† These authors contributed equally to this work.

The authors wish to make the following corrections to this paper [1]:

The third column of Table 1 was erroneously named Deacetylation Degree (DD, %), whereas it is obviously referring to the Acetylation Degree (AD, %) of the chitosan derivatives, as clearly discussed in the text of the manuscript. Table 1 summarizes the main characteristics of the polymers, giving an immediate picture of the investigated biomaterials. For this reason, the authors have deemed it necessary to provide a corrected version of the Table 1 heading. The original table is to be replaced with the following one.

Table 1. Main chemical characteristics of precursors (CSH and CSL) and Ch derivatives.

Polymers	MW, kDa; A ₂	AD ^a , %	QD ^b , %; n	TD ^c , %	DSD ^d , %	PD ^e , %	CDD ^f , %
CSH	379; 0.0009	-	-	-	-	-	-
CSL	131; 0.0008	-	-	-	-	-	-
QAH	428; 0.0001	7	85; 2	-	-	-	-
QAL	163; 0.0013	3	80; 2	-	-	-	-
QAH-Pro	460; 0.0001	7	85; 2	1.1	17.0	3.1	-
QAL-Pro	161; 0.0007	3	80; 2	1.2	14.9	2.3	-
QAH-CD	2344; 0.0001	7	85; 2	-	-	-	16
QAL-CD	633; 0.0001	3	80; 2	-	-	-	10

^a Acetylation degree; ^b quaternization degree; ^c thiolation degree; ^d disulfide degree; ^e protection with 6-mercaptopnicotinamide (6-MNA) degree; ^f degree of substitution with methyl-β-cyclodextrin.

The authors would like to apologize for any inconvenience caused to the readers by these changes.
