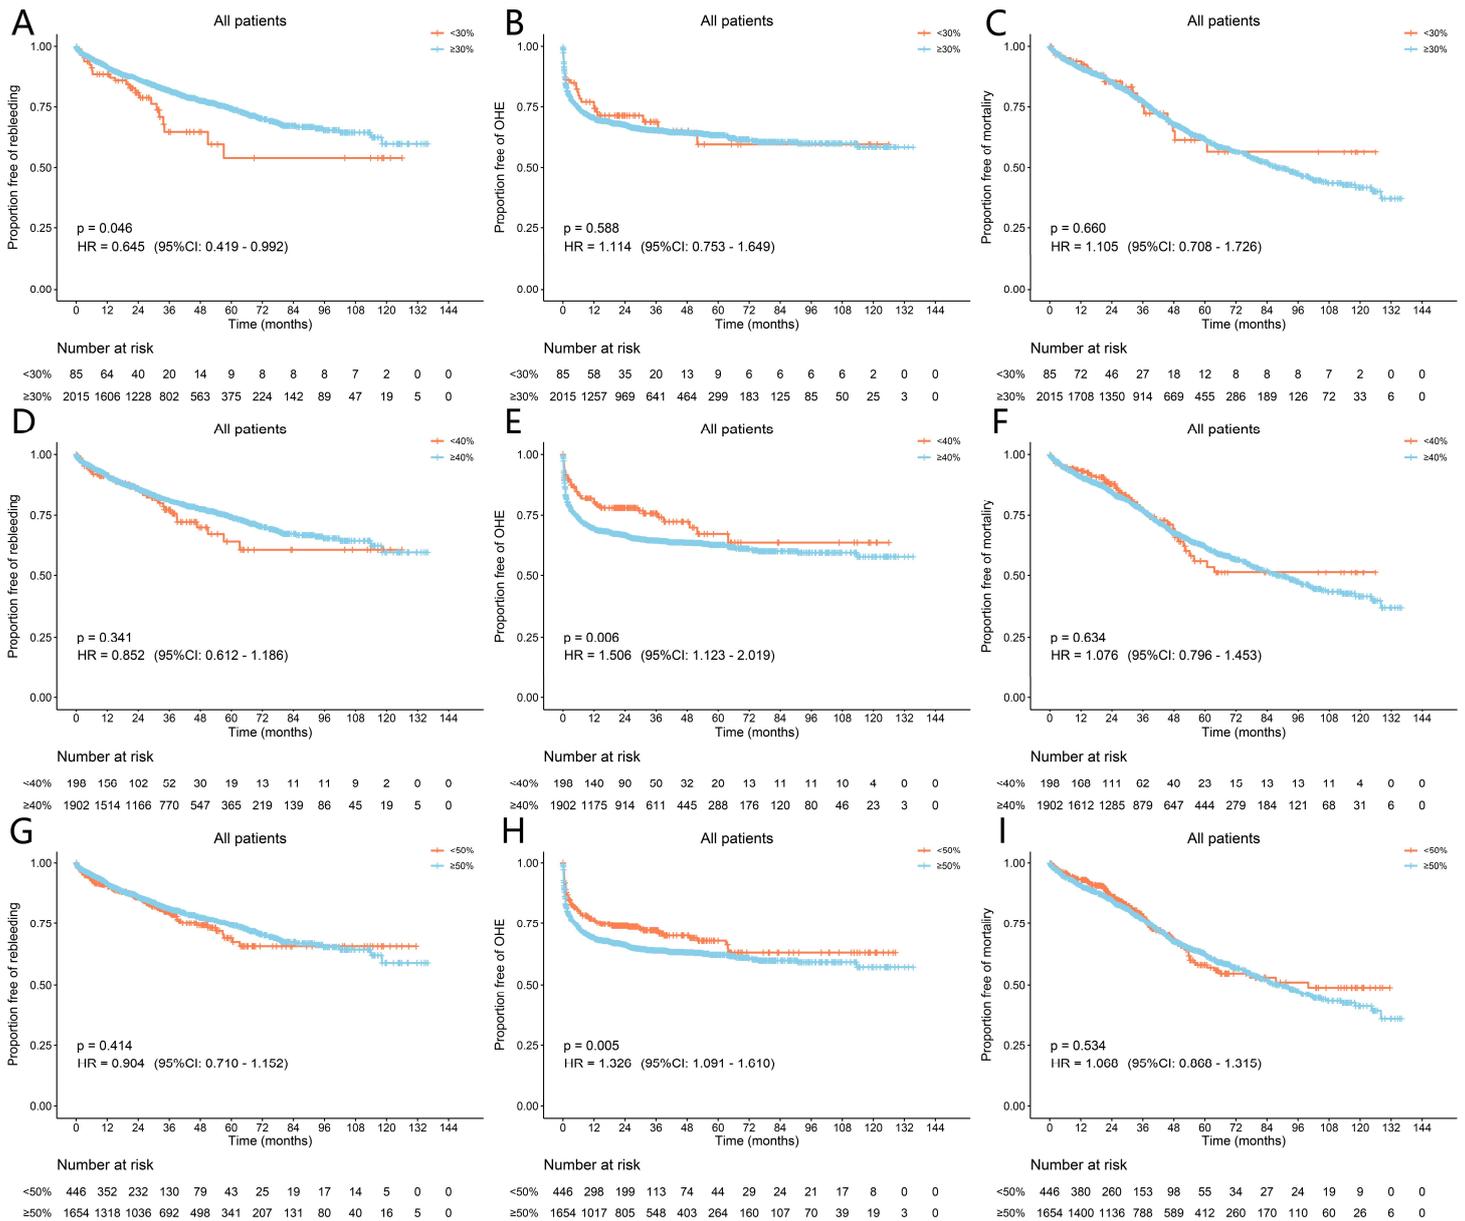

Supplementary Figure 32 Proportion free of OHE and mortality in Child-Pugh class C with 14mmHg post-TIPS PPG before and after PSM.

- (A) Proportion free of OHE in Child-Pugh class C with 14mmHg threshold before PSM.
- (B) Proportion free of OHE in Child-Pugh class C with 14mmHg threshold after PSM.
- (C) Proportion free of mortality of Child-Pugh class C with 14mmHg threshold before PSM.
- (D) Proportion free of mortality of Child-Pugh class C with 14mmHg threshold after PSM.

Supplementary Figure 33 Cumulative incidence of outcomes in Child-Pugh class C with 14mmHg post-TIPS PPG before and after PSM by competing risk analysis (Gray-Fine test).

(A) Cumulative incidence of rebleeding in Child-Pugh class C with 14mmHg threshold before PSM. (B) Cumulative incidence of OHE in Child-Pugh class C with 14mmHg threshold before PSM. (C) Cumulative incidence of mortality of Child-Pugh class C with 14mmHg threshold before PSM. (D) Cumulative incidence of rebleeding in Child-Pugh class C with 14mmHg threshold after PSM. (E) Cumulative incidence of OHE in Child-Pugh class C with 14mmHg threshold after PSM. (F) Cumulative incidence of mortality of Child-Pugh class C with 14mmHg threshold after PSM.

Supplementary Figure 34 Proportion free of outcomes in all patients with 30%, 40% and 50% decrease of PPG.

(A) Proportion free of rebleeding in all patients with 30% decrease of PPG. (B) Proportion free of OHE in all patients with 30% decrease of PPG. (C) Proportion free of death in all patients with 30% decrease of PPG. (D) Proportion free of rebleeding in all patients with 40% decrease of PPG. (E) Proportion free of OHE in all patients with 40% decrease of PPG. (F) Proportion free of death in all patients with 40% decrease of PPG. (G) Proportion free of rebleeding in all patients with 50% decrease of PPG. (H) Proportion free of OHE in all patients with 50% decrease of PPG. (I) Proportion free of

death in all patients with 50% decrease of PPG.
